HOME SEEKERS send for Va Farm List. Best climate, Dept. O, Emporia Va.

JNO. ALFRED MACDONALD provincial Land Surveyor, Hermanville.

FUR FARMERS AND TRAPPERS, attention. On and after November 1st I will buy for cash all kinds of furs, and, as usual will pay highest market prices according to grade and quality. I will also receive silver foxes on consignment for Messrs. Fred'k Huth and Co's., London auction sales. My connection with the leading fur houses in America and Europe keep me in constant touch with the best fur markets, and I am in a position to handle an unlimited quantity of furs at the best possible advantage to the shipper. I specialize in silver fox pelts, and my facilities for handling them are second to none in America. Satisfactory prices and service doubled my business last season, and I expect to double last season's business this year. Watch your silver foxes and pelt them when at their best. Correspondence solicited.—E. H. Rayner Summerside, P. E. I., Agents for Fred'k Huth and Co., London Auction Sales, 64 Park Street, S E. I., Southwark, London. E. C.

FOR SALE—Electric light plant at a bargain. Will take horse on payment. B. C. Webster, North River.

FOR SALE—Large dryed codfish, skinless fish, pressed, dried codfish and pickled codfish. Apply Beecher Court, North Rustico Harbor.

SCORES MURDOCK

"If these men felt that they had any possible chance of success on the issue of the tariff they challenged," declared the Prime Minister, "they would not be bringing in petty things and trying to discuss them on the public platform. We would not have this petty stuff from the Murdocks and the like of Murdock in the campaign if there were real issues — the volume of innuendoes and stupid insinuations which we have been hearing for two years from men who have not got the courage to come out and make any allegations against anybody and whose sponsors in the House of Commons have been urged in vain to even allege their wrongdoing against anybody in the Government. But, that is the character of the campaign is not better and no more potent argument they can raise."

Mr. Moyle objected to such a statement, but Mr. Morrison replied that he was not in the least worried by such a remark.

"One of the directors told me that in the Stores Department alone there was a loss of $200,000 and from $30,000 to $40,000 on eggs and poultry," Dr. Farewell stated. "Where did the directors gett he figures, if not at the head office?"

"None of the directors have a statement before them," Mr. Morrison replied. "I don't know how they got any such figures. So far as I know, there were no approximate figuers before the directors, though we were informed that there would likely be certain losses."

Used for Political Purposes

A gentleman, who at first refused to give his name, and who afterwards admitted that he was a Mr. Wilson of Simcoe County, but who refused to say anything more about himself, and who would not deny the charge that he had no right to be there, as he was not a shareholder, made an attack upon the orgnization, declaring they were using the co-operative business for political purposes.

"You should separate the co-operative business from the political" he declared. "Mr. Morrison, the secretary, I am informed, gets $2,500 a year from the co-operative company and he spends much of his time in political work. Others, I understand, are being paid by the co-operative company and are devoting a portion of their time to the political end. Under such conditions there is bound to be failure as a co-operative organization. Mr. Morrison went on the platform when organizing the farmers' clubs and told us, as farmers, that we would be able to purchase supplies better if we were organized, that the retailers were doing the farmers."

"I never said anything of the kind," Mr. Morrison declared.

"That is what Mr. Morrison said on the platform time and again," Mr. Wilson returned "and there is no use denying it. We were told that the farmers were trying to unite to cut out the middlemen, and we were also told that if we put our money in, we would get seven per cent. Such a promise as that should never have been made."

Dividend Paid Out of Capital

"Who made it?" Mr. Morrison demanded.

"The canvassers," was the reply, "and last year I understand, the seven per cent was pain."

"Paid out of capital," Dr. Farewell declared.

From the stock book he had learned that the directors' holdings of stock were as follows: Powers, one share, fully paid up; Burnaby, one share, $12.50 paid up; Col. Fraser one share, fully paid up; Lick, five shares, $125 paid up; Morrison eight shares, fully paid up and Ashe eight shares, fully paid up.

Appetite Good, Gained 20 lbs.

Could Not Feel Better

From a nervous wreck this man was restored to health, strength and happiness.

