WEDNESDAY, JANUARY 20, 1943.

Rationing Policy In Food

According to the News-Review a U.S.-Canadian accord on food supply is highly important. There are worse shortages of many foods, in many areas of the U.S., than have yet developed anywhere in Canada.

Butter, for example, is used per capita in Canada, in normal times, 50% more than in the U.S. Other domestic consumption of fats is less in Canada than in the U.S.

Equal distribution of present butter supplies would increase average per capita use in U.S. from sixteen to seventeen pounds; reduce Canadian consumption from twenty-six to seventeen.

Food rationing in Canada will, in consequence, be speeded up—perhaps beyond the needs of our local condition, and against the wishes of the Canadian Government.

Three Vacancies

Three constituencies are now without representation in Parliament, — Humboldt, Saskatchewan; Selkirk, Manitoba; and Cartier, Montreal. In the general election of 1940 all three were carried by the Government, the Liberal majority in Humboldt being 1,272; in Selkirk 4,154; in Cartier 15,837.

The 1940 official returns gave the following results: Humboldt, Lib. 8,808; C.C.F., 7,536; Selkirk, Lib. 11,023; C.C.F. 6,869; Con. 3,890; Cartier, Lib. 18,191, Nationalist-Labor 2,354.

Science Is Winning

Scientists and technicians who are working on the problem say that the battle for rubber, to obtain artificial substitutes that are as good as the natural product, is slowly being won.

The experts also agree that the synthetic products will be much better than natural rubber, will have a longer life and prove more satisfactory in every way. As long ago as 1938 one prominent manufacturer in the United States succeeded in turning out synthetic tires with treads which gave a longer wear than could be got from the best of natural rubber.

esting and also gave encouragement to laboratory workers in their more recent researches. It is estimated that once the plants have been established to produce synthetic rubber in quantities to serve consumption, the advantages of the artificial commodity will be readily seen.

EDITORIAL NOTES

January is the month of congregational meetings when the rank-and-file meet to review the past and lay financial plans for the future.

It is interesting to note that in the manslaughter case while the accused Indian has retained Mr. J. J. Johnston, K. C., assisted by Mr. Lester O'Donnell to defend him, the Federal Government has retained Mr. George J. Tweedy, K. C. as well.

In New London they have an active go-ahead Presbyterian minister, Rev. H. M. Buntain, B.A. greatly interested in the young. Recently he has formed a Boy Scout Troop, all unaided except by advice from local headquarters.

The first English Parliament met this date, 1269, and included the archbishops, bishops, abbots, earls and greater barons together with tenants-in-chief under the Crown.

Canada has some 82 rivers of more than 800 miles in length, but of these, the Columbia, the Kootenay and the Yukon are only partly in Canada.

There should be not a few vacancies in Government departments soon as the result of the publication of a treasury board interpretation of a cabinet order.

On January 8th, the Hamilton Spectator carried a 7-column ad of the store of A. M. Souter & Co., Ltd., which is so courageous and intelligent, that we pass the idea to our own business men, and quote excerpts from the copy.

Under fuel rationing it is estimated the average Japanese will be able to heat his home for 28 hours this winter. The main object in respect to make full use of the stuff that comes out of their radios.

A McGill Professor, Dr. A. S. Lamb, has been getting after the bureaucrats at Ottawa, those of the National Health Department in particular.

Is there an election in the offing? The semi-official voice of the Winnipeg Free Press says "No." The Free Press holds that there exists no present need of a dissolution and an appeal to the people.

When the war ends the problem of the exiles will be infinitely greater than when it began. There are millions of homeless people, now where there were thousands after the other war.

The British Army Signals School have found the best background training for their officers is to have a dance band leader or a coal miner.

Notes By The Way

Because no one, in future, will be sent around to wake them up, engine drivers on the railway have gone on strike.

Don't overlook Guerrilla Leader Gen. Draja Mihailovich of Yugoslavia, who, as they say, really is going to town in his irregular military operations against the Nazis.

