Annual Meeting Of The Trinity United Church

The annual congregational meeting of Trinity United Church was held last night in Hearts Hall and, notwithstanding that the weather was not favorable, there was a good attendance. The meeting was opened by short devotional services by Rev. Dr. Ramsey, after which Mr. R. H. Dwyer was appointed chairman and Professor Steel and John P. Moore as joint secretaries. The first item was the presentation of the Report of Session, which was read by the Clerk, Professor Steel, showing a total of 675 families in the congregation, being a net increase of 25 over the previous year. The number of persons under pastoral charge is 2625—the total number of communicants on the roll being a net increase of 36 for the year. Of the above total there are 79 on the active list. The report of the treasurer showed the receipts by the Board of Stewards as the largest in the history of the congregation amounting to \$12,464.81 and after payment of all outstanding bills, which included some extraordinary expenditures, there was a satisfactory balance on hand. From the report of the Missionary and Maintenance Fund, which was presented to Dr. Ayers, it was learned that the full allotment of the church, namely, \$6225.00 had been met and remitted to Toronto and in addition there was already paid the amount of \$630.48 towards the "Appeal Extraordinary", which was made by the Moderator on behalf of stricken districts in the Province of Saskatchewan. The Reports of the different Societies showed that much excellent work had been accomplished during the year 1931 and that every branch of activity was under capable leadership who are looking forward to continued progress during the present year.

A Statistical Committee was appointed and, after going through the reports as handed in, found that the total amount received from all sources during the year was \$24,866.85. This does not include three legacies received by the Trustees—from Estate W. A. Weeks \$300.00, from Estate John L. Godkin \$200.00, from Estate C. B. Ohappell \$100.00. The total of invested funds now held by the Trustees is \$8467.23. The extraordinary payments included repairs to the Church Organ \$4,566.57, painting and renovating interior of church \$698.75. The Women's Missionary Society showed receipts of \$1093.08, which included a subscription of \$100.00 by Miss Stamer in memory of her sisters and which will be applied to the relief of suffering women in our Hospitals in China. The Dorcas Society reported 465 visits made "assisting the needy, visiting the sick and shut-ins also the new members." Not only has the church enjoyed many material benefits but from the reports of the Ministers the spiritual life is in a satisfactory condition. Peace and harmony prevail and a hearty response is given by the people to the Pastors. Votes of thanks were extended to the workers, the Pastors, the choir and organist and to the janitor Mr. Storey. A resolution of sympathy and appreciation to Mr. James Paton absent through illness was passed and ordered to be sent to Mr. Paton by the Secretary. The sum of \$40.00 was voted towards the upkeep of the Old Protestant Cemetery on Elm Avenue for this year.

DELEGATES TO MEETING—Mr. James A. Pendergast and Mr. James A. Proffitt were present at the annual meeting of the Dairy-men's Association held in Prince of Wales College yesterday as delegates for Kensington.

THE ROTARY CLUB will hold an auction bridge, dance and buffet lunch at the Canadian National Hotel February 2. Dancing from 9 p.m. to 1 a.m. Lancers and old time dancing the first hour. Bridge 10 to 11.30. Tickets \$1.50 each from any Rotarian or at the Canadian National Telegraph Office. 349-1-28-31

SERIOUS ACCIDENT—Artemas Coles, Milton, an aged Falconwood patient temporarily placed in Queen's County Jail, was severely burned when his mattress caught fire in the jail cell last night. The patient was removed to the Charlottetown Hospital where his condition at a late hour last night was reported to be very serious. How the fire started is not known, as no matches were permitted to be used by patients.

SOCIAL EVENING—Under the shades of one of the best decorated halls in the city assembled two hundred people to enjoy the best social evening ever put on by the B. I. S. The auction forty five consisting of thirty five tables was greatly enjoyed. The prize winners were: Ladies, first, Mrs. Augustus Dowling, second, Mrs. E. J. Ryan, Gentlemen first, Mr. Lawrence Tra'nor, second, Mr. John Dowling, Lucky table, Mrs. Peter J. Morrison. At the conclusion of the card game, the Leap Year dance was opened up and proved to be without a doubt one of the most successful dances of the season.

Mr. and Mrs. M. G. McNeely left yesterday morning on an extended trip to Montreal, Toronto and New York.

IN MEMORIAM

In loving memory of my dear Mother, Mrs. John T. Murphy, who departed this life January 28th, 1929.

Today brings back sad memories of a loved mother called away. God only knows how we miss her. As we journey along life's way.

The lips we loved to kiss are stilled. The hands we loved to clasp are cold. The trial was hard; we'll not complain. But trust in God to meet again.

Inserted by her Daughter Mrs. Thomas Deignan, 444-68 St., Brooklyn, N. Y. 312-1-27-11.

