not include "the many thousands" of ships escorted on the return trip to North American ports...

For nine months prior to discontinuance of trade convoys in the North Atlantic all trade convoys between North American ports and the vicinity of Newfoundland were escorted by Canadian warships and three out of four of all convoys proceeding across to the United Kingdom were protected by ships of the R.C.N.

The first convoy to sail from Halifax, on Sept. 16, 1939, was escorted by two of the six destroyers owned by the R.C.N. at the beginning of the war.

By the time the first convoys of 1941 the first corvettes began to make their appearance. Many more destroyers, frigates, corvettes and minesweepers followed until at the end of the 54 sea-going convoys engaged.

Because of the nature of its task, the R.C.N.'s part in the changing war-time living back to normal home life will be difficult and added.

The types of units city will do everything we can to assist in bringing about a better city. In the past we have been too wishy-washy with our types of individuals.

The assembly voted that the stipend of ordained ministers in their first year of service be raised from \$1,400 to \$1,600.

ASTRONOMICAL RECORDS Records of comets go back as far as the beginning of the third millennium, B.C. when a comet was observed in China.

The Japanese said that the mortar fire had been from a concealed Japanese position not yet located.

We spent the morning on Pawaagan peering at hillside enemy caves, the entrance to one cave so big it housed Japanese trucks as well as all kinds of ammunition and supplies. It opened on a road far down in the Marquagua valley.

The battle setting was reminiscent of southern Italy with thick bamboo replacing vineyards, but with denser growth, fewer roads and steeper and more numerous inclines.

Public Meeting There will be a meeting of the shareholders and patrons of the Kenington Dairying Ass'n. on Thursday, June 14th at 8 p.m., in the King George Hall, Kenington.

The purpose of the meeting is to complete the organization of the Kenington Dairying Cooperative Ass'n.

Local Red Cross Corps Inspected

Mrs. Barnston Tudball of Toronto, National Commandant of the Canadian Red Cross Corps inspected the Charlottetown detachment under its Commandant Mrs. Segnaat at Prince of Wales College last night.

Following the march past, which was carried out with precision, Mrs. Tudball was formally introduced by the Hon. Dr. W. J. P. MacMillan, O.B.E., president of the P. E. I. Red Cross Society.

The National Commandant presented Service Chevrons and Home Nursing and First Aid Certificates. In the afternoon Mrs. Tudball met the parents of the eight members of the Charlottetown detachment who are at present serving overseas with the Canadian Red Cross Corps at Red Cross House.

Mrs. Tudball will leave Charlottetown this afternoon after visiting the recreation centers for service men at which the Red Cross members work.

DIES AT HOSPITAL - The death occurred at the Prince Edward Hospital yesterday Mrs. J.W. MacLean of Charlottetown in her 48th year.

Among the officers on the Canadian destroyer "Kootenay" which was among the naval ships arriving in Halifax is Surg.-Lieut. W.W. Tidmarsh, 8 Richmond Street.

BIG FIVE - (Continued from Page 1) The break in the veto deadlock developed at a mid-afternoon meeting of chiefs of the Big Five delegations in Mr. MacFarlane's penthouse atop a San Francisco hotel.

The Russians had been aligned against the other Big Four powers in the dispute over the veto procedure. Today Soviet delegates in private conversation expressed sorrow and surprise at having their position placed next as stubbornly refusing to play ball.

Their stand had been something like this: When the Dumbarton Oaks agreement was being negotiated in Washington last summer, Russia took a position that the major powers must hold all the cards in a world league for peace and that they should be the price and they alone were able to enforce peace.

Sections of the British press and critics of the Government's foreign policy reported that the Big Three - Premier Churchill, Premier Stalin and President Roosevelt - agreed to let Russia have a veto in the security conference at the desire of the United States until the President could get the necessary arrangements on the spot.

It thus appeared that the Big Three had agreed to let Russia have a veto in the security conference at the desire of the United States until the President could get the necessary arrangements on the spot.

That meeting was held at Yalta and the Russian proposal would place the power of veto of each of the Big Five nations on a par with that of the other four nations and investigation of disputes in which one of the Big Five was a party would not vote on the motion to investigate and no enforcement action.

In such an extremity, of course, the veto would be wrecked in any event.

The Russian delegation has said that any intervention in international affairs might conceivably lead to armed enforcement action and that any veto should operate along the line.

At the same time the Soviet delegates gave assurance that the United Nations would have no intention of using this veto power in a manner that would embarrass any country or operate against international accord, and is willing to trust others of the Big Five to respect their veto prerogative.

Dimitri Manuilsky, head of the Ukrainian delegation, said that the committee of preliminary purposes and principles, announced at a press conference today that the veto would be used only in the case of a "major threat to the peace."

This was in tribute to President Roosevelt, who with Prime Minister Churchill, organized peace-loving nations against the Axis powers and against the countries signed the United Nations declarations in Washington Nov. 24, 1945.

Mr. Manuilsky, in an aside at his press conference, said the Soviet delegation had been very about to all the obligations it would impose upon them.

Industry Ready to Swing Into Peacetime Work

TORONTO, June 7 - (CP) - Canada's great industrial system stands ready and willing to put its full strength into the problems of peace, both national and international, J. C. MacFarlane, K.C., president of the Canadian Manufacturers' Association stated at the opening session of the 74th annual meeting of the Association. More than 2,000 Canadian industrialists, are attending the three-day meeting.

The countries represented at the United Nations Conference at San Francisco have planned and prepared to keep the peace and restore the world, Mr. MacFarlane said in the course of his presidential review.

"Any country which tries to proceed alone in war will face the armed might of the Security Council and they will be forced to control and direct entirely its own economic, trade, finance and other national policies, they will find difficulty in securing money, supplies, transportation and access to markets," he said.

This is a new situation Mr. MacFarlane said, which may be difficult in the early stages but which should, in the end bring advantage to all countries and to the world.

"Canadians have demonstrated in two world conflicts that they can do their duty in co-operation with other countries and they can do the same in peace," he continued.

Dealing with current Canadian problems, Mr. MacFarlane stated that the general attitude and policy

Research Important

"Scientific and industrial research is one of the most important factors in the development of a nation's economy."

Canadian industry was vitally dependent upon smooth operation and expansion of international trade, said the president, since it was necessary to export surplus industrial production and many of the raw materials and semi-processed articles from abroad.

Mr. MacFarlane said: "There are four problems which must be solved satisfactorily before international trade can be developed in volume and variety as supplies and materials of international currency are available."