Sentence, passed on drivers convicted of operating motor cars, when drunk, are usually ridiculously light. In a case of fact there is no excuse for a motorist being found in that condition.

Who said the Eskimo was a poor untutored savage? He has enough to eat, a place to sleep, never gets up before noon, punches no time clock, drives no car, has no income tax, wears no clothes, and has no bills.

Since United States made the move, there is talk about canned goods rationing in Canada. Among other things could apply to canned music.

Canada has some 82 rivers of more than 800 miles in length, but of these, the Columbia, the Kootenay and the Yukon are only partly in Canada.

Under fuel rationing it is estimated the average Japanese will be able to heat his home for 28 hours this winter.

Those Canadians who included matches or "loaded" cigarette lighters in their parcels for friends or relatives in the armed forces overseas must be very wise indeed.

Not the least of the advantages of enlisting youths at the age of 17 is the time allowed for all the preliminary training. Boys who sign up at this age are offered unusual opportunities for advancement.

PUBLIC FORUM

This column is open for the discussion by correspondents of the various subjects of interest to the Charlottetown Guardian and does not necessarily endorse the opinions of correspondents.

ATTRACTIONS FOR SPORTSMEN

Sir,—Travelling about the Province and discussing the various attributes of this the smallest province of the Dominion with residence and many tourists there seems to be a lack of general knowledge pertaining to sports that could be indulged in with pleasure for the different seasons of the year.

Some short writings have appeared in the local papers of hunters from other provinces enjoying our "winter months" to map out the native conditions of the province from the other provinces and our own neighbors to the south.

Leningrad

(By Carl C. Cranmer)
Associated Press Staff Writer

Leningrad, second largest city of the Soviet Union, reputedly was built on human bones.

There are many stone bones there now after a siege which certainly is one of the greatest in history.

Since Aug. 21, 1941, its 3,000,000 people—the normal population and its thousands of Red Army soldiers and workers defenders have endured conditions of unimaginable privation and the terror of almost daily shelling and bombing.

Named for Nikolai Lenin, father of the Soviet Union, Leningrad came under attack from virtually all sides nearly a year and five months ago when Hitler's armies drove to Schlussemburg, 20 miles east of the city on Lake Ladoga, and completed the ring from the south.

From then on the city's huge working population endured the terror and dangers of the front trenches.

The siege has been most incompletely documented. Perhaps some Russian Homer now will tell the story. But while the siege lasted the Russians never wshed the Germans to know of true conditions.

From the Axis camp came an opposite propaganda picture of dead littered the streets, the people were reduced to gnawing the bark from trees, emaciated and starving creatures stalked the parks.

Months after the siege had begun the Russians said they were still getting aluminum for their airplane plants from Leningrad's big aluminum plant.

Its factories continued to pour smoke into the sky as they busily produced the munitions of war, the Russians said.

The city originally was St. Petersburg because it was founded in 1703 by Peter the Great who had it built on piles in the marshes at the mouth of the Neva River.

It gained its reputation as a city constructed on bones because so many laborers died during its building.

Pre-War Strength Of Warring Powers
(Sydney Post-Record)
The Office of War Information at Washington has prepared and published a statement supported by statistics showing that the armed strength of which are now the United Nations was overwhelming.

When Hitler set out to conquer Europe in 1939, this report says, trained manpower in the armies and reserves of the United Nations was double that of the Axis.

The respective totals were 39,318,350 men against 16,650,000. The naval strength of the United Nations was also nearly twice as great—1,173 warships of the five principal categories against 626 for the Axis.

By its example and future policies it might make a very significant contribution to the framing of a better peace than the world has ever known before.

WAR DAMAGE

is not covered by ordinary Fire Insurance Policies. For compensation against property loss, arising from enemy action or from explosions of munitions, you need special insurance under the Dominion Government's scheme.

WAR RISK INSURANCE

is a sound precaution right now. The time and place of enemy action is unpredictable. No Country can count on immunity. The Dominion scheme provides compensation for property which is damaged—it might be yours.
