

# A Used Car is only as Good as the Dealer who Sells it

In buying a Used Car you are forced to depend upon the reputation of the dealer who sells it.

He alone is in a position to know the history and present condition of the cars he sells.

Dodge Brothers Dealers are business men, operating permanent establishments under valuable franchises. They look upon every Used Car purchaser as the ultimate buyer of a New Car, and they value his good will accordingly.

Buy a Used Car of any Dodge Brothers Dealer and you will receive honest value for your money.

And right now is a particularly good time to buy.

Increasing sales of new Dodge Brothers cars—following radical improvements in beauty and performance—have everywhere brought in an exceptional selection from which to choose.

New Car Prices			
Touring Car	\$1230.00	Sedan	\$1465.00
Coupe	\$1350.00	De Luxe Sedan	\$1675.00

## DODGE BROTHERS MOTOR CARS MADE IN CANADA

### IN THE STUD

Land League 3466  
Trial Mile 2.16 1/4

Winner of Standard Bred Class Provincial Exhibition 1925.

Land League is a beautiful black stallion weighing in the vicinity of 1200 lbs. Sired by Nathan Axworthy 2.09. His dam is by Direct 2.05, dam of Xomrect 2.03 1/4. Was world's champion green trotter. Land League needs no boosting. Just look at one of his colts. He will stand for service at owner's stable. Terms \$5.00 cash at time of service. \$10.00 more when mare proves to be in foal. Mares at owners risk.

WILLIARD KELLY,  
Southport.

Telephone 847-L.

## Low Tourist Fares to Canadian Rockies and Pacific Coast

TAKE advantage of the low tourist fares to the Canadian West this summer. Reap the benefits of reduced rates to visit the greatest scenic wonderland of the world.

See Jasper National Park, noted for its super hotel service, for its glorious hiking, mountain-climbing, motoring, golf and tennis. See the magnificent scenery of the Triangle Tour—the Myrtle Skeena—Prince Rupert. Enjoy the glorious boat trip through the Sheltered Scenic Seas of the North Pacific. See the towering mountains, the sparkling waterfalls along the Fraser and Thompson Rivers.

See Alaska  
Take a boat trip to Skagway or Wrangell. See the Taku Glacier and other scenery typical of Alaska.  
The Great Lakes Route from Sarnia to Port Arthur via Northern Navigation Co.'s steamers adds zest to the trip for those fond of water travel.

CANADIAN NATIONAL RAILWAYS

Ask any Canadian National Railways Agent for information and illustrated literature or write Genl. Passg. Dept., Montreal, N.B. We will plan your entire trip—make your reservations and give you the benefit of every facility at our command—Canadian National personal service is unsurpassed.

USE CANADIAN NATIONAL EXPRESS  
For your next shipment—also for Money Orders, Foreign Cheques, etc.  
C.N.R. Trans-Continental Trains are Radio Equipped

### Scientific Facts

#### NEWEST NOTES OF SCIENCE.

Iodine is being obtained from volcanic springs in Java.

A wing nut fastens a new rubber faced stopper tight in a bottle.

Canada has more than one half of the forest lands of the British Empire.

Resembling an enlarged bottle opener is a new device for opening ice cream cans.

A government school to train airplane pilots has been organized by Czechoslovakia.

An adjustable top that controls the flow of air features a new building ventilator.

Of German invention is a light wheelbarrow that can be folded for carrying or storage.

A tiny electric fan has been invented that is operated by screwing it into a light socket.

A photographic system for surveying and measuring land has been invented by a London resident.

A metal grip said to fit the handle of any file has been invented to protect the hands of users.

The velocity of the wind is indicated by sound emitted by a device invented by a French scientist.

Heat taken from an electric light socket presses trousers in a few minutes in a new device for home use.

As soon as lifeboats invented by an Englishman touch water floats switch on electric lights inside them.

While an Idaho inventor's mowing machine is drawn by horse a gasoline engine operates its cutting blades.

The Arabian city of Aden has been given credit for the first electric light plants in that part of the world.

As the lid of a new bread box for household use is opened it places a slicing board in position for service.

German subsidies of various kinds to encourage the development of civil aviation exceed \$7,000,000 this year.

A rubber ball that is inflated like a tire provides the cushioning effect in a new automobile shock absorber.

An English experimenter claims to have made artificial rubber from the ordinary garden variety of kidney beans.

To prevent damage a new automobile attachment shuts off the gasoline and stops the car should the oil supply.

