INSIDIOUS EYE STRAIN

We use this adjective advisedly.

Sufferers from eyestrain may have perfect vision and therefore do not suspect the presence of any eye defect.

The motive power of the entire human organism is Nerve Energy.

Normal eyes, it is computed utilize about 20% of this Nerve Energy, but when Eyestrain is present, a much larger proportion is required. Hence defective eyes, through their consumption of an excessive amount of Nerve Energy may seriously affect the functioning of other organs of the body and produce ill health.

It Pays To Get The Facts

A large proportion of all the nerve energy generated in a normal body is expended in the act of seeing.

Eyes are often found to be defective so that although vision is still good, they are consuming twice or three times their allotted portion of nerve force, thus robbing other vital organs of their motive power.

The result is serious physical disorders—often in remote parts of the body. Two out of every ten people are in this fix, yet the real cause of their trouble is often not even suspected until a thorough examination discloses the facts. If there is any reason whatever to suspect eye strain, the common sense thing to do is to have a thorough examination and

TOWN COUNCIL.—A special meeting of the Summerside Town Council was held on Wednesday night with the Mayor and all councillors present. The object of the meeting was to consider ways and means of disposing of the equipment, building and land of the old electric light plant. It was decided to sell the machinery of the old plant to the highest bidder. The lot of land at the old plant is to be disposed of at \$200 provided the engine and producer are sold. The building is to be later sold separately to the highest bidder. Some discussion took place re the laying of new concrete sidewalks on Water Street, from Granville to Euston, and the Street Committee were instructed to interview the property holders and find out how many would be willing to share one-half the cost of laying the sidewalks. Messrs. Taylor and McNeil have already signified their willingness to have the sidewalk laid on the Council's terms. The Electric Light Committee were empowered to purchase cable for the purpose of conducting electric light when required underneath the sidewalk. The resignation of Mr. Benj. Sudbury, teamster, was accepted and it was decided to advertise for another teamster.
