—SHOULD RECEIVE ATTENTION.—Many Summerside citizens are wondering if there are any truant officers on duty, as many boys who should be in school are spending their school hour time around the wharves, railway track and many other places, pitching cents, etc. Something might be done to help in this matter.

—ATTRACTIVE WINDOW.—A woodenware window of R. T. Holman Ltd., is attracting a lot of attention. Mr. Jiggs and Maggie are sketched in almost life size in the background, and the celebrated "Maggie" is in the act of bouncing a rolling pin off Mr. Jiggs' cranium. A card very aptly intimates that Holman's woodenware makes a good "lid"—"Ask Jiggs."

—HENS AT LARGE.—Though there is some kind of law on the statute books of Summerside, regarding fowl and other barnyard denizens running loose in the streets, there are enough of the feathered "biddies" loose in the streets this week, to make a "cultured gentleman" believe he was in Paradise. The two policemen in the town are rather busy, but some citizens add a lot of unnecessary work to the public duties.

—FISHING PREPARATIONS.—Local fishermen are going over their nets and traps, making the necessary fixing in order to secure the best possible catch. Several fishing boats are out in the Summerside Harbour now and it is expected that next week will be a busy one among the brotherhood as the season opens April 26th. Large catches count for more this year than usual as the market is dull and the boatmen need to make a large haul to make a living wage.

Except for certain specialties, like pickles of oil, fish is not now dutiable, and as a result the Newfoundland fisheries have a valuable market in this country.

Newfoundland authorities hold that their fisheries could not be said to constitute a menace to American fisheries, as Newfoundland desires access to the markets of this country to increase its prices and not to hammer down the American market.