He tells his own story in this letter.

Mr. Ralph A. Roberts, Loverna, Sask., writes:

"In 1917 I had lost all appetite, failed 25 pounds in weight, become very nervous and shaky and in fact given up all hope of recovery. For some time I had suffered from constipation, which kept getting worse, until I was fast becoming a total wreck. Doctors and their drugs were sending me to my grave at the age of 39.

"Then I read about people being restored by Dr. Chase's Medicines and after three months' use of Dr. Chase's Nerve Food and Kidney-Liver Pills I found that my bowels were restored to normal movement each day and the constipation was no more. I had a good appetite, had gained 20 pounds and could not feel better. I shall always be grateful for these benefits."

Dr. Chase's Nerve Food, 50c a box; Dr. Chase's Kidney-Liver Pills, 25c a box, all dealers or Edmanson, Bates & Co., Ltd., Toronto.

CHOIR PRACTICE. — Every member of the St. Paul's Church Choir are requested to be present Friday evening at 7.30 p. m. sharp.

WE HAVE A MOST complete line of "Eversharp" pencils, price 75 cts., and upwards. W. W. Wellner Ltd., Grafton St.

TEACHERS ATTENTION.—All Prince Edward Island teachers are requested to refrain from applying for positions in the schools of New Westminster, B. C. The existing vacancies have arisen by the teachers resigning as a protest because the salary award of an arbitration board was not put into effect. Minnie Dunsford, Secretary of P. E. Island Teachers' Union.

TEA AND FANCY SALE—A successful tea and fancy sale was held under the auspices of St. Peter's Women's Auxiliary Society in St. Peter's schoolroom last evening. The hall, which was artistically decorated, opened at 3.30 o'clock and the numerous booths were kept busy until late in the evening. Supper was served from 5 until 7 o'clock and were indeed a credit to the members of the society and to those who contributed to make the tea a success. An auction of candy was made by Rev. Mr. Malone. Altogether there were about 300 people attended and the proceeds amounted to $500. This sum which is a very satisfactory one will be used by the society in its work.

PERSONALS

Mr. George Rogers and bride returned last night from a three months' honeymoon trip in Europe.

IN MEMORIAM

ROBERT S. WAUGH

Death took place at his home at Wilmot, of Robert S. Waugh at the age of 58 years. He leaves to mourn a widow, three brothers, Thomas, at Wilmot, Charles at Summerside and William at Calgary, also four sisters, Mrs. Geo. W. Robinson, Summerside; Mrs. Frank F. Tuplin, Summerside; Mrs. Wesley Wood, Dunstaffnage and Mrs. Josephas Smallman, Summerside. The funeral service will be held Friday at 1.30 p. m. Interment at the Baptist Cemetery at Central Bedeque.

"GOES BROKE" IN VAUDEVILLE.—It is said that the first man to undertake to produce vaudeville in America was Silas W. Steggs of San Francisco, who inherited $400,000 from his uncle in 1865, and not being used to handling money in large quantities, started in to spend it freely. He went on a trip to Europe and spent most of his time at the Alhambra music hall in London, and launched a project to start the "New York Alhambra." His idea was approved by a number of amusement people and he hired hundreds of them to come to the United States. But his money ran out and he left his party on a boat in New York bay and disappeared.

The Able Orator

"That was a splendid speech you made."

"It had to be a good speech," replied Senator Sorghum. "I had such an almighty poor argument that I was obliged to depend almost entirely on the rhetoric."

Minards liniment for garget in cows

Almost Unbelievable

You can hardly realize the wonderful improvement to your skin and complexion your mirror will reveal to you after using Gouraud's Oriental Cream for the first time. *Send 15c. for Trial Size*

FERD T. HOPKINS & SON Montreal

Gouraud's Oriental Cream

PARIS, Dec 7—Fifteen hundred small wireless outfits have been installed in Paris jewellery, watch and clock stores to enable the jewellers to catch the correct Greenwich meridian time as it is sent daily at ten o'clock to the Eiffel Tower. Formerly the exact time had to be obtained from the observatory by telephone.

