ward Island. The Doctor reports that at this meeting it was decided to hold a National Campaign for funds in May or June of 1927. He also states that the Society has appointed a chief Commissioner for Canada, and the chief duty of this commisioner will be to visit all the provinces and make arrangements for publicity in connection with the campaign. The Doctor was re-apopinted on the Central Council for Prince Edward Island, together with Mr. Justice Haszard and Dr. S. R. Jenkins. At this meeting, the activities for the present year were also discussed. As previously announced the Anti-Tuberculosis Association of Canada has granted $20,000 for the work of the prevention of tuberculosis in Prince Edward Island, the Provincial Government contributing $5,000. This work will be carried on under the auspices of the Red Cross Society the Provincial Grant of $2,500 for the Red Cross being thus doubled this year. As this province already holds the unique position of being a bovine-tuberculosis free area, it was considered that it would be an ideal place for a campaign against tuberculosis. Hence, the generous grant by the Anti-Tuberculosis Association, supplemented by the Provincial Grant, which brings up the sinews of war for the Island campaign to the splendid sum of $25,000. It is hoped that as a result of the activities now planned that within five years the death rate from tuberculosis will have been reduced one half. Dr. Johnson was accompanied home by Mrs. Johnson, who had been visiting relatives in New York.

FASHION FANCIES

By Marie Belmont

Chic little two-piece frocks of crepe remain in the lead as a late Spring and early Summer fashion. The one shown above is copied from a Paris model, and the use of brilliant red in diamond pattern against a white background is most effective.

This same print is used for the smart revers that finish the V-shaped neckline. The buttons are white pearl.
