

These dishes entice the appetite

In June, when the new crop of vegetables is still to come, there are many dainty dishes that will entice the appetite if Colman's Mustard is used to give them relish.

HAM SUPREME

Use a piece of ham from 4 to 5 lbs., cut from the middle of a good sized ham. Rub a paste of equal parts of Colman's Mustard, sugar and water into the ham. Put in baking dish. Pour 1/2 pint milk in pan and bake in moderate oven. Baste frequently, adding milk as needed. You will vote this the most delicious ham you ever tasted.

TOMATO CHEESE TOAST

1 tablespoon chopped onion; 1/2 green pepper chopped; 1 cup canned tomato; 1 teaspoon Colman's Mustard; 1/2 teaspoon salt; 1/2 teaspoon pepper; 1 tablespoon flour; 3 tablespoons butter; 4 slices of bread; 4 slices of cheese the size of the bread and 1/2 inch thick. Brown the onion and green pepper in 2 tablespoons of fat, add the tomato and stew until the green pepper is tender. Add seasoning and drop in flour and 1 tablespoon of butter which have been creamed together; boil until it thickens.

CHEESE PUDDING

2 cups bread crumbs, 1 large cup grated cheese, 2 eggs, 1 cup milk, 1/2 teaspoon Colman's Mustard, 1 teaspoonful salt. Bake light brown in quick oven twenty to thirty minutes.

MOCK PATE DE FOIE GRAS

1 calf's liver (20 ounces); 1/2 teaspoon black or white pepper; few grains cayenne; 1/2 teaspoon ground nutmeg; 1/2 teaspoon Colman's Mustard; 3/4 teaspoon salt; 3 tablespoons water in which a minced onion has been boiled; 1/4 cup liquor from boiling calf's liver.

ENGLISH MUSTARD SAUCE

1 pint milk; 4 tablespoons flour; 1/2 tablespoon Colman's Mustard; 1/2 teaspoon salt; 4 tablespoons butter. Heat the milk over hot water, cream together the other ingredients, drop them into the hot milk and stir constantly until thick. Serve with eggs, fish, ham or wherever a piquant sauce is desired.

FISH SALAD

1 lb. boiled fish; 2 tablespoons oil; 2 tablespoons vinegar; 1 teaspoon Colman's Mustard; 1/2 teaspoon salt; 1 cup chopped celery; lettuce; 1/4 cup mayonnaise. Flake the fish white hot, if possible, toss up with oil, vinegar, and seasonings and let cool, add celery and mayonnaise. Dip a large spoonful on to a leaf of curly lettuce and garnish with strips of pickled pepper and with mayonnaise if desired.

Colman's Mustard aids digestion

FOR THE WOMAN READER BY FLORENCE RIDDICK BOYS

WEDDING ETIQUETTE The formal wedding it is high noon, and formal dress is, of course, expected of all members of the bridal party.

Wedding invitations are sent out by the bride's mother, even those to the friends of the bridegroom, for he has given her a list of those he wishes invited.

Wedding presents are always sent to the bride, even though the groom may be your friend and you may not know the bride.

The "wedding breakfast", really an elaborate dinner, follows the noon wedding. A wedding reception is much like any other reception, except that the bride's mother makes it a special point to honor the groom's family and have them meet all the bride's friends.

When the bride and groom have been served, they retire to dress for the wedding journey, if they have one. The bridegroom is at the foot of the staircase to receive the bride as she comes down.

Cleanliness is necessary to pretty hair. The hair naturally catches and holds dust and dirt and germs, and should be shampooed frequently and brushed well daily.

Dandruff is a germ disease and is contagious. One should not use the brush or comb used by a person with dandruff.

Decorating the Church. A church was made very festive with sprays of lilies or sprays fastened to the end of each pew and on decorative parts of the altar.

Care of the Hair. Cleanliness is necessary to pretty hair. The hair naturally catches and holds dust and dirt and germs, and should be shampooed frequently and brushed well daily.

Scientific facts

NEWEST NOTES OF SCIENCE. An air chamber is included in a new sub-light board to make it unsinkable.

The first passenger railway has been opened by the government in Nepal, India. An Englishman claims to have invented a toy horse racing game with which it is impossible to predict winners in advance.

A hand socket adaptor for golf clubs has been invented to correct a player's tendency to over swing, slice or hook a ball. Czechoslovakia's fourth international aeronautical exhibition has been opened at Prague and will continue until June 16.

Measurements made by a London weather bureau show that city's annual fall of sleet to equal about six tons to the square mile. As the result of experiments experts have estimated that radio waves cannot rise more than 100 miles above the earth's surface.

Research by scientists in Kentucky has led to the belief that trees can be made to grow taller by changing their soil conditions. A floating dock has been established at Bordeaux which permits work on ships that formerly had to be sent to England for repairs.

Powerful enough to be heard by any receiving set in Europe, the new Warsaw radio broadcasting station has been placed in operation. To prevent the cords of electric irons twisting there has been invented a rod to be clamped to the edge of a table to support them.

