ISLANDER DEAD—Many friends will deplore the death in South Brewer, Me., of Mr. Berj. B. McEwen on March 24th after a brief illness of pneumonia at the age of 52 years. He was born in Charlottetown, P.E.I., but removed to Brewer with his parents. He entered the employ of the Eastern Manufacturing Co. of that place, laboring in the digester-room for a number of years where he was held in high esteem for his many good traits of character. He is survived by his wife, nee May Coles, four sons, John, Maynard, Egbert and Gordon; and four daughters, Hazel G., Edna, Joyce, and Kathleen. There are also four sisters, Mrs. Millie Allen, Mrs. Agnes MacDonald, Mrs. Agatha Payne and Mrs. Elmer Snow, with whom the friends of P.E.I. deeply sympathize.

MEET WITH ENCOURAGEMENT—The trustees of the Prince Edward Island Hospital have this week been calling upon a number of the outstanding friends and supporters of the hospital for subscriptions to defray the cost of the new deep therapy X-ray unit, which will enable the hospital within a month or two to treat a large number of malignant and other conditions for which no treatment has heretofore been possible within the province. The trustees have been greatly encouraged and with the princely gift of \$500 from Lieutenant Governor DeBlas as a start have already in sight approximately one-half of the amount needed. Several subscriptions have come in by mail and it is hoped there will be many more of these as every section of the province will reap the benefit of the installation of this X-ray unit. A lead lined room for this apparatus was provided when the new hospital was built but the trustees did not feel justified in borrowing the additional amount which its purchase would have involved.

STUDENT EDITOR—Recent issues of the "Student", undergraduate campus newspaper of Bates College, carry the news that Mr. John E. Leard has been re-elected editor of that paper—the first two-year editor in the history of Bates College; and that his brother, Samuel E. Leard has been named sport's editor of the same publication. John E. Leard and Samuel E. Leard are sons of Dr. and Mrs. John S. H. Leard of 1895 Centre St. West, Roxbury, Mass., and grandsons of the late John N. W. Leard, Esq., of Tryon. Both men in their junior years in college are taking high scholastic rank, as well as participating in many extracurricular activities. They are both members of the Students Council, and the Bates Outing Club, John E. being Secretary Treasurer of the former and Samuel E. secretary of the latter. Samuel E. who is a member also

HE DARE NOT MOVE IN BED

Nights were Torture through Lumbago

Only those who have suffered from lumbago know how exceedingly painful it can be. And when they discover a remedy for this complaint, they are anxious to pass on the good news to other sufferers. Let this man tell you how Kruschen brought him relief: "I had a bad attack of lumbago. When I got into bed I had to stay in that position—I could not move for pain. I didn't know what to do or what to do to. I was advised to try Kruschen Salts and I am very grateful I did so. After taking a few doses I felt relief, and after taking one large bottle, I am glad to say that my lumbago had entirely gone, and I have not had the slightest trace of it coming back."—G.A.V.

Kruschen is a combination of numerous mineral salts which assist in stimulating your liver and kidneys to healthy, regular activity. They ensure internal cleanliness, and so help to keep the blood-stream pure.

of the Orphic Society, the college band, and the Jordan Scientific Society, is preparing for medicine, while John E., a member of the cross country and baseball squads, is working towards a career in Journalism. The latter was quoted in a recent number of the Literary Digest, an honour to both the "Student" and its editor.

TRANSFERRED—Miss Marjorie E. Himmelman, of Halifax has been transferred to the staff of the Canadian National Telegraphs at Charlottetown, in the automatic department.

ISLAND STUDENT HONOURED—Mr. Donald Campbell, B. A., son of the Hon. John A. Campbell, M. L. A., of Headherald, this province, was recently honoured by being appointed president of the Student's Council of the Presbyterian College, Charlottetown. Mr. Campbell received his B. A. degree from McGill and will complete next year his studies at the Presbyterian College. This summer he is planning to serve in the home mission field of the Presbyterian Church in Alberta. A graduate of Prince of Wales College, Mr. Campbell formerly taught school at Headherald, where his many friends will learn with pleasure of the success he is making in his college career.

Personals Mr. and Mrs. Dobson Clark, City left this morning for Toronto.

Miss Ella Toole, student of P. W. C., has returned from spending Easter at her home in Green Road.