French radio experimenters have found that it is possible to use a stream of salt water as a transmitting aerial.

A two piece automobile tire rim has been invented that is said to eliminate all bolts, screws, hinges and rivets.

Night telephone service has been established between London and Berlin, Bremen, Hamburg, Cologne and Frankfurt.

To lengthen the life of rubber overshoes detachable heels that can be used to replace worn ones have been patented.

Mines in Turkey that produce about 250 metric tons of meerschaum annually are the chief sources of the world's supply.

A machine to dry a bottle, a wringer has been invented to remove the excess shoe dressing from a swab as it is withdrawn.

Japanese have invented apparatus with which flash light powder can be burned under water to enable photographs to be made.

A recently invented paste that is claimed to be as strong in adhesive qualities as the best glue is perfectly transparent.

According to an English scientist modern men eat from three to four times as much food daily as their Stone Age ancestors.

An oil cleaning system for small automobiles has been invented that can be operated without removing any parts from a car.

South Africa's longest telephone line has been placed in service between Cape Town and Johannesburg, about 1000 miles apart.

Net with which sea fish can be scooped from schools and carried by belt conveyors to deck of steam vessels have been invented.

The government of Russia has decided to enforce an edict requiring the use of the metric system of weights and measures next year.

To protect banks against forgery a double camera has been designed to photograph a depositor and his signature at the same instant.

For training purposes an airplane motor having five cylinders and developing only 50 horsepower has been designed in Czechoslovakia.

Made so that it can be folded and carried as baggage, a novel screen can be set up to form a closet, or to shut off a portion of a room.

According to a French scientist the birth rate of the largest 26 cities in the world is about two thirds greater than their death rate.

Resembling handcuffs, a new lock to be fastened to an automobile steering wheel prevents a car being moved more than a short distance.

By subjecting opals to currents of air from electric fans an English gem expert claims to harden them to facilitate cutting and polishing.

For the use of surgeons and dentists a Philadelphia inventor has mounted an electric lamp and reflector on the nose piece of spectacles to cast light along the line of sight instead of at an angle.

To keep an umbrella when raised joyful with the carrier over, a person's head a Frenchman has designed.

Remove Corns By Hot Water

You can stop that corn or callous from acting in a minute or two. You do it in this way: Drop a little Putnam's Painless Corn Extract over the tender surface of the corn or callous and the pain stops at once. Just a few more applications, and then, after a hot foot bath the corn drops out. Can anything be simpler? You obtain certain results with Putnam's Painless Corn Extract. Note the name. It costs little and gives glorious results. Sold by all druggists.

### Plant Lice Live All Winter

The most persistent pest in the garden is the plant louse or aphid. You can't start after them too early for they live all winter and stand below zero weather, ready to thaw out and start action with the first breath of spring. Clean up all dead stalks of plants known to have been infested last summer and burn them.

Although the most prevalent, plant lice are most easily controlled, and there is no good excuse for having them in quantity. If you have them at all you will have them wholesale. Nicotine compounds in the form of spray or dust are sure death to these intruders. A spray is necessary and tobacco tea made from cheap cigars or cigar clippings is effective. Nicotine commercial forms, of which Black Leaf 40 is a standard, is a convenient form, a small portion mixed with water according to directions slaying lice wholesale.

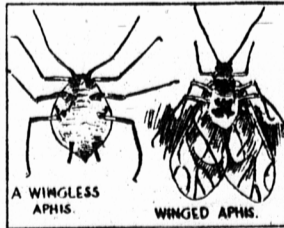

There are some 200 odd different kinds of plant lice ranging in color from the common green to black through reds and browns. Their life history is interesting. Female aphids hatch in spring from eggs laid in autumn. Some females hold over and lay a new crop in the spring. These spring hatches are females without wings which soon mature and give birth to females like themselves instead of eggs. They all soon grow up and produce generation after generation.

Then comes a strange change late in the season. A generation of winged aphids appear. Earlier in the year they are wingless and can't move far. The winged lot proceed to distribute themselves to other feeding grounds and raise new tribes.

Late in the fall a final generation of small males and females appear and this generation lay the eggs to hatch in spring and some of them live over winter if they haven't completed their task.

At the first sign of a plant louse get out the spray gun and the tobacco compound. Stop them in their tracks, for the rabbit is as nothing from a breeding standpoint compared with the aphid.