The installation is simplicity itself. The outfit, about nine inches in diameter, is hung on a nail in the wall. A copper wire run down to the cellar or along a water or gas pipe serves as a "ground wire," while the removal of the bulb from a nearby electric light and the insertion of a contact plug take the place of antennae. It can be done in five minutes.

The outfit can be regulated to hear anything that is sent out from the Eiffel Tower. The correspondent listened in when the press matter was being sent out one day and the signals were clear and easily heard.

Mrs. Ezra Eddy Seeks Divorce

NEW YORK, Dec. 6.—Trial of the suit for divorce, brought by Mrs. Eddy, against Ezra Butler Eddy, grandson of the founder of the E. B. Eddy Comany begun yesterday before supreme court justice Lydon.

The Eddys were married in Ottawa, tyeleve years ago, and have one son ten years old who now lives with his mother, in Babylon, Long Island.

According to testimony given at the trial, the two were on good terms, although separated for about seven years until Mrs. Eddy was told that her husband was attentive to another woman who believed he was single.

Then the suit for divorce was commenced, summons and complaint were served on the husband while he was dining with his wife in a well known restaurant. He later served an answer in which he denied the allegations in his wife's complaint, and claimed he was a victim of circumstances and never had been guilty of misconduct of the sort which would justify divorce.

Packers of Chicago Declare A Strike

CHICAGO, Dec. 5.—At the call of the first day of the strike of packing house workers, union officials announced that 4,000 workmen in packing houses throughout the country were on strike while spokesmen for the packers asserted Chicago plants were operating with full forces while plants in other centres all continued work.

Twenty-nine thousand workers in packing house centres from outside Chicago responded to the strike call today, according to a statement tonight by Dennis Lane, Secretary of the amalgamated meat cutters and butcher workmen of North America, which called the strike after a wage cut averaging ten per cent. had been decided on by plant assemblies, composed of representatives of employees and workers through which the packing companies propose to settle questions affecting workmen. More than 12,00 workers employed by the big five packers in Chicago walked out today according to Mr. Lane's Statement

Former Kaiser Snortly to Wed Widow

BERLIN, Dec. 6—True to his predilection for doing the unexpected, the former Kaiser is planning another surprise for the world.

Wilhelm is reported to be contemplating marriage.

Lonely in exile, since the death of the Empress, it is asserted he has decided to take another mate to share his fate with him.

That is the somewhat sensational news which the Berliner Zwoelf Uhrblatt, a newspaper which comes out at noon, will publish tomorrow. The second part of the surprise is that the women who is alleged, will, or may become the exiled ex-Emperor's second wife, is not a princess or of royal blood, but of the so-called lesser nobility.

The paper will assert that she who aspires to share the Kaiser's exile is reported to be Frau von Rochow, widow of an army colonel, and who is now a guest at Doorn.

If there is any truth in the report which could not be confirmed to-night, it would indicate that the Kaiser has given up all hope of ever regaining the throne, which until very recently he has been said to entertain.

The report is said to come from a person very close to the family of Frau von Rochow, whose relatives strongly oppose her alleged plan to marry the former kaiser.

In monarchistic circles here the report is declared to be ridiculous.

$40,000 Damage To Windsor Hotel

WINDSOR, ONT., Dec. 4—Fire of undetermined origin did damage estimated at colse to $40,000 to the Crawford House, Windsor's oldest hostelry, early Sunday morning. There were about 20 guests in the place, but all reached the lobby without resort to the rope fire escapes.

Following discovery of the flames on the second floor, the corridors rapidly filled with smoke, and most of the guests made their way downstairs before the firemen arrived. A large waterpipe burst and considerable part of the damage was due to this. The hotel is owned by a Syrian.

UP-TO-DATE YOUNGSTER

Leroy had spent all of his allowance for fireworks. His little brother Earl, being more conservative, still had some money left. From this amount Leroy was attempting to borrow 10 cents.

"Why, Leroy," I said, "are you going to take some of your little brother's money?"

"Sure," he replied, "isn't it all right? He's going to let me have 10 cents and I'm going to pay him back 11 cents."