Mrs. W. A. Thompson spends this morning for Toronto to leave this morning for Toronto to spend this morning with her daughters, Mrs. Russell and Mrs. Newnam.

Mrs. G. M. Averd and two children, Louise and Arthur, returned from Sackville Monday evening where they had been spending the last two weeks.

Mr. and Mrs. C. H. B. Longworth leave this morning for New York sailing Monday on S. S. Monarch of Bermuda for Bermuda where they will spend some weeks.

The many friends of Mrs. J. H. Nantes, of Maplewood will be pleased to learn that she is gradually recovering from her recent illness.

Mr. Josiah Baker arrived home after spending the past six months in Ridgeway Park, N. J., the guest of his two sons. While in the city he was the guest of his daughter, Mrs. Frank Creamer, 137 Spring Park Rd., before returning to his home in Morell village.

You can practice what you preach without being too peachy about it.

Dr. Robertson Discusses Education

In the report of the Department of Education, Dr. S. N. Robertson, Principal of Prince of Wales College discusses the education situation as follows:

This province must learn to place upon education its proper values. It must of course maintain and improve its common school, make its common school a real, upbuilding factor in every community, have it ministered unto by a mature teacher, well taught and well trained to perform all the services of the public school. Each public school should be sending out to its community its young people intelligently competent and anxious to undertake life's duties. Only in such a system can a social foundation be laid and established for its superstructure. The success of the school is dependent upon the teacher. He it is that gives guidance, chooses paths, encourages and inspires the pupils. Such leaders must be provided in the schools, leaders of wide and generous education, that can look upon life with an intelligent, judicious eye and see the march of civilization, and in what capacity each young pupil should be fitted to join the ranks. With a world integrated by telephone, wireless and radio, there is no longer the remote individual, no remote community, not even an independent nation. All now live in a highly compact, closely unified world, where each member must be able to fill his place in the ranks, and also be fully conscious of the part or role that he is playing. For this the school must have an older teacher, one that has reached 21 years and maturity, one that has had time not only to complete the work that he shall teach, but to have had time also to mingle with other adolescents, that are with him seeking an education at the university.

Teaching Agriculture

Situated in a province largely devoted to farming as in Prince Edward Island, Prince of Wales College has always given great attention to agriculture. The nature study of the schools it has continued in the enlarged and extended courses of botany and agriculture of the first and second year classes. For many years now it has been sending out its students to teach in the public schools with an intelligent interest in the flowers and plants of P.E. Island, and with a knowledge and attainment to develop in their pupils a care and concern in the daily operations upon the farm at home. It brings the greatest satisfaction that the college is now being permitted to extend its work in agriculture, and continue its courses into the third and the fourth years. And not only in agriculture, but in household science as well. Macdonald College, which is the agriculture college and the household science college of McGill University, has been pleased to admit their third year students who have completed their four years' course at Prince of Wales College, and in this way have enabled young men to reach their B.Sc. (agr.) and young women their B.H.S. degrees with but two years at Macdonald. These are the most promising opportunities that have been opened to the young people of Prince Edward Island in recent years. With the professions crowded, and with the standing room only to be gained over a prohibitively expensive course, with the teaching staffs of high schools offering no vacancies to the young graduate B.A.'s, who are already filling up the bread line, young people have been in a quandary in what course to direct their education and plan their life's work. Here now in agriculture is opened up for settlement a new domain, a territory largely unoccupied, with building sites for life that command health, happiness and wide horizons.

ALBANY PLEASANT CIRCLE INSTITUTE

The March meeting of the Pleasant Circle Institute, met at the home of Mrs. George McKay with thirteen members, and seven visitors present. The President presided, and opened the meeting, with singing the Ode, followed by the creed, repeated in unison. The sick committee presented a bill of 25c which was paid. It was moved and seconded that a wood-box be bought for school. The following committees were appointed for the April meeting, which is to be held at the home of Mrs. Even Cameron. New school committees (for three months) Mrs. Arthur McKay and Mrs. Earl Boulter. Sick, Miss Beatrice Tierney and Mrs. Urville Large. Program, Mrs. George McKay and Miss Audrey Harvey. It was moved and seconded that the Secretary write a letter of sympathy, to Miss Olive Ings, the Public Health Nurse. At the next meeting the roll call is to be answered with suggestions for the school lunch box. One new member was welcomed, and a meeting concluded, a very interesting lecture was given by Rev. L. O. DeWolf, on Agriculture, and industrial age; and the questionnaire on Agriculture filled out. The sum of \$3.02c was realized from collection, and sale of candy.