PORTLAND, Eng., Jan. 27—(A. P.)—Small buff-colored envelopes, like those from Flanders Fields in the Great War, came to the families of the men of the submarine M-2 today. Inside them were small sheets of brown paper telegrams. Across these were stripes of tape reading: "We regret to inform you that your husband (or son) is missing and feared drowned in the submarine M-2, believed off Portland on Tuesday."

Tonight some of the relatives were still gathered on Portland and Weymouth docks, peering into the darkness. One woman had her two children aged 4 and 8, and they were tugging at her hands to come home without realization of the

BURNS' CONCERT—The second performance of the Burns Anniversary Concert was given last night at the Prince Edward Theatre before another appreciative audience. A new feature was a bagpipe duet by Harold Sutherland and John Nicholson, the latter young man being a newcomer to Charlottetown and formerly associated with Harold in the Military Band at Westville, N. S. The tenor and alto parts in the duet could plainly be distinguished and harmonized most agreeably. Mr. Campbell sang a new selection of Scottish songs, which enhanced the favorable impression of his first evening's performance. The local entertainers also gave a splendid performance and received enthusiastic applause.

LITTLE HOPE

Continued from page 1

would be brought up alive, but he added that much depended on whether the M-2 had been damaged and filled with water. If her hull is whole, he said, there might be enough air to keep the men alive for a few hours more.

Over in France an Admiralty officer man was waiting for the Captain of a coasting steamer to come in. It was reported the captain had seen the M-2 go down stern first while she was exercising alone in the Channel.

Here in Portland the wives of the crew just about gave up hope when they received telegrams from the skipper of the Dolphin, mothership of the M-2 saying he was afraid the submarine crew was lost.

They had waited for hours in the fog and rain, crowding the waterfront to watch the salvage vessels, but when night fell they went back to their homes. The wife of the top stoker is the mother of a three days old babe.

All day long there were the rumors which always arise at times like this. They raised hopes for awhile, but all of them proved false. Once it was reported the submarine had been located in seventeen fathoms, far enough away from the treacherous Portland current to make the salvage work fairly easy. One newspaper even said there had been tapping on the hull, but the Admiralty office said there was no truth in it. Then the word went around that a navy plane had spotted a large patch of oil on the water. It turned out to be only mud raised up from the bottom by the drags.

The M-2 was supposed to be a good diver and she carried a small seaplane. Her communication devices were the last work, and it seemed ominous that with this equipment she was unable to signal to the surface craft. Naval officials were at a loss to explain what happened to the M-2. Something may have gone wrong with her machinery and the boat settled to the bottom for repairs. It was reasoned, however, that if the men were still alive there would have been signals. There may have been an explosion or the vessel may have struck some submerged object, but in such circumstances there are usually tell-tale bubbles of oil on the surface. If the men were alive, presumably one or more of them would have used the escape apparatus by means of which a man is shoved through a hatch and shot to the surface. But perhaps the boat struck a submerged object and turned over, in which case the hatches would be jammed shut, though it still would be possible to signal.

Ordinarily the air supply in a ship like the M-2 is enough to last 48 to 56 hours. That period will expire sometime between 10.30 a.m. and 6.30 p.m. tomorrow, and until then there still will be some faint hope that the crew is alive.

SAD NEWS

PORTLAND, Eng., Jan. 27—(A. P.)—Small buff-colored envelopes, like those from Flanders Fields in the Great War, came to the families of the men of the submarine M-2 today. Inside them were small sheets of brown paper telegrams. Across these were stripes of tape reading: "We regret to inform you that your husband (or son) is missing and feared drowned in the submarine M-2, believed off Portland on Tuesday."

Tonight some of the relatives were still gathered on Portland and Weymouth docks, peering into the darkness. One woman had her two children aged 4 and 8, and they were tugging at her hands to come home without realization of the

DAIRYMEN

Continued from page 1

Whereas, your committee believes that because of the decline in the dairy industry in this Province, matters pertaining to it should be thoroughly investigated. And whereas your committee believes a survey should be made for the purpose of devising ways for more efficient promotion of the industry and the efficient functioning of the Association. And whereas the matter of butter production, better marketing, better publicity and the revision of the Constitution and By-laws should receive consideration.

Therefore, be it resolved that a committee consisting of Mr. B. R. Brown, of Queen's County, Mr. Robt. Doucette of Prince County, Mr. J. A. Dewar, of King's County, the Dairy Superintendent and Mr. W. J. Monaghan, advertising counsel, of Charlottetown, be appointed to make a thorough survey of the various phases of the industry and submit a full report at the next annual meeting.

Resolved that we extend our appreciation of the faithful services given by our Dairy Superintendent, Mr. Brenton.

Also resolved that we record our thanks to the various speakers taking part in this convention.

