Pivotal New York Stocks

Table listing Pivotal New York Stocks including Allied Chemical, Am Smelting, etc.

LIVESTOCK

Table listing Livestock prices for various types of cattle, sheep, and hogs.

MINING

Table listing Mining stocks including Dome Mines, Goldfields, etc.

Fastest Jigsaw Solvers Not Necessarily Bright Declares Psychologist

TORONTO, Feb. 21—Don't get alarmed if you can't put the picture puzzle together in par, the jigsaw champions are wasting their time. Better to go to bed and enjoy a good sleep than to be kept up all night by picture hash, Sorry, experts, but that's the official appraisal of Dr. Peter Sandford, Professor of Educational Psychology at the University of Toronto, who knows about mental gymnastics of all kinds.

You may be trying your patience with a million-piece puzzle—which would be only forty feet square—but if you are developing your intellect, there are better ways of doing it. Even the most intricate fretwork does not make a good intelligence test. The fastest jigsaw solvers, Professor Sandford believes, are not necessary the mental giants.

Dr. Sandford is busy devising new intelligence tests for Ontario schools. They are, however, all of the questionnaire variety. "Don't psychologists ever make use of things like jigsaw puzzles?" a Globe reporter asked the professor. "Success with puzzles is a pretty poor indicator of intelligence," he replied. "They are sometimes resorted to when language tests cannot be employed. Puzzles have been used to grade deaf mutes. They have also been tried on immigrants when no interpreters are available."

BONDS

Table listing Bond prices for various government and corporate bonds.

N. Y. CURB

Table listing N. Y. CURB stocks including Amer Cyan, Amer Sp Power, etc.

HOCKEY AT CARLETON

The Carleton and Searlton junipers met at Carleton on February 11th to play one of the best games of hockey to be witnessed by the home fans. About five minutes from face-off, Frankie "Lavigne" Bell picked a loose puck at blue line, circled his own net went down right wing, evaded the entire Carleton forwards, circled the defense and drew Wedge to one corner of the citadel and then sagged the twine. Wedge had no chance to save. The Wright, McInnis and Mutart line-up play heads-up hockey. McGrath, Mutart defence checked heavily but could not stop the fast working Perry, Lowther and Bell lineup. A Bartlett and Wright Bartlett played defence well and Frank Gallant stopped well in net. The bell for the 1st period ending with score reading 1-0 for Searlton. Second period got away fast with Carleton trying to even the score, but could not penetrate the Searlton lineup. Perry, Lowther and Bell led countless runs on the Carleton net but to be outdone in the end by great defence of Carleton. 2nd period ended 1-0. 3rd period started fast, Carleton

Exposes Fallacies Of C. C. F. Policy

Socialist Arguments Answered Convincingly By Mr. R. K. Anderson, Conservative M. P. For Halton.

The following interesting speech is reprinted from the Hansard debate of Feb. 9:

The House resumed from Thursday, February 2, consideration of the motion of Mr. Woodsworth: Whereas under our present economic arrangement large numbers of our people are unemployed and without the means of earning a livelihood for themselves and their dependents; And whereas the prevalence of the present depression throughout the world indicates fundamental defects in the existing economic system; Therefore be it resolved, that, in the opinion of this House, the government should immediately take measures looking to the setting up of a cooperative commonwealth in which all natural resources and the socially necessary machinery of production will be used in the interests of the people and not for the benefit of the few.

MR. R. K. ANDERSON (Halton): Mr. Speaker, the resolution before the House today was moved on the first day of this month by the hon. member for Winnipeg North Centre (Mr. Woodsworth). It was discussed very ably by hon. members from this side of the House, as well as those from the Progressive, Labour and Independent groups, but Liberal members observed a discreet and possibly ominous silence. None of them has yet indicated his reaction to this resolution. Coming in at this time, when we are in the midst of an unusual depression, at a time when there is considerable unrest in the country, the resolution has created a great deal of interest in the House and country. On account of the new political party sponsoring it, and the acclaim it has received, the resolution has produced the impression in the minds of some people, that it challenges our democratic institutions. It is for that reason only that I venture into the debate.

The first clause deals with the unprecedented unemployment situation obtaining in Canada and in other lands. There is no doubt that everyone regrets the extreme unemployment and the attending distress suffered by many of our citizens. The unemployment situation which we have been produced by many forces. They are world wide in their character and have been in operation for some time. I would judge that the great and the unusual inflation following it, and the unprecedented prosperity from 1921 to 1929, have been largely the causes of our present depression. It commenced in the latter half of 1929 and by the time of the election in 1930 was well under way. It has continued since that time and we are still looking for a solution. This country is not worse off in that regard than other countries, and I compliment the government on the courage and efficiency they have shown in attacking this situation and bringing relief to our unemployed as much as possible.

