LOCAL TREATMENT FOR WOMEN'S DISORDERS
 The health we enjoy depends very largely upon how the blood circulates in our bodies; in other words, if we have perfect circulation we have perfect health. There is a constant wearing out of the tissues in every part of the body. The blood flowing through the veins carries off the waste or dead matter, while the blood coming from the heart through the arteries brings the fresh new living tissue, the essence of the food we have digested, to replace what has been carried off. This constant wearing out and expelling of the dead matter and the replacing of it with new matter is a process that goes on day and night, until in about 7 years a complete change has been effected. Thus every man and woman has an entirely different body in composition at the end of 7 years from what he or she had 7 years before.
 It sometimes happens, however, from a variety of causes, that the blood becomes congested in certain portions of the body. The congested tissue, and the circulation in these parts become weakened, and the circulation in that section of the body becomes sluggish and stagnant. The consequence is that the dead matter in that part of the body is only partially carried away, and that but little of the new, vital matter is introduced there to build up and strengthen the tissues and nerves.
 This condition invariably exists in all cases of female disorders. The dead matter retained in the circulation, which should have been expelled, causes irritation and inflammation of the delicate membranes, and the cause of the nervous and mental suffering which accompanies female troubles.
 The above explanation will also show why ORANGE LILY is so successful in curing this condition. It is a local treatment, and the curative elements are absorbed into the affected parts of the body, and the congested tissue, and from the very start the dead matter begins to be discharged. A feeling of immense relief, both mental and physical, is experienced, and the case is brought to a greater or less extent, and in some cases it is so marked as to be amazing. The case described in the following letter is always present and positive. This feature of the expelling of the dead matter is a greater or less extent, and in some cases it is so marked as to be amazing. The case described in the following letter is always present and positive.
Dr. Conroy: I am thankful to Mrs. F. E. Currah, Canadian representative, for my health restored by your wonderful remedy. I have suffered for 17 years, but not so bad until 3 years ago. Then I had a doctor, who told me I had a tumor, and could live no more than a year. If I went through an operation I would not live through it. A year later I sent for him again, and he gave me up. I did not die. My husband then sent for another doctor, who performed an operation, and it did me much good. I doctored with him for 4 months, but became so bad again that I thought I could live no longer, and I began to long to die. One day my husband came home and threw a slip of paper to me with Mrs. Currah's address and told me a lady had advised him to write her for a treatment that would cure me. I said it was too late, that I would die anyway. I could not lift a teaspoon without hurting me. Then the first doctor told me I was worse than ever. However, my husband sent for ORANGE LILY, and the bits of treatment brought away one tumor. Others followed, until 7 tumors had been expelled, 3 large ones and 4 small ones. I know if it had not been for ORANGE LILY I would have died, for I could not live much longer. I would have thought it cheap at one hundred dollars for a month's treatment, instead of one dollar. It is worth its weight in gold.—MRS. GEO. LEWIS, Huntsville, Ont.
 The above letter is published with the Lewis' permission. All letters received are treated as being sacredly confidential, but occasionally some patient feels so grateful for being cured that she is willing to make the matter known for the benefit and encouragement of her suffering sisters.
ORANGE LILY is a positive, scientific remedy for all disorders of the female functions. As explained above these troubles are of local origin, and require local treatment. It is just as reasonable to take medicine locally for female troubles as it would be to take medicine internally for a bruise, a boil or an ulcerated tooth. In all these cases some dead matter is being retained, and the cure is effected by employing local methods for expelling the dead matter. ORANGE LILY has antiseptic, soothing and healing properties, and also tones up and fortifies the system, and restores the nerves. I am so anxious that every suffering woman may satisfy herself, without cost to her, that ORANGE LILY will cure her, that I hereby make the following
