

Greatest Discovery in Two Decades of Medical Research for ASTHMA, BRONCHITIS, SINUS

Famous Duke-Fingard Hospital-proved Method Now Available for
Convenient Treatment AT HOME with New Easy to Use Electric Unit

JUST INHALE MEDICATED VAPOUR
No Shots! No Serums! No Pills!

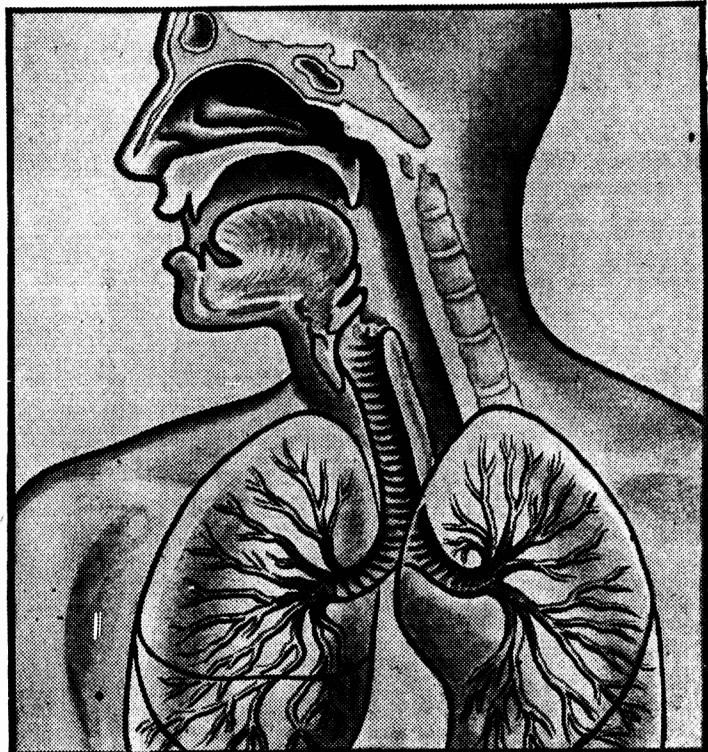

Now when you feel the wheezing and tightness of an asthma or bronchitis attack, you don't have to resign yourself to a night of misery. Scientific INHAL-IT with its specially developed medicated vapour, has the power to relieve! INHAL-IT, the product of endless painstaking research, may bring you complete freedom from your disease.

**SCIENTIFIC MEDICATION HOSPITAL TESTED . . . ENDORSED BY
LEADING PHYSICIANS OF GREAT BRITAIN, CANADA**

The Duke-Fingard Inhalation Treatment for asthma and bronchitis has been tested and acclaimed by outstanding medical authorities throughout Great Britain and Canada. Before being made available to the public, it was used in famous hospitals like the Eversfield Chest Hospital, St. Leonard's on the Sea, England; Peamount Sanatorium, Dublin, and the Croydon Borough Sanatorium, England. One medical report states: "Cases 'given up' by their doctors appeared in perfect health after taking the Duke-Fingard Treatment." The medicated vapour attacks bronchial and nasal infection which often causes asthma and bronchitis. Now this famous treatment is yours for easy home application. Your days of wheezing, choking, fighting for every breath may soon be over. Ask for INHAL-IT today!

**Ends Wheezing, Coughing, Choking,
Cold Sweat, Nasal Discharge.
Also Effective for COMMON COLDS**

HOW ASTHMA, BRONCHITIS STRIKE

Asthma and bronchitis are diseases of the respiratory system which claim thousands of Canadian victims each year. These dread diseases attack the bronchial tubes causing them to tighten up. The constriction makes breathing difficult, starts wheezing and coughing. In the more severe cases, victims suffer violent paroxysms which last from a few hours to days on end. For years doctors have sought the causes of asthma and bronchitis. They found them everywhere, in everything from cotton to cats. While they found a dozen causes, they lacked a reliable, effective treatment. As one doctor stated, "We had better be honest and admit that asthma is one of the reproaches of medicine." Most sufferers are forced to depend on temporary relief like adrenalin which halt the terrible diseases only for an hour or a day. If you are an asthma or bronchitis sufferer you know how discouraged you are with temporary relief. You are faced with years of painful days and agonizing nights. How can you rid yourself of this awful curse?

