How To Treat Coughs

When the pure food law was passed, the fact came out that many cough syrups contain drugs which, while useful in their place, should not be put in a remedy for home use.

Really the most sensible way to treat a cough is not to take a mere quieting syrup, but to use a standard remedy like Vinol, our delicious cod liver and iron tonic that we sell every day. Cod liver oil has been used for centuries to cure coughs, and Vinol is better because it is free from grease and always agrees with the most delicate stomach.

More Money for the Small Dealers

The big man isn't big in spite of the telephone—it's because of it, to a certain extent. If you're satisfied with the profits your great-grandfather made, if you just want to eke out a bare existence from your business, if more business don't look good to you—well, a phone will be just in the way—a bothersome ornament. But, mark it down plain, if you want more business, a larger and better class of customers, straight tips on all the markets, the most profitable of inside information, and the respect of your customers, and envy of your competitors—in short if you want success—you'll see what we can do for you, and you won't waste time over it either. The phone will bring you business—it will prove its worth in better returns, in actual additional cash in your till. Let Contract Dept. prove these facts to you.