Wondering where he had acquired his idea of interest, I asked:

"Why the extra cent?"

"That 1 cent is for war tax."—Chicago Tribune.

Two Rules for Success

"To what rules, Mr. Gotthers, do you attribute your wonderful business success?"

"To these: "Give a good man authority," and "Give a dub the air."

THE WINTERING OF HOUSE PLANTS

The following informative article will be readily welcomed by all who are interested in keeping a home bright with plants and flowers during the winter months. The wintering of house plants is not an irksome work, plants are not really exacting if they are supplied with three essentials: food, ventilation and water.

The first of these is naturally contained in the soil, and any good top soil will have enough plant food for a beginning. But for a long winter it is better to take a quantity of top-soil and mix well rotted manure with it, shoveling it over and over until the fine manure is mixed all through the soil. All the winter plantings should be anticipated and the soil mixed all at once, piling it up to cure until needed.

Commercial fertilizers are rarely worth-while if finely rotted manure can be had, but some lime dusted through the mass as it is mixed will be helpful, for lime does many mysterious things to aid plant growth. It makes the soil lighter, improves the drainage and ventilation, and releases the plant food in the soil, besides improving the action of the manure.

Ventilation is of two kinds: through the soil and through the air. Ventilation through the soil is closely allied with drainage. When the soil is prepared to drain easily the ventilation is safe. Drainage depends upon the lightness of the soil, or its tilth. If after composing the top soil, with the manure, the mass still seems likely to pack down and drain poorly, it will pay to shovel it over again, adding chaff, finely broken straw, brittle leaves, or any other litter that will open up passage through the soil.

Mentioning leaves reminds me that many people think they must go to the woods for leaf mold and woods earth for their winter plants, but their labor is usually to no purpose. In the beginning the woods earth may not be nearly as rich in plant food as the top soil of the garden, and, since all leaves are more or less acid, the soil is often unfitted for house plants.

After getting the soil itself into satisfactory condition, it may be packed down into the pots or boxes so that no plant can grow. Ventilation tends to the manner in which the pots are filled. At the bottom there should be a layer of fairly large and irregular stones, coal or clinkers. Above this there should be a layer of finer material, with a layer of straw, leaves or other fibrous material on top. This will permit the excess water to drain out and the air to work in at the bottom.

Plants will not grow standing in a puddle of water, and if air cannot get through the soil it will sour and mold.

Ventilation through the air calls for just that ventilation which is necessary to keep us healthy. Plants do not fare any better than we do in a closed-up house in which the air is stuffy and stifling. Plants cannot yawn as we can to show that the air is bad, so they bear it as well as they can, drooping and looking half alive. Anyone who needs an argument for fresh air in the winter for the family should try house plants in a lifeless atmosphere. They will be a convincing object lesson.

Then water. It is easily possible to get too much water on plants if the pots of boxes are not properly filled. If the bottom is not open and there is no drainage system of stones, the whole potful of soil may become waterlogged, which is merely another way of becoming suffocated. But if the pots are filled properly it is not likely that the plants will get too much mater. The rooms of the average house are kept warm, so that the plants need more watering than they do out in the garden.

The condition of the soil is the best indicator for watering. It should be moist but not wet. Sprinkling regularly once or twice a week is good practice. Some things, like ferns and palms and lilies, could be sprinkled lightly every morning. It is better to give less water than not enough, but it is impossible to say how much or how often. Keep the soil moist. If the plants seem dry and the leaves are edged with yellow, give more water.

These three things govern the success or failure of indoor plants, barring unusual happenings or the attack of insect pests. Any woman can make a success of indoor plants if she will think of them as she does of any other living thing dependent upon her attention, visualizing sympathetically their needs. It is not hard, and the gorgeous blooms of geranium, begonia, cyclamen, amaryllis, begonia, cyclamen, amaryllis, and the others, to say nothing of the fresh green fern leaves festooning around a fern box or jardiniere will be worth the effort.

Sooner or later everyone has a battle with insect pests, but it is an easy matter to control them. First of all, every plant brought in from the yard should be examined for insects, and these should be washed off with soap-suds or black leaf forty. Then there is an even chance that no other pests will appear during the winter.