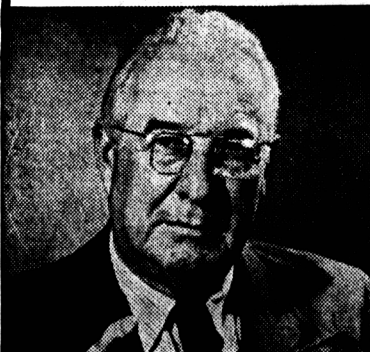

How *inhal-it* Works

After seeking a treatment for asthma and bronchitis, British and Canadian scientists reached two conclusions: (1) both diseases often result from infection and (2) the diseases can be eliminated from the body by removing the infection and restoring healthy tissues. Then came the discovery of INHAL-IT, a specially medicated vapour. Here's how the late Dr. A. G. McPhedran, formerly on the medical faculty of Toronto University, explained INHAL-IT's "remarkable" power. "The allergies disappear when the infection is cleansed from the nose and chest and tissues become healthy. It cannot be too emphatically stated that allergy is generally, perhaps even invariably, dependent on infection and the cure of allergy is by removal of the infection and not by serum treatments or any other palliative measures." He also stated of the results of the Duke-Fingard treatment, "They appear so uniform that we do not expect any exceptions." Another doctor, R. W. Boyden, D.S.O., M.D. of Toronto, reported results like these on July 7, 1949: "Miss K., Asthma and allergic for 33 years . . . 16 weeks treatment with small electric cup . . . She eats all foods she was previously allergic to; J.A.L. Age 79, Bronchitis and Asthma for 30 years. After taking treatment for 8 weeks consisting of inhalation from small electric cup all symptoms disappeared. No recurrence in past 4 months." Dr. Boyden said "I am reminded of the statement of the late Prof. D. F. Fraser-Harris, 'These results are well nigh unbelievable.'"

INHAL-IT is the Duke-Fingard Inhalation Treatment prepared for use in the comfort of your home. When the healing vapour, identical to that used in the hospitals mentioned, is inhaled, infection is reduced, tissues become healthy. You feel new comfort . . . freedom from sneezing, coughing, choking.

INHAL-IT goes to work instantly! It doesn't just pacify your disease, it completely removes all the symptoms. Now you can try INHAL-IT without risking a penny. Get INHAL-IT today. You are guaranteed blessed relief and like so many others, your asthma or bronchitis may be stopped forever. INHAL-IT may save you a lifetime of suffering and a small fortune in costly medical bills, so don't delay one more day. Ask for INHAL-IT and START YOUR RECOVERY TODAY!

Actual Medical Case Histories Tell Wonderful Story

Doctor

This quotation is from a report written by the late Dr. J. A. Faulkner, former Minister of Health, Province of Ontario, on the Duke-Fingard Treatments given to his grandson who suffered from asthma, bronchitis, sinusitis and allergies. "This child never had the privilege of drinking a glass of milk. I decided on account of my observations of the Duke-Fingard Treatment that he should have a course of treatment. The Duke-Fingard Treatment has convinced me that not only has relief been given, but that a cure has been rendered. At the present time, he eats anything with gusto. As far as I am personally concerned, I do feel that medical science has been given something comparable to the observations of Pasteur."

"Incurable"

"I had asthma and sinusitis for many years. Five doctors could not do a thing for me. Ever since taking the Duke-Fingard Inhalation Treatment, I have felt fine and I trust this letter will assist to restore the health of others who now suffer from so-called 'incurable' diseases."

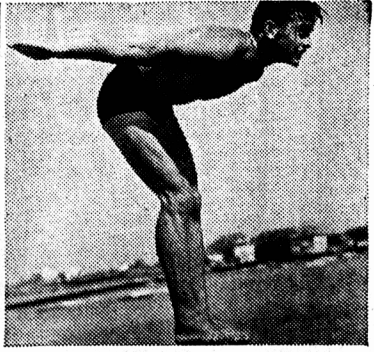

**Medical Report*

Professor of Physiology

"All the following types of cases have been cured by the Fingard treatment: common cold, bronchitis, bronchial asthma, bronchiectasis, and sinusitis. The evidence is well-nigh unbelievable, and once upon a time, would have been looked on as white magic."

*Professor D. F. Fraser-Harris
London M.D., D.S.C., from Medical Press*

Swims Every Day

"G. McE., a lad who after fourteen years of persistent asthma commenced treatment. Three months of treatment apparently cured his asthma. He gained thirty pounds. He learned to swim and could swim as much as 5 miles a day."

IN PUBLIC TRUST

For the public welfare, the valuable formula of the Duke-Fingard Inhalation Treatment was placed in trust with the following trustees:

THE LATE
GENERAL SIR HAROLD
FAWCUS
K.C.B., C.M.G., D.C.L.,
M.B., D.F.H.

THE LATE
HONOURABLE
SIR ARTHUR
STANLEY
G.B.H., C.B.,
M.V.O., D.S.O.

GENERAL
SIR HURRELL GOUGH
G.C.B., C.M.G.,
K.C.V.O.

SENATOR SALTER HAYDEN
MR. AND MRS. EDGAR A. BAYTON

**Now Freedom from Agony
of Asthma, Bronchitis**

Active men and women who have suffered from loss of sleep and given up all hope of ever enjoying sports and social activities again, can now look forward to new health and happiness. This medicated vapour from INHAL-IT works like magic. Start using INHAL-IT today.

The case reports quoted herein are on patients who were treated in hospitals and under medical supervision. Naturally the results of the new specifically designed electric cup cannot produce identical results. It does, however, produce satisfactory results and relieves distressing pain and attacks of bronchial asthma, bronchitis, sinusitis and colds. Severe cases are advised to take the overnight treatment that must be obtained on doctor's orders.
