An old custom was revived in this charming little community, when very early in the evening young people gathered together and visiting shut-ins and others sang carols particularly suited to the occasion. The singing which was well practised, and part of which was conducted outside on a wonderful moonlight night, was delightful, and brought a pleasant Xmas spirit to every home visited. Needless to say the concert was deeply appreciated and brought such pleasure to many as to justify the continuance of this delightful old time practise.

A very interesting combat ensued. All the war-like manoeuvres known to the users of the two weapons were employed with great skill, but after waging gladiatorial strife for some time, the modern knight working his weapon with great advantage at a safe distance, put his adversary to flight.

During the next few moments a rearend engagement was conducted, which produced an ambition for speed in the retreating warrior, that would have done justice to Alabama, could leaving a haunted house. The situation at present, is one of armed neutrality with a "no man's zone between the nets."