The new compound which is said to convert leaves and straw into stable manure in three months has reached the American market. It was invented by the great English experimenter at Rothamstead and is worth a trial.

## Serve You Better and Save You Money

We have the tires and the tubes that are delivering thousands of extra miles—

FIRESTONE GUM-DIPPED TIRES

Every fibre of every cord is saturated and insulated with rubber.

Used by the operators of the biggest taxicab, motorbus and truck fleets. These big buyers measure mileage and demand Most Miles Per Dollar.

FIRESTONE STEAM-WELDED TUBES

Steam-Welding vulcanizes the splice in live steam—a special Firestone process—assuring an air-tight tube so important to the life of your tire.

You, too, can get the extra mileage, economy and comfort now enjoyed by the big transportation leaders and hundreds of thousands of satisfied motorists, by equipping your car with these wonderful Gum-Dipped and Steam-Welded Tubes.

Firestone Tires and Tubes have made a name for themselves. Compare these tires and tubes with any others on the market.

## FIRESTONE BUILDS THE ONLY GUM-DIPPED COR

ned one with the handle at an angle to the frame.

The United States produces more than 93 per cent of the dyes it consumes and its supremacy in the industry in a few years is predicted by experts.

A mowing machine that can be operated to a depth of seven feet when mounted on a motorboat has been invented in England to remove weeds from streams.

A wall bracket for electric flat irons has been invented that switches current into them when they are lifted and turns it off when they are replaced.

Of German invention is an electrically operated device that enables a musician to turn the pages of music without taking his hands off his instrument.

Currents of air warmed to any desired temperature can be circulated by a new electric fan in which an adjustable heating element has been incorporated.

An Austrian scientist has developed a form of glass for spectacles used by dyers and textile experts to enable them to determine the true shades of delicate colors, regardless of surrounding light.

According to a Chicago health expert the average length of human life in cities could be extended seven years if unnecessary noises could be eliminated.

Of Swiss invention is a quadruple tariff electricity meter that settles current at different prices at different hours of the day.

An automatic water softener that has been invented for home use does its work with a chemical solution that afterwards is counteracted with a solution of salt.

According to an Irish university scientist the earth is growing warmer at a rate that will cause the crust to liquefy in from 30,000,000 to 50,000,000 years.

For attaching metal roofing nails have been invented with soft heads that can be hammered to seal the holes they make and prevent water entering to rust the metal.

Belgian engineers have made a detailed hydrographic study of the Congo river basin in Africa with a view to the eventual construction of large power plants on that stream.

Governed by the flow of lubricating oil, an automatic lock has been invented that closes to prevent theft when a driver stops his automobile or at a set interval afterwards.

Should an English inventor's lifeboat overturn its occupants could remain afloat by grasping rods along its keel and standing on boards that would swing out from its sides.

The British Minister of Health has promulgated a number of regulations effective after the end of this year, restricting the importation into the United Kingdom of

The man with the HOE says—

Make succession sowing of beets, lettuce, late peas, beans, and radishes this week.

Save a few gladiolus bulbs, those that have the shortest sprouts, for mid-June planting.

Late May and early June are busy transplanting times in the well-organized vegetable garden. Celery, peppers, egg-plants, tomatoes, onions and leeks all can be on the move now from frame and seeded to the garden.

A combination of lime and sulphur dusted over cucumbers, melons, and squashes every ten days steers the bugs elsewhere effectively. It is easy to prepare and handle. Use hydrated lime.

In transplanting any of the onion tribe, snip off half the leaves.

Scatter pulverized sheep manure over your flower beds as the June perennials come into bloom. It will show in the extra size and vigor of the plants.

Use this same dust on cabbage plants and start as soon as the seedlings make two leaves. They are big enough for a young cabbage worm's roots and breakfast.

Stake the tomatoes when you set them out. They can go in until the middle of June.

Try some of the new strains of delphiniums. Seed is now on the market and many dealers sell fresh seed in midsummer, which germinates much more readily than last year's crop.

Give the big fruiting peppers plenty of room. Expert growers allow them two and a half feet in the row. Give them plenty of water. They are hot and thirsty.

Get in dahlias plants any time this month. Growing plants now on sale are even better than the tubers.

Food containing certain preservatives.

To speed up transportation the governments of Australia and several of its states plan to spend \$15,000,000 to unify the gauges of some of the railways.

For the use of persons playing games at tables a cigarette holder has been designed that resembles and is almost as long as a walking stick.
