First patents were quoted at \$8.20, second patents at \$7.70 and strong bakers at \$7.50 per barrel. The local trade was quiet, but the export demand was fair. A moderate amount of business was worked in winter wheat flour and values were steady. A fairly active business was done in millfeed and the undertone was firm. The trade in standard grades of rolled oats was quiet, but prices were unchanged. Prices for all grades of eggs were well maintained under a good demand. The receipts were 1,201 cases. Fly-Tox First in Australia

The Australians have shown by their purchases that Fly-Tox is their choice for killing all household insects. It was necessary to establish a Fly-Tox factory at Sydney in 1925. Its capacity has since been increased four-fold to supply the growing demand. Fly-Tox is the scientific insecticide that was developed at Mellon Institute of Industrial Research by Rex Research Fellowship. Fly-Tox also kills moths, mosquitoes, ants, roaches, spiders and bed bugs as well as flies.

MITCHAM FAIR DATES TO ELIZABETH'S REIGN

LONDON, Sept. 10.—Mitcham on the innocent recreations held within the confines of the Fair, was not regarded by authorities as a revelry of Queen Elizabeth's reign, while failing to show when the Fair originated, traced it back to the reign of Elizabeth. It is supposed to have been in ancient times an occasion for the hiring of farm hands and domestic servants as well as for merry-making. The fears of the showmen that the change of site would mean the beginning of the end of the Fair have proved to be wholly mistaken. Since its removal to the Common the Fair has enormously developed and grown in popularity. Probably the only respect in which the present Fair bears any resemblance to its more ancient predecessors is in its show of "treacle". The strongest man and the fattest woman in the world are still to be seen there. It would seem as if age does not wither nor custom stale their infinite muscularity and weight. Most of these weird beings boast that they have been "patron-