Unions Oppose Railway Cut

MONTREAL, Feb. 21.—(C.P.)—When general chairman of the railway running trades unions assembly here on Thursday to present the views of the men in connection with a proposed reduction of 20 percent in the basic rate of pay, they will receive instructions from all Montreal unions to oppose the rate decrease.

The unions of this district, in addition to many in other parts of the country, have decided to offer to the railways to continue the 10 percent deduction made last year but not to accept the additional cut.

Annual Meeting St. Elizabeth's Aid Society

The annual meeting of the St. Elizabeth's Aid Society was held in the Assembly Hall, Sunday, Feb. 5th, 1933 at 4 o'clock.

The meeting was opened by the President, Mrs. C. G. Duffy. The report of the secretary was read and adopted, followed by the treasurer's report.

The President, Mrs. C. G. Duffy gave a very interesting and comprehensive report of the year's work which was a very successful one. A few kindly remarks were made by Monsignor Maurice MacDonald, Spiritual Director of the Society.

Election of officers resulted as follows: Hon. Pres. Mrs. S. R. Jenkins; Pres., Mrs. J. J. Hornby; First Vice Pres., Mrs. R. J. Ledwell; Second Vice Pres., Mrs. Thos. McMillan; Treasurer, Mrs. W. J. P. McMillan; Secy., Mrs. S. G. Peppin; Asst. Secy., Mrs. Frank Payne.

Lindbergh Was Never Dullard Tutor Declares

HALIFAX, Feb. 21.—(C.P.)—To millions of people, Charles A. Lindbergh is the "Lone Eagle" the young aviator who made the first solo eastward crossing of the Atlantic in a plane; but Dr. Richard Hamer of Halifax, remembers him as a fairly bright student in the class he conducted at the University of Wisconsin 10 years ago.

Dr. Hamer was conducting research work at the University in connection with his degree in philosophy and taught physics to a group of engineering students classed as "difficult." Young Lindbergh was a member of this group.

Although America's future aviation idol was subsequently let out from the university, after falling behind in several subjects, Dr. Hamer asserts that he was deeply interested in physics.

"While he was generally regarded as a dull student, I did not find him so," the doctor recalls. "As a matter of fact, he was usually well up among the leaders in my class."

Dr. Hamer recalls that Lindbergh was deeply interested in the deviations in the magnetic field of the earth. On one occasion, he asked if it were not possible to locate one's self at any given point on the earth without taking a position from the sun or stars, and simply by calculating the magnetic intensity at that spot.

The doctor told him at the time that this could be done and explained the principle on which such a step would be based. Later this principle was used in the development of the earth inductor compass, which guided Lindbergh over the wide Atlantic stretches when he made his famous solo hop from New York to Paris.

SUMMERSIDE and Prince County

—This column is reserved for news of local interest but advertising of a new nature may be inserted at 2 cents a word strictly payable in advance.

—BEDEQUE W. C. T. U.—On Sunday evening, Feb. 19th, the Bedeque W. C. T. U. held a service in the Bedeque United Church. Mr. William Callbeck acted as chairman. Mr. Cairns of Freetown and Mr. Hector Leard of Lower Bedeque were the speakers and each gave a very fine address on "Temperance." A male quartette by Messrs. Thos. Moyle, Fred Moyle, Arthur MacFarlane and Horace Wright, Jr., was exceptionally well rendered. A duet by Mr. and Mrs. Thos. Moyle was also greatly appreciated. The organists for the evening were Mrs. Thos. Moyle and Mrs. Jenkins. The presentation of prizes by Mrs. Archibald, to those who passed in the Temperance Exams was a very interesting part of the programme. The following girls and boys received prizes: Senior Grade: Eva Webster, Kenneth Archibald, Una Murray, Etta Jewell, Horace Jewell, Helen Bonwell, Wilda Bell, Seamen Bell, David Jewell, Hazel Jewell, Intermediate Grade: Wolfe Forbes, Constance MacFarlane, Kenneth Henderson, Wilma Reid, Betty Sharpe, Ruth Rogers, Myrtle Rogers, Betty Leard, Marguerite Craig, Arthur Murray, Junior Grade: John Forbes, David Murray. Special prizes were given Miss Eva Webster and Sidney Wright for having tried the exams for five years in succession. This prize was given by the National W. C. T. U.—S