Prospects in Farming

As a profession, agriculture has never had entering it the great throngs that crowd and make uninviting and impossible law, medicine, dentistry, etc. In consequence, agriculture offers annually many attractive positions. But search has only commenced to show its abundant possibilities. With the inevitable expansion, with the imminent release of international trade, one can envisage what numbers of young men shall be employed in its later practice and administration. In the teaching staffs of common and high schools, and in normal schools too, there are many positions that should be filled with young men or women of character who combine good primary and secondary education with attainment in whole or in large part of the B.Sc. (ag.) degree.

In household science, also, opportunities are offered the girl students, opportunities in even larger numbers, for countless positions are possible to graduate B.H.S.'s in the home, in large industrial plants, in nursing homes, and in hospitals where diet has largely displaced medicine.

Report Of Provincial Agriculture

Mr. W. R. Shaw, Deputy Minister of Agriculture in his report to the Minister, Hon. W. H. Dennis says: Based on the farm production and revenue of the year 1936 Prince Edward Island farmers may well enter the new year with renewed faith and optimism. The season just completed marked a decided improvement in the field of agriculture. Some difficulty was experienced by a number of producers in securing full seed requirements for the spring seeding, but this condition to some extent was carried over from the previous year or was due to neglect to provide at an early date against seed shortage. The situation was relieved to a very great degree by the prompt action of your Department in locating much needed supplies.

The growing season which cool was particularly favorable. During the whole year showers were frequent and growth was abundant. Practically all farm crops, with the possible exception of corn and wheat, were in excess in point of yield when compared with the previous year's production. This condition was in striking contrast to the prevailing conditions operating for the previous three year period when dry weather in the middle of the growing season played havoc with hay, pasture and other crops. The wheat crop, as already intimated, was the poorest harvested in the province for many years. The cool season and attacks of insect and disease pests were to a very great extent responsible. In all parts of the province, however, an excellent oat, barley and mixed grain crop was harvested. From the standpoint of distribution seed-moisture was the production in these branches better. Broken weather conditions proved an obstacle in some cases to the saving of grain of good quality and colour. Mixed grains, the acreage of which is on the increase, yielded a valuable supply of feeding materials. Pasture conditions were the best for many years and were maintained on an unusually high level during the whole season. Outstanding results were in the form of improved health and condition of livestock and in an increased production of dairy and by-products. The fine returns secured as a direct result of pasture conditions should prove an incentive on the part of farmers to direct attention to greater care and improvement of pastures. The heaviest crop of hay for the past twenty years was saved, most of it in excellent condition. Supplies of old hay were practically exhausted at the beginning of the growing season, but the new supply will take ample care of domestic requirements and provide a higher than average quantity for export purposes. Clover mixtures in pastures and hay have been abundant and the roughage for winter purposes will as a consequence carry a higher than usual protein content, thus providing a valuable feed nutrient, particularly for dairy feeding. Undoubtedly a substantial increase in the use of ground limestone for the past two years has had something to do with improved quality and bulk in hay and pasture. During the year about 7,000 tons of ground limestone were imported into the province. Root yields were excellent in both quality and bulk. A substantial increase in the acreage of turps was evident and a large supply has been offered for export purposes. Conditions for an increased production of potatoes were also favorable, and the farmers

Crushed Under Fall Of Coal

DOMINION, N. S., March 31—(CP)—Tom Young of Dominion suffered a broken leg and body injuries when crushed under a fall of coal here today, bringing the total accident toll in Cape Breton to two dead and two injured for the week.

James Walker was killed in the rock fall last night, while Gordon Robertson died when he fell beneath a string of empty coal cars. George Little suffered head injuries and a sprained ankle in the coal fall yesterday.

Address and Presentation

On Tuesday, March 9, the members of Rocky Point and Fairview Women's Institutes assembled at the home of Mr. and Mrs. Nelson Currie, the former to show their appreciation of Mrs. Currie's valuable assistance in their Institute and the latter to welcome Mr. and Mrs. Currie to their new home in Fairview.