But if they should come they will belong to one of three kinds: biting insects, sucking insects, or scales. Scales are really a sucking insect, but they are discussed more satisfactorily as a separate class. For all of them there is one good cure. Heat some water to 125 or 130 degrees—use a thermometer, dip the plants into the water and hold them immersed for two seconds. For scale insects it will be best to immerse the plant again after a minute.

For large plants, and for plants in large boxes, that method will not do, so here we must separate the three classes of "bugs" for extermination. The biting insect, such as the worms on roses, may be finished off nicely by poisoning his food. A spray of arsenate of lead, paris green, or any other good spray will do. Follow him up relentlessly, spraying with an atomizer so as to leave the tiny drops separated on the foliage. If they join they will run off in a stream.

Next, the sucking insect may appear as the common green louse or the mealy bug, which looks like cotton. For this gentleman and his numerous family we must have a contact poison—one that will burn when it touches him. Nicotine sulphate, or a fairly strong soapy spray, will dissipate all his hopes of life, liberty and the pursuit of tender leaves.

Then that inexcusable nuisance, scale insects, which appear on ferns orange and lemon trees, and palms, are to be treated just like sucking insects, only more so. The spray or soapsuds must be soaked through his protecting scale, and a rag dipped in soapsuds and applied persistently will be most effective.

House plants are more resistant than we think, and show no discomfort for a long while after the insects get started. To make our treatments timely all house plants should be examined carefully at regular intervals, and sprayed before the pests gain a foothold. Broad leaved plants like lillies, ferns and palms, should be washed off with soap occasionally.

Don't give up this year because you have had poor success before. Think of the pants as little living things, asking not much of you and giving all they can to brighten up the corners where they are well cared for.—G. B. A.

Tailor Made Suits For $24.00

Tip Top Tailors, Canada's largest one-price tailors have appointed A. F. Campbell, 157 Grafton St., merchant tailor, Charlottetown, their agent for this district. Their special designer will be here for a few days this week to give special attention to the public.

Don't wear ready made clothes. Be a particular dresser. Be measured for smooth fitting, custom made clothes.

Tip Top Tailors are Canada's largest tailoring organization. Every garment is made to your own measure with a cast iron guarantee of satisfaction or your money cheerfully refunded. Over 500 agents from Halifax to Vancouver give an enormous outlet. A large turnover permits of small profits. You get the benefit.

We invite you to visit our winter showing of overcoatings and suitings. It will pay you, and you are under no obligation to buy.

EAT FOUR MEALS DAILY

Their only consolation is in eating. They consume four meals daily, at which they drink great quantities of weak tea, and before they retire for the night devour large quantities of alcuzcuz-balls composed of flour, water and honey.

They are very careful with the cattle and never forget to put them to pasture facing away from the sun, so that they will not lose their sight through the brightness.

Among the chief festivities are those connected with births and the giving of names, which occurs eight days after birth, when the father sacrifices a sheep and sprinkling the blood, pronounces the names to be given to the child in the name of Allah.

At 20 years of age, it is customary to marry. A young man then announces to his father his desire to wed a certain young woman. The father communicates with the father of the choosen bride and sends his brothers to sacrifice a sheep in front of his tent, at the same appealing to the father to give his daughter.

If the father consents, the price of the young woman and the dowry she is to bring with her is agreed upon. The day of the ceremony is settled, the bride knowing nothing about it.

When the wedding day arrives, the parents of the bridegroom go in procession to the tent of the bride's father, to whom they bring the half of the price to be paid for the bride receiving in turn therefor the half of the bride's dowry. The men fire three rifle shots and the women shout with joy.

The couple, although the ceremony is yet incomplete, go to their future tent together. The real wedding ensues the following day when the bride is taken in procession on the back of a camel, covered with silks and followed by her body-slave if she is wealthy enough to possess one, to the tent of the bridegroom, where she is welcomed by his parents and the remainder of the price and dowry changes hands. The wedding is completed to the accompaniment of much feasting.

