SWIFT'S High-Grade Fertilizers Swift's Animal Fertilizers are intensive, because they are active all the time and are Swift—Superior—Sure. We cannot repeat too frequently that the commercial fertilizers nearest to nature or to nature's manures will prove the most reliable and profitable. They are made from blood, bone and meat from Rendering and Packing Houses, carefully and scientifically prepared, to which are added potash salts in the best forms, imported from Germany, thus producing fertilizers that are fine and dry with the elements carefully incorporated so that they will run freely through any fertilizer, planter or drill. It should be remembered that Swift's Fertilizers not only produce intensive crops, but will have a most beneficial effect on the soil after crops have been removed, leaving it in prime condition for subsequent use. In short, Swift's Fertilizers are soil builders, as well as crop producers, which is confirmed by the experience of our host of patrons who have used them. We have just received a fresh supply of the above named Fertilizers in the following well known brands. Ground Bone (for grass) Bone Fertilizer (for grain) Potato Manure Potato Phosphate (for potatoes) Animal Brand (for all crops) ALSO IN STOCK ENGLISH SUPERPHOSPHATES NITRATE OF SODA MURIATE OF POTASH DISSOLVED BONE BLACK all of which we are selling at lowest prices Wholesale and Retail A.
