For BIGGER POTATO Crops switch to Geigy DDT Insecticides. Thousands of potato growers have discarded their former spray and dust materials and are reaping greatly increased profits through economical bug control with Geigy DDT Insecticides. These DDT compositions are products of Geigy Company, Inc., "Originators of DDT Insecticides"—your guarantee of dependability. IF YOU SPRAY—Use Gesarol* E 25, an emulsifiable solution containing 25% Geigy DDT. or Use Gesarol AK 50, a finely-ground, wettable powder containing 50% Geigy DDT. Especially adapted for control of potato insects. IF YOU DUST—Insist that Gesarol VD 50 be used in preparing your dust mixtures. You will find any of the above products economical and they may be applied with your present spraying or dusting equipment. For blight control, use GY-COP "53", an insoluble copper preparation that replaces copper-lime solutions or dusts. *Reg. U. S. Pat. Off. Distributed By: BRUCE STEWART & CO., Ltd.