A bride who proves unfaithful may be sent back to her father's tent dressed in sackcloth.

Does It Pay To Worry About Appendicitis?

Can appendicitis be guarded against? Yes, by preventing intestinal infection. The intestinal antiseptic. Adler-i-ka, acts on BOTH upper and lower bowel removing ALL foul, decaying matter which might start infection. EXCELLENT for gas on stomach or chronic constipation. It removes matter which you never thought was in your system and which nothing else can dislodge. One man reports it is unbelievable the awful impurities Adler-i-ka brought out. Hughes Drug Co., Ltd., (In Georgetown by S. C. Knight, Druggist.)

W. W. Wellner
JEWELER & OPTICIAN
CHARLOTTETOWN, P.E.I.

MY MOTHER

Across the lengthening vista long I gaze,
Musing upon the things I fain would smother,
Till, far aback, in childhood's happier days,
I see a form whose image ever stays,
It is, it is MY MOTHER.

Oh, who can read the pathos of that word
Which clings more tenderly than any other?
And who, with eyes by tears full often blurred,
Has failed to hear, by solemn memories stirred,
Again the voice of MOTHER.

Now let my straining gaze o'er-leap the past,
Mine eyes shut out the sights I fain would cover,
My mind the ills and dark defections cast,
And memory consecrate, until at last
I see, once more, MY MOTHER.

Ah, never more may I behold that face
Around which Angels ever seemed to hover;
Yet, may I live, that when my soul's release
Shall speed me to the Land of endless peace,
I'll meet, once more, MY MOTHER

Rev. George I. Foster, 1106 Addison Rd., Cleveland, O.

NEW GLASS INDUSTRY.—Important developments are eventually probable on the northern borders of Dartmoor, in Devonshire, England, in consequence of the discovery of a very large deposit of granulite, a substance of much value in the manufacture of glass. According to experts, "granulite contains not only silica, but potash, soda and alumina, which are necessary in glass making, and its use is not only economical, but gives the best results in the production of glassware of the highest quality." It is stated that an experimental furnace has been in use for some time, two others are being constructed, and it is anticipated that the commercial manufacture of glass will commence almost immediately.

The super expert—Well, sir, how is your will power after that first lesson?

The patient—Wonderful! Why this morning I got my wife to mind the baby for nearly 20 minutes.—Conest.

Even you rworst enemy probably has no idea how mean you could be if you wanted to.

WHY DO ACORNS AND BEECH NUTS FALL AFTER A FROST?

"Heat expands and cold contracts," except in the case of water which expands when it freezes. A glass, can or dish of water bursts. A blacksmith heats a tire red-hot. Then it expands and goes on easily over the wooden felloes and the cold of the water, poured on, contracts the tire, that then pinches snug to the wheel. This is called "setting a tire."

So there is a slight moisture between the cup and acorn and the cold of a few frosty nights expands that moisture and loosens the nuts and they fall to the ground.

THEIR BLOOMIN' SWANK.

A coster and his best girl were discussing the recent marriage of two of their acquaintances.

'Arry: "did you read the list of presents Ann Smith 'ad for 'er wedding?"

'Arriet: "Yes, I did. The hidea for sich as them 'aving the weddin' put in the paper. They might be haristocrats!"

'Arry: "Fancy'er mother giving 'er sich a 'andsome present as a 'orse and trap!"

'Arriet: "Garn! It was a clothes-'orse and mouse-trap! That's their bloomin' swank!"

PYREX Transparent Oven-Ware
TRADE MARK REG.
Has the name on every piece

Saves Fuel, Food and Labor

Pyrex saves about one-half the fuel required, because it absorbs nearly all the oven heat and cooks food quickly.

It saves food in many ways. When cooked in Pyrex, vegetables and meat retain their natural color and flavor to such a degree that economy may be practiced in buying the less expensive kinds and yet have delicious food.

Pyrex saves labor—it is always free from grease and odors. You can wash it as easily as your china and silver.

Every piece is guaranteed NOT to break in oven use.

We have a beautiful display of this oven and table ware, in prices from 90c to $10.00.
