"LITTLE FOXES" AT CAPITOL THEATRE, SUMMERSIDE

A drama of great emotional power and intensity was unveiled last night at the Capitol Theatre, when Samuel Goldwyn's production of "The Little Foxes" opened to an enthusiastic local audience. This fine motion picture, faithfully transcribed from the screen from the Broadway success "Lillian Hellman, is the story of one woman's ruthless ambition and the effect it had on those around her. Regina Giddens, the beautiful and heartless wife of a Southern banker, Bette Davis gives one of the best performances in her career, bringing to her portrayal of the Dixie vixen once more the assurance and conviction that has made her the first lady of the screen. In "The Little Foxes" she is ably supported by Herbert Marshall, who plays her husband, Charles Dingle, Carl Benton Reid, Patricia Collinge, Richard Carlson and Teresa Wright, a newcomer to the films who seems definitely headed for a brilliant career. "The Little Foxes" takes place in a small Southern town around the turn of the century, when the new industrial success was beginning to crowd out the stately mansions and plantations of the old South. Regina Giddens, obsessed with the ambition of acquiring wealth, no matter at what expense, learns from her scheming brothers of a plan by which she can make a fortune by investing a few thousand dollars of special note in the excellent work of young Teresa Wright, in the sympathetic role of Miss Davis' daughter. Directed with unerring aim by William Wyler, who was responsible for such screen masterpieces as "Dodsworth," "These Three," "Dead End" and "Wuthering Heights," and magnificently produced in the true Samuel Goldwyn manner, "The Little Foxes" is a picture you will remember when other films are long forgotten. The screenplay was adapted by Lillian Hellman from her own play of the same name. boys such a splendid farewell. This was the only province in the Dominion of Canada where he had encountered such a send off. The naval ratings, the majority of whom are from Ontario, were greatly pleased with the hospitality shown them while here. They leave this morning. Domestic sales of new farm implements and equipment in Canada in 1941, mainly at wholesale prices to dealers and exclusive of the sale of parts, bincer, twine, motor trucks, are reported at \$50,147,586, an increase of 5 per cent on the sales of 1940, and over 47 per cent on those of 1939. Marked increases in farm implements sales in the Provinces of Quebec, Ontario, and British Columbia in 1941 over 1940 were modified by a small drop in Alberta and a more substantial reduction in Saskatchewan, with the result that the total sales of farm implements varied little in the two years under review. Rumors Re Milk Said To Be False

Meeting Of Health Board And City Council Held Last Night.

A rumor that the milk supply of certain milkmen in the city was not up to standard was spiked by Dr. B. C. Keeping, Deputy Minister of Public Health and Dr. I. E. Croken, Meat and Milk Inspector at a meeting of the Board of Public Health last night. The question was raised by His Worship Mayor B. Roy Holman. An emergency session of the City Council followed the Health meeting. During the latter Coun. B. Earle MacDonald submitted a report of his recent trip to Amherst, Mass., where, as Controller of Fire Services for the Charlottetown area, he attended the A.R.P. school. Resolutions were passed at the Health meeting ordering the owners of five city houses to make their buildings fit for human habitation before July 15 or they would be torn down. In the meantime occupancy is to cease in each. One other was termed a "health menace and public nuisance" and was ordered to be "rendered unobjectionable or demolished at the option of the owner" before July 15. Three barns, a shed, an old forge, two outhouses and a group of old buildings were also ordered to be demolished. The Mayor opened the discussion on the milk subject by asking Dr. Croken if he had heard the Royal Air Force "have asked or instructed their men not to drink certain milk in the city." Dr. Croken answered that he had not heard so. Dr. Keeping also declared that he had not heard of this and added that he in close touch with the Senior Medical Officer of the Royal Air Force. Advocates Pasteurization Dr. Keeping stated that he had no reason to doubt the condition of the milk, but said he was strongly in favor of having all milk in the city pasteurized. "This is the only safe milk," he declared but it must be done properly. Houses ordered to be made fit for habitation or demolished included: 71 Dorchester Street; an old building at the rear of 90 Richmond Street; 238-240 tenement on Filmore Street; 248-250 Queen; 10 Granville Street. The dwelling ordered demolished was at the rear of 90 Richmond Street. Buildings ordered torn down were: a barn at the rear of the Royal Hotel; a health menace at rear of 23 Dorchester Street; barn at rear of 123-127 Euston Street; barn at rear of 129-131 Euston Street; shed at rear of 68 Dorchester Street; group of buildings at rear of North American Hotel, and an old forge at the rear of 248-250 Queen Street. Mr. James Fullerton, secretary of the Board was voted \$200 per annum, a sum formerly paid to the secretary of the Health Board. At the emergency session of the Council, a resolution was passed authorizing the purchase of four new cars for the city trucks from Allison McLeod. The cost was in the vicinity of \$500. Coun. F. C. Dougan said. The Council also authorized the purchase of four connections at a cost of approximately \$75 each to be utilized in filling the street sprinkler-flusher. Coun. Dougan explained that at present it takes 20 minutes to fill the flusher and the Water Department has proposed the buying of these connections which would do the same job in four minutes. Following this a report of his trip to Amherst, Mass., was submitted by Coun. MacDonald. At the conclusion of his report he said that the problem of the A.R.P. Committee work, Mayor Holman declared that most of the branches were in good shape but suggested that more meetings should be held. Coun. J. E. Sterns said that wardens were well organized also the transportation committee. Mr. Fullerton, vice chairman of the A.R.P. Committee stated that theoretically the organization was all right but cited the need for more practice. 6-16-11.

New Air Letter Forms Available

OTTAWA, June 15—(CP)—New air letter forms for communication with the Canadian fighting forces abroad were made available at post offices throughout the Dominion today and officials indicated there was a quick response. For a 10 cent rate the form, a combined letter sheet and envelope, is sent by air mail to members of the fighting services. The forms, which are repeated the warning that no enclosures may be made in the form which must be used to take advantage of the low rate. Enclosures are made in the letter will be sent by ordinary mail. They said a number of the form letters handed in so far had contained enclosures. We should have an organized Control Centre fully equipped and staffed ready for any emergency. This, of course, would be under the direct control of the Mayor who can delegate authority but not responsibility. His staff would do the typing and keep records that might be necessary (This staff would be the staff control). The Mayor would be the commander and from him all directions must be taken if this centre were established in a proper place so that all trials we could invite our citizens especially the participants in Civilian Defense. I am sure our citizen's morale would be strengthened and this would give them confidence in the persons trained for their protection. It will be necessary that each Corps take a course of training. Air Raid Wardens—First Aid—10 hours. Fire Defense—3 hours. Gas Defense—3 hours. General—3 hours, and drill—3 hours. Other Corps' training will be along the same line of defense with different hours on the different subjects. After the courses are completed they will receive a certificate of instruction qualifying them to wear our official emblem of the C.D.C. and the signs designating their individual corps. He has spoken about the necessity of two or three corps that I believe we have not already set up via Fire Watchers, Decontamination Squads, Demolition, Clearance and Repair Squads. Since we have about twice as many wardens as is recommended (10 to 1000) we can easily transfer their present duties to a similar one that of fire watchers. This will leave them on the same block but their duty will be different and he must know his area and report at once to the A.R.W. the exact place of the fallen bomb. Decontamination Squads—we all know how necessary these squads would be if we had a gas attack (the recommendation is 1 to every 1,000).