German chemists have improved on the Batik process of dyeing so that old fabrics can be dyed lighter colors than their original hues. It is estimated that the electric power transmission and distribution lines now in use are long enough to encircle the world 20 times.

Spain is believed to have the highest percentage of blind persons of any nation, one out of every 226 inhabitants being so afflicted. Flat enough to be carried in a wallet, where it often will be seen and its use suggested, a savings bank for small coins has been invented.

For advertising purposes, an Englishman has made a knife into the handle of which more than 1850 blades of the usual pocket knife size fold. Automatic regulating apparatus has been invented for oxygen and acetylene tanks used for welding to reduce the danger of fires and explosions.

National campaigns are under way in England, Germany and Denmark to educate the public to the value of using fresh fruit in their daily food. In the case of a new electric floor lamp is a spring actuated reel to take up the slack in the wire with which the lamp is supplied with current.

The power of the Lahn river, which empties into the Rhine near Coblenz, will be harnessed for the development of mineral resources in the vicinity. Locking drink pins, a ball and socket universal joint to connect car engine piston rods with piston heads has been invented by a San Francisco man.

With each leaf weighing 500 tons, what size said to be the largest lock gates in the world have been built for the entrance to a new dock at Liverpool. Cloth woven from just proof spring steel wires has been invented to take the place of rubber in wearing and other elastic articles of wearing apparel.

When the engine of an Italian inventor's automobile is in the forward position it is locked against running backward down hill without use of the brakes. An electric siren that can be heard above city noises for three miles has been installed by a Philadelphia prison to sound an alarm when an inmate escapes.

For long distance passenger service two airplanes will be built in England that will weigh 19,600 pounds with full load and will have wing spans of 93 feet. A tank steamer that has been built for an oil company practically consists of one piece of metal, all its parts having been welded together with electricity.

A Frenchman claims to have discovered a varnish which, when applied to ordinary violins, gives them the tone of instruments produced by the most famous makers. Attracting attention both by its noise and motion, a new advertising sign is in the form of a miniature airplane that is revolved around its base by an electric motor.

The development of a new film with which instantaneous photographs can be taken on cloudy days and at night indoors is claimed by a leading German camera making concern. An English scientist has discovered that the white corpuscles in human blood, the duty of which is to combat disease germs, gain and decrease in number regularly twice each day.

A New York inventor's device for giving old oil wells steam baths to remove the paraffin and increase their flow consists of a cylinder in which water is boiled by white hot metal pellets. Inviting fast swimming fish, a German has built a speedy motor boat that takes in water through gill-like openings and expels it along its sides, which are covered with scales, to reduce friction.

A Baltimore scientist who claims to have developed an accurate method for forecasting the growth of cities has predicted that the United States will have a population of 200,000,000 in the year 2000. Although the generator of a French inventor's radio set for airplanes is driven by the pressure of the air against a small propeller, an automatic control keeps the voltage even despite changes in speed.

A metal bar enameled in nine colors has been invented by an Englishman to be stamped over the type of typewriters to reproduce colors on the colors on a machine's keyboard. The Australian postal department plans to spend about \$24,000 to improve its telephone system and build a direct line between Cairns, Queensland, and Adelaide, South Australia, one of the longest in the world.

INTRODUCING THE BANNER BETTER SERVICE This is an advertising contest to introduce The Banner Better Service. We want to acquaint you and your friends with the better grades of Banner Hosiery made from pure silk, silk and wool, and pure wool, for every member of the family, and sold at money saving prices.

WIN BIG PRIZES - SHARE THESE VALUES Every contestant who solves this mysterious message and is awarded over 100 points will be given the opportunity of gaining more points and a pair of Silk Hose free by obtaining, at money-saving prices, a selection of Banner Hosiery, Linen, etc., selected from the Banner "Share These Values" Catalogue, that need not cost more than \$3.00.

TORONTO, 2, ONT.

Trout Fishing Regulations

No person shall kill in one day more than thirty trout (30).

Everyone not being a permanent resident of Prince Edward Island, or the son or brother of a permanent resident thereof who fishes for or attempts to fish for any trout in the waters of Prince Edward Island without first procuring an angler's permit is liable to a penalty of twenty dollars (\$20.00).

Permits can be procured at Publicity Office, Charlottetown, costing two dollars (\$2.00).

The sale, purchase or export of trout, no matter where procured is prohibited, providing however, that any non-resident leaving the Province may take away the lawful catch of two days' fishing if the shipment is accompanied by a certificate that effect from either the local fishery officer in whose district the fish were caught, or from the local station agent adjacent to the locality in which they were caught.

Tourists can obtain information as to where to fish &c. on application to the Publicity Officer, Charlottetown. June 9th, 1927. A. E. MORRISON, Game Inspector.

NEW AND BETTER GABRIEL SNUBBERS

Gabriel—and Only Gabriel—is a Snubber

The Lawn

A velvety lawn is a thing of beauty in itself and enhances the appearance of the home. It requires wisdom to grow grass. If you are beginning a lawn, prepare the soil by a thorough plowing and fine raking. Make it perfectly even. Sow grass seed in the wet season. Early fall or very early spring is the best time.

