

PANDORA

Owing to the fine construction of most ranges it is a rather difficult feat to cook and bake successfully at the same time.

But the arrangement of the Pandora flues differs considerably from others. They are so constructed that the draft for baking is also the best for cooking, the heat circulating around the oven twice and under every pot hole before passing up the chimney.

The Pandora bakes and cooks perfectly at the same time. Do you know of another range that does? If your local dealer does not sell the Pandora write direct to us for **Free Booklet**.

The last issue of the Cape Ann News, Gloucester, Mass., has the following: "A letter received here yesterday from Prince Edward Island, contains the welcome news that mackerel are showing in large quantities along the I-land coast and have been reported by incoming vessels as schooling at various parts of the Bay Chaleur. On Sunday of this week they were schooling all along the Prince Edward Island coast from Savage Harbor to East Point in 15 fathoms of water. The island boat fishermen have been doing well, landing good catches every day lately. This is good news and indicates that the Gloucester vessels which look a chance and went to the far eastward may not have missed anything by so doing. The latter part of September has in times past been a good time of year in those eastern waters and our vessels may yet strike the fish and come home loaded."