A motion was carried to the effect that \$15 be given as the contribution of this Province toward a gift to Mr. J. A. Ruddleick

Mr. W. J. Gibson, Marshfield, read an address prepared by Mr. F. E. M. Robinson, of Richmond, Quebec, President of the National Dairy Council of Canada, in which the work of the Dairy Council and the problems facing the industry during the coming season were comprehensively reviewed.

A large increase in the making of butter last year was mentioned in Mr. Robinson's address. Although figures aren't yet available, it is estimated the increase will be more than 30,000,000 lbs., over 1931. The make of cheese has held nearly the same. Grading of cheese has been of great value in improving quality and Canadian cheese now holds a high place in the British market. Exports of cheese exceeded the previous year and exports of butter were the highest since 1926.

The assessments were taken up and \$1,200 voted for expenses for the coming year.

The matter of grant to the National Dairy Council was brought up. Mr. Gibson was impressed with the value of the work of this organization. He was supported by the President and Secretary. Mr. Brenton believed that \$200 would be a reasonable amount from this Province compared with \$600 from N. S. Accordingly, \$200 was voted for this purpose.

Mr. Brenton then distributed prizes to creameries for neatness and cleanliness as follows: Creameries; Westley Glenning, O'Leary; Amos Hubley, Perfection Dairy, Summerside; and C. M. Johnson, Bedeque, (also winner last year). Cheese Factory: H. J. McCormack, Dundas, (also winner last year).

Addresses

Hon. G. Sheffton Sharp, Minister of Agriculture, on behalf of the Provincial Government, welcomed the Dairymen's Association. Mr. Sharp voiced the opinion that 1932 would see a change for the better in the depression. However, the Maritimes have not been as badly hit as other places, owing to our variety of industries and a certain amount of local market. We are realizing, Mr. Sharp said, that specializing in certain crops is perhaps not the best method in these hard times. We have a great many breeders of high grade live stock which will tend to increase production.

Mr. Sharp referred to the Royal Winter Fair at which he had the pleasure of announcing the Maritime herds as they entered the judging ring. He stated the Maritime tragedy in their midst. The wife of one of the stokers confided to her friends that her husband had expressed forboding when he rejoined the craft Monday. The wife and mother of a telegrapher experienced a dream the other night that he was drowned at sea.

REALIZED DANGER

LONDON, Jan. 27 — (A. P.) — Lieutenant Commander J. E. Musenden Leaths, commander of the missing submarine M-2, realized his life beneath the surface of the sea was fraught with danger.

Major Cateret De Musenden Leaths, of Manchester, an uncle said his nephew, who had a wife and family, told him upon returning from Malta recently that people never knew what they had to go through when they went down in a submarine.

He said he had the greatest confidence in his ship, but he realized there were dangers in even the best submarines.

times received much publicity there as their herds compared favourably with those from all over the Dominion. He closed by stressing the need of co-operation in furthering the particular line of work we are in.

Mr. J. Walter Jones, M. B., interestingly commented on the various depressions of the last hundred years, ending with the present one begun in 1929 by over-speculation. The other elements of speculation, he pointed out, have not taken the brunt of depression periods as has the farmer.

Just before the last depression in 1893, the cheese factories were being established in this Province and it was carried through that depression by the dairy industry. The movement went on until some 48 factories were in operation. Today co-operation on a large scale should be carried out and Mr. Jones believed a county would be small enough division for each factory.

The dairy industry has increased from 15% to 20% of a farm income during the past few years and despite that other items of income have decreased, dairying has increased.

Suggests Grain Feed

Mr. Jones believed that grain, which is not now a marketable product might be put to good use, as feed for dairy cattle.

He also enumerated the factors of farming as rent, housing maintenance, taxes, equipment and labour. There has been a tendency in recent years to raise taxes. He believed in these times we should make use of such industries as raising of hogs, poultry, etc.

Mr. Jones recommended that cattle freshen in spring as the more economical plan, as cheap grass may be obtained during the summer months. He stressed the value of good pastures and recommended fertilization so that cows may not become dry during July and August for lack of pasturing. He also recommended pasturing cattle as soon as the grass sprouted in the spring.

He found barley and oats much more satisfactory than either crop alone, and also suggested the use of barley and flax as a good conditioning ration.

Mr. Jones suggested that all farmers put their cattle in the Cow Testing Association so as to eliminate unprofitable animals from the herd. He also recommended the use of the Bull Loaning Clubs.

Mr. Jones spoke strongly in favour of line-breeding and in breeding in cattle as well as other stock, and stated that his own herd had been built up by this practice.

He closed by recommending the home treatment of cattle in opposition to employment of veterinary surgeons, and gave a number of examples in which home treatment might be used.