Mrs. A. McMillan capably presided for the evening. She first called on Mr. Wm. Mutch who read the appreciative address, while Mrs. Joseph Dolron presented a suitable remembrance. Miss Selina Currie then read the "Welcome address" while a nice gift was presented by Mrs. Al. McIsaac.

After Mr. and Mrs. Currie thanked the Institutes for their kindness all joined in singing "For They're A Jolly Good Couple." After all had participated in two enjoyable luncheon was served to all present.

Following are the addresses: Rocky Point, March, 1937

Dear Mrs. Currie— Opportunity came knocking at our door enabling us to invade you in your new home tonight to wish you the richest of all blessings, good health.

We had hoped to have you back again residing in our district in the near future, but alas, we are disappointed, so once again we are reminded of the oft repeated words, "Our loss is another's gain." As a member of our Institute your services were invaluable, always in attendance, which in itself is one of the greatest assets to any organization, as it shows interest and loyalty and encouragement in our noble yet feeble efforts. There was no achievement accomplished which did not receive your whole-hearted support. We rejoice to learn you are not severing your affiliations with us and will still be the same helpful advisor in the future as in the past. Being one of our charter members, we always looked up to you as a noble example of the high ideals which characterizes our noble motto: "For home and country."

Dear Mrs. Currie please accept this little memento of our love and esteem, not for its value but for the good wishes which accompany it.

Fairview, P. E. I. We, as members of Fairview W. I. and as your neighbors, have gathered here tonight to extend to you a hearty welcome, and to wish you both many many years of health and happiness in your lately acquired home.

It was with feelings of real pride and heartfelt pleasure that we learned a short time ago that you had decided to make your home permanently among us. We sincerely hope and trust you will never have occasion to regret your decision.

During the few months that you have resided among us, we have already on several occasions found you ready and willing to aid us in our community activities; also on visiting your home we have ever been received by a kindly and hospitable welcome. Thus you have proved yourself to be "neighbors" in the true sense of the word.

Not being strangers to us we are aware that in the district where you have resided for almost a quarter of a century, you have been held in the highest esteem and we realize the true worth of friends such as you have proved yourselves to be.

We trust that you, Mrs. Currie may see fit to attend all our Institute meetings where you will always be cordially welcomed either as member or visitor. In conclusion we ask you to accept this

Major Lucien Bourassa SHAWINGAN FALLS, Que. April 1—Mayor Lucien Bourassa, of Shawingang Falls, 52, who received part of his education at St. Dunstan's College, Charlottetown, P. E. I., died today. He was a prominent business and Social leader in the city.

(Many of the older football and hockey players in this city will remember Mr. Bourassa, when he attended St. Dunstan's, he was a rugged and powerful football player and he not only held down a position on the college football and hockey teams, but he was cover point on the old Victoria hockey team. He was a popular athlete and those who knew him will regret to learn of his passing.)

Use Mince's for Mice.

New Study Plan Tried at Normal

SASKATOON, April 1—(CP)—Self-directed effort of students at Saskatoon Normal School may point the way to changed teaching methods. Principal C. P. Seely believes.

Students organizing their own studies on a "committee" plan, he thinks, gained more from their work than under a system of lectures by instructors.

Work of the school is carried out through committees working under direction of the room presides. A student Normal School instructor remain in their offices where they may be consulted by committee chairman only. Committees may function for a half day or less.

Students who have shown marked efficiency along any line throughout the session may be called by any committee to give advice.

BORDEN WOMEN'S INSTITUTE

Borden Women's Institute held their February meeting at the home of Mrs. Redge Rodgers nineteen members present, minutes of January meeting adopted, reports of Committees received and new ones appointed. The secretary reported receiving \$100 from the proceeds of their share of the expenses of having the Town Hall scrubbed. It was decided to have a concert March 17, 50% of the proceeds to go to the girl guides, the guides to help with the program—and attend to selling the candy. Questionnaire on Public Health discussed and filled in at this meeting. A contest won by Mrs. Contable and Mrs. Morrison. We extended a hearty welcome to fourteen members at this meeting.

March meeting was held in the Library room. Reports of committees and concert received, the secretary reported \$33.20 proceeds of concert held March 17. A hearty vote of thanks was moved by Mrs. MacDonald, seconded by Mrs. MacAefer to be given to Mr. Eldon Campbell for acting chairman for the concert and Mr. Ray Smallwood for selling pies. The Institute members wish to thank each and every one who in any way helped to make this concert such a success.