It seldom pays to patch the barren space in the lawn, for the soil needs a deeper stirring up than you can give it and the patched places are certain to show for years. To patch is better than nothing, but if you can turn it all up thoroughly and begin over, so much the better. Do not cut the young lawn too close. Let it get a good stand of roots first. In dry weather do not have it as close as in more moist season, or the roots may burn out.

Surface sprinkling is not good for the lawn. It is better to give the lawn a thorough soaking once or twice a week than a surface sprinkling every night. If grass roots do not have to delve down deep into the ground to find moisture, they will stay near the surface and will be easily killed out in unfavorable seasons.

A Lovely Room. An art committee has made the following rules for making a lovely room: 1. Eliminate all unnecessary articles. 2. Throw away plush picture frames and paper flowers. 3. Do not hang curtains. 4. Paint all scratched or damaged imitation woods, if you have a good piece of old wood, mahogany

or walnut, clean and polish it. 5. Paint or paper your walls a neutral tint. Unless you have expert advice and much money, have your walls and ceiling the same shade. 6. Have one good picture—oil, water color, print or engraving—in each room until you can afford more. Photographs should be simply framed, not too many exposed, and never hung on the walls. 7. Grow living flowers in your home.

Mad-over Dresses. Dresses seldom wear out—like the "One Hors Shay"—all over at once. There are worn places in used dresses and much good material which it will pay to make over into another dress. Sometimes two old dresses can be combined to make one made-over one. It is almost impossible to match goods when making over a dress. Even goods of the same bolt will not match with that which has been worn. It is usually wisest to combine harmonizing goods and colors. In combining two colors in a garment, one should be subdued and one should predominate to produce a pleasing harmony. Soft green and neutral can be used together. A light tint of a color is pleasing with a darker shade of the same color, as tan with brown, or lavender with purple.

Emptying Tubs. The housewife who does not have stationary tubs with a drain in them can save herself the hard task of emptying out the dirty washwater by the use of a hose which reaches outdoors to a drain. She uses the hose as a siphon. It may take some practice to learn how to do it correctly, but two or three times will make it easy. Immerse the hose under the water in the tub and be sure all air is driven out of it and it is filled with water. Stop up one end of the hose with the thumb or finger, pull that end out of the tub and let it drain until it is below the bottom of the tub, then let the water run. It will run as long as one end is under water in the tub and the other end is lower than the bottom of the tub.

MRS. SOLOMON SAYS:

Father and Mother need play as much as the children do. There can be no home happiness without smiles and fun and laughter and joy. Without play, one forgets these and takes life too seriously.

A Great Puzzle To Careful Parents

One of the greatest puzzles to the careful parent is to know just what medicine to give the little ones. When the child falls ill with griping pains; is seized with cold or fever, refuses food or vomits what he has taken; when he cries a great deal and cannot get the sleep so necessary to the growing child, the parent is in a quandary. What is to be done on such occasions? As often as not there is not a suitable medicine in the house. The puzzle is what to give him to set him right quickly.

It is to meet such emergencies that Baby's Own Tablets were designed. These pleasant little Tablets quickly reduce fever, break up colds, relieve constipation and aid digestion and allay teething pains. They quiet the nerves and promote restful health restoring sleep. They are guaranteed absolutely harmless and safe for even the youngest and most delicate baby.

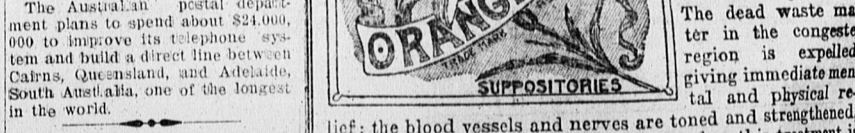

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

holding your Ointment as a relief for eczema. After using a couple of boxes, she was entirely free from sores and thanks to the Ointment her face is left without any disagreeing scars." Mrs. A. Hamilton's hens numbers 296 and 291 are 4th and 8th, with 159 points and 151.2 points each. Mr. Harold Laird's hen No. 102 is 6th with 158.5 points. Mr. Bert Brown's hen No. 181 is 7th with 151.8 points. Mr. J. L. Clark's hen No. 133 is 9th with 143.4 points, and

How on earth am I going to get it? She—That's your business. I didn't marry you to give you financial advice.—London Opinion.

It is not unusual for people to use pleasant smelling salves and lotions for diseases of the skin with the idea that they have medicinal value. This is of course a mistake. Dr. Chase's Ointment is a medicinal preparation which is composed of the most effective ingredients known to science. For this reason it is looked upon as the standard treatment for eczema and similar skin troubles. Mrs. Sadie Waid, Lennoxville, Que., writes: "My little sister's face was all covered with eczema, which even spread to her ears and was just a mass of running sores. We tried several kinds of salve, but without success, until we saw in Dr. Chase's Almanac several testimonials upon