Mr. Walter Shaw, of the Provincial Live Stock Department, stated the best information we can get is from practical experienced men and that the most useful work the Government workers can do is in giving publicly to the experiences of farmers among other farmers.

He spoke of the Calf Clubs as a most valuable feature and one that would be promoted during the coming year. They are an institution among the young people and thereby a benefit to the whole community.

He also spoke highly of the field days and particularly of one organized last season by Mr. Robert Doucette. He suggested that other producers follow Mr. Doucette's example.

Mr. Wiley Gibson found that excellent work was being done through the Calf Clubs by Messrs. Shaw and Roper. He believed progress must be made with the young people and that a great moral improvement accompanied endeavors toward improvement in live stock. He recommended the production of less calf of better quality.

Dr. J. A. Clark spoke of the work done by the Experimental Farm in experiments on pastures and gave experiments, the results of which showed the advantage of the fertilization and rotation of pastures. Besides advantages in amount and quality of production the fertilized area contained no couch grass.

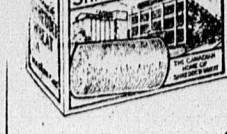

Mr. B. R. Brown commended Mr. Jones' address and added that the difficulty with farmers at present is lack of stock. He quoted the motto: "Feed the land and it will feed you, starve it and it will starve you." He believed in the use of manure and agreed with Mr. Jones in the practising of line and in-breeding of stock.

Mr. Fred Dollar advocated the use of lime and cited examples of improvement on his own farm.

Mr. R. A. Proffitt believed thousands of dollars are being lost by the use of fertilizer when manure is available, also by loss of production caused by cold stables. He remarked on the first Pure Bred Area in the Dominion, which has been formed at Elderbrook, N. S. He stressed the need of interesting young men in farming and closed by hoping a Pure Bred Area would be established here.

JUST RIGHT FOR TODAY

SHREDDED WHEAT

ECONOMICAL HEALTHFUL CONVENIENT

The meeting closed with "God Save the King."

TRINITY UNITED CHURCH

THURSDAY 7:00—Senior Taxis Square regular meeting—Social Hall. 332-1-28-11.

Delivered by Mr. John A. Dewar. President: Gentlemen: After the lapse of another year we meet again to renew the business of the past year and to lay down plans for the future.

In 1931 we produced 528,240 pounds of cheese compared with 870,579 pounds in 1930.

We produced 2,063,232 pounds of butter in 1930 and 2,771,597 pounds in 1931.

The quality has been fully maintained, our score for cheese is 92,020. Of the small amount of butter graded the quality showed one hundred per cent for no ones.

From 45 cents per pound for butter fat some years ago to a decline of 20 cents at present shows a decline of 55 per cent.

This is discouraging and while dairying is still more profitable than any other line of agriculture, it is difficult to stimulate an interest. It is especially difficult in the case of the distinctly summer dairyman because dairying for profit is a whole year business.

Cow testing is an excellent way of arousing an interest, the use of the scales and Babcock test is the only proper way to locate and eliminate the boarder cow, and not only for one year but continually. Until prices revive the challenge is to the progressive, not to lie down, but to fight it out manfully. We may not make much money but we will sustain and improve our herds, and add to the fertility of the soil.

As we cannot leave the country and there is no better business to engage in, we will have to balance our budget by producing more economically.

During the past summer there was the average amount of moisture to produce grass, supplemented by corn and "green feed." There was a good supply of milk for those who take the business seriously. We have had the providential blessing of good crops of fodder, grain, and roop.

When a thousand bushels of turnips, or mangos can be produced per acre there should be no lack of succulent food for winter feeding. With an abundance of cheap grain to balance the ration, there is also an abundance of clover and timothy. While the timothy plant has some nourishment for milk cows when cut green, in its ripened stage it is little better than wood. It would be difficult to estimate the great value of last season's clover crop not only as the cheapest source of protein but also in the immense amount of nitrogen that has been stored in the soil for the use of future crops. In this period of acute depression we see in this clover crop the working of the great law of compensation. It might be well at this stage to impress the necessity of loyalty to the co-operative principle.

There were several privately owned cheese factories on the Island prior to 1891 when Dr. F. W. Robertson came to us preaching the gospel of co-operative dairying, but they were nearly all closed. The great impetus given to dairying by the Doctor's visits was due to the fact that it was founded on co-operation.

The kindred industries, eggs, poultry and hogs, that derive sustenance from dairying have also suffered. While the returns from the former have been meager, the slump in hogs has copped the climax, has passed into ridicule, and would be a good theme for the practical joker.

We will not dwell any longer on this phase of the question. The subject will no doubt be exhausted at the Swine Breeders Meeting. Time has proven that dairying has more of the elements of stability than foxes and seed potatoes. There has been some money made on potatoes. As a specialty it is fundamentally wrong by encouraging soil ex-
