TWO KEGS OF RUM FOUND—The R. C. M. P. found two kegs of rum hidden in the ditch along the side of the Linkletter Road on Thursday afternoon. So far they have not located the owner.—S

BEDEQUE BAPTIST CHURCH—Rev. A. G. Crowe, Pastor, June 19, 10.45 a. m. Subject, "Some Realities We Forget"; 11.45 a. m. Sunday School; 7.30 p. m. Subject, "Causes, Results and Remedy of Depression."

CARD PARTY—A most enjoyable card party was held in St. Paul's Hall, Summerside, on Thursday evening for the St. Paul's troupe of Boy Scouts. There were ten tables of Bridge and eleven of Whist. The prize winners for Bridge were Miss Elizabeth McNeill and Mr. J. P. Hogan. For Whist Mrs. Peter Blanchard and Mr. J. E. Dalton. A beautiful crochet cushion donated by Mrs. James McNeill was drawn for and won by Mr. Harry Wedge. The sum realized for the boys was in the vicinity of \$35.—S

DIPLOMAS PRESENTED—Miss Jean Browne, National Superintendent of the Junior Red Cross for Canada visited Summerside High School on Thursday afternoon and presented diplomas to six of the class rooms for five successive years membership in the Junior Red Cross. She also addressed the children on Red Cross work and congratulated Prince Edward Island as having made the most advance in membership this year. Each class room gave a demonstration of Red Cross work and a little Red Cross play. Recitations and songs made the affair quite entertaining. Miss McLean, Provincial Director, and Miss Gladys Holman, vice president of the organization here accompanied Miss Browne. An address of welcome and presentation of flowers was made by Miss Betty White to Miss Browne. The visitors were the guests of Mrs. R. T. Holman during their stay.—S

PERSONALS

Mr. Wilfred Tanton, of Alberton was a visitor to Summerside on Thursday.—S

Mr. Roy Hayes of Tyne Valley, was in Summerside on Thursday visiting friends.—S

Miss Norma Callbeck, who has been attending the Halifax Ladies' College, arrived home on Thursday evening to spend the summer vacation with her parents, Mr. and Mrs. Walter Callbeck.—S

The Value Of Our Wild Life Resources

Honourable Thomas G. Murphy, Minister of the Interior, Stresses Value of Canada's Game Animals at Provincial-Dominion Conference

The tremendous value to Canada of her resources in wild life was stressed by Hon. Thomas G. Murphy, Minister of the Interior, in his opening address at the Provincial-Dominion Game Conference which was held recently in Ottawa. He stated that the Dominion's annual income from wild life had been estimated at \$35,000,000, and that to many people, especially the Indians and Eskimos, the wild life was their only means of livelihood.

Mr. Murphy, under whose Department the administration of the Migratory Birds Convention Act comes, prefaced his remarks with an outline of the important work before the Conference. He drew attention to the fact that the Act applied to insectivorous birds, which are among man's greatest friends, as well as to game birds, a point of great importance. The habits of these deserved study, as well as those of game birds, to secure information to guide those administering the Act. Pioneer plainmen could not believe that the buffalo would in such a short time become practically extinct in their wild state, nor could residents of Canada and the United States conceive that the wood pigeon, which once flocked in countless numbers, would completely vanish from the earth.

The annual national income from wild life had been estimated at \$35,000,000. This would embrace the worth of pelts and carcasses sold, the value of the trade in fire-arms and ammunition, in supplies for hunters and sportsmen, and their transportation, guides, and accommodation. Wild life was very important in other ways. To many of the people of Canada, especially to Indians and Eskimos, wild life was the only means of livelihood. There was the aesthetic value, the joy and delight which the songs and the plumage of birds and the study of their habits afforded millions of citizens. And there was the sports value of game animals and birds, a feature with which they as game officers were particularly concerned.

Reports received at Ottawa in the past year showed that this was a time of crisis in regard to water-fowl. The drying up of the marsh areas in southern Manitoba and Saskatchewan and in northern Alberta, which were the breeding grounds of the wild duck, had seriously decreased the supply of ducks over the greater part of Canada and the United States. This situation suggested the need of regulation and control. If ducks were not to disappear like the wood pigeon.

No better plan to protect birds

Hectic Record Marked Opening Of Lachine Ry.

MONTREAL, June 16.—(By The Canadian Press)—Eighty-six years ago this month the Montreal and Lachine Railroad, one of the first to exist in Canada, was incorporated and the work of building the road had started. The line was completed in 1847 and in that year a speed record was set up by an engine imported from Scotland.

Captain Melville Miller, of Toronto, grandson of Alexander Miller, the engineer of the train, has in his possession and interesting account of the first test trips from Montreal to Lachine and return as related by Mr. Kilmond, of Dundee, one of the contractors of the line. "There were three cars hitched to the locomotive when the first runs were made," it runs. "The directors of the company were on board. There were also three American engineers who wanted to see what a Scotch locomotive could do. We started. The directors were tossed from one side to the other and their high hats threatened to go through the ceiling of the car. I was very anxious and Miller would not listen to anyone. One of the managers for my uncle was on board and a sudden pitch of the car sent his hat and head through the roof of the car. He was unhurt and in 11 minutes we were at Lachine.

The directors were furious and were half dead with fright. They made Miller promise that he would travel more slowly on the return trip. He promised but gave a wink and when I tried to climb into the engine cab with him he told me there was not enough room. He added that people wanted to see what a Scotch locomotive would do and that he would show them. He advised me to climb into the last car saying that if anyone would break his neck it would be he.

We left Lachine and were in Montreal in nine minutes. The directors were doubly angry and the president told me Miller would be dismissed the next day. I made no answer as I had no authority. Fortunately they did not discharge Sandy Miller, but instead made him general manager."

THE LOWLY HOG DOES ITS BIT FOR SCIENCE

(Experimental Farms Note) Of what particular value are hogs except to produce our ham and bacon? Why are they experimented upon, and why is such care taken in the procuring of accurate experimental data? The answer to these and other questions may be derived and a greater and clearer realization of the importance of the swine industry ascertained by a visit to the Central Experimental Farm and a survey of the work being carried on there by the Animal Husbandry Division.

Experts in livestock are not only guiding the work in the production of swine, but are producing more and cheaper pork. From their experience gained in actual experimentation, they are enabled to advise the farmers throughout Canada how to make the same equivalent savings. The swine herd consists of purebred Yorkshires and Berkshires. By the introduction of new sires from time to time, supplemented with rigid selections and culling, a herd of high standard has been developed. From this herd, breeding stock is disseminated to other Experimental Farms throughout Canada and to the swine breeders and farmers of Eastern Canada. Experimental and research studies absorb a large percentage of the pigs raised. Work is being carried

Father—What did the teacher say when she heard you swear? Tommy—She asked me where I learned it. Father—What did you tell her? Tommy—I didn't want to give you away, pa, so I blamed it on the parrot.

Mr. James Pendergast, Kensington, was sworn in yesterday as Coroner for Prince County by Magistrate J. F. Proffitt, Kensington.

Mummy, Jack and I found a purse with ten shillings in it. "I hope you were honest about it." "Yes, we shared it fairly."—All for Alla, Stockholm.

A—Do you know your wife is telling everyone you can't keep her in clothes? B—That's nothing. I bought her a home and I can't keep her in that either.
