

Have One Doctor

No sense in running from one doctor to another. Select the best one, then stand by him. Do not delay, but consult him in time when you are sick. Ask his opinion of Ayer's Cherry Pectoral for coughs and colds. Then use it or not, just as he says. We have no secrets! We publish the formulae of all our preparations.

In the Dominion Department of Agriculture, the Branch of the Dairy and Cold Storage Commissioner, in the matter of cow testing associations, reports the following:—In the association at New Glasgow, P. E. I., one herd of seven cows has an average yield of 807 lb. milk, 3.4 test and 31.3 lb fat. In the Brookville, Ont. association the highest average fat yield during the same 31 day period ending July 30, was 30.7 lb. Although, however, the general average yield of those two associations shows Brookville to be two and a half pounds of fat more per cow, yet the above comparison of two herds indicates clearly the possibilities of successful dairying on "The Island", and the distinct advantage of the cow testing associations in making such comparisons available between one section with usually a late spring, and another old established dairy section. There is great encouragement herein for dairy farmers in the Maritime Provinces. Central Smith, Ont. August 1, 156 cows average 845 lb milk, 3.2 test 27.5 lb fat. Beaverton, Ont. August 7, 117 cows average only 19.8 lb fat. Selwyn, Ont., 27.4 lb fat.
