PERSONALS

Mr. E. E. Crosby, returned to Cape Breton Saturday from a short visit to this city.

Mrs. H. C. Hooper, Weymouth St., left Saturday morning on an extended visit to Massachusetts.

Frederic and Mrs. Mathieson, are visiting in Georgetown for a few days.

Piper McQueen returned to Valcartier Saturday after a short furlough here.

Rev. Mr. Banford, of Port Hill, is in city, supplying for the Rev. Mr. Bay, who is enjoying a holiday.

T. H. O'Neil of Moncton is in the city, and relatives in the city.

H. J. Palmer, K. C. and Mr. Cox, City, have returned from Halifax.

Alice Wonnacott, left Saturday morning for a short visit to her friends in an interesting event.

Pas O. Meara, of Alberton, is in the city, and relatives in the city.

Mr. R. A. Cross, of Rustico, has returned home after spending a couple of weeks with his daughter, Mrs. Ramsay Auld, Covehead.—O.

Mr. Laurence Smith, late Principal of Queen Square School, left Saturday morning for Montreal, where he will study for the priesthood.

Mr. and Mrs. O. Arsenault, have returned from Nova Scotia where a meeting of the Mutual Life's Agents was held.

Conductor John McDonald has arrived home from a pleasant visit to Vancouver. Miss McDonald who accompanied her father to the coast is now in Calgary.

Mrs. Montgomery, widow of the late Mr. G. R. Montgomery, left yesterday morning for Alberton, where she will reside in future, accompanied by her brother, Mr. W. D. White.

Mr. and Mrs. Cuthbert McLeod of Elliot, New London, drove to the City yesterday to spend a few days with their son, Gunnar, Harold McLeod of the 5th Siege Battery.

Mrs. Fred G. McLeod and children, Donald and Gale, left Saturday morning for their home in Providence, after spending the summer with Mr. and Mrs. Murdoch McLeod, Richmond road St.

As age advances the blood gets thin, the nerves exhausted and vitality runs low. By building up the nerve force, body and mind Dr. Chase's Nerve Food is an unbounded blessing to people of advanced years.

British veterinary surgeons operating upon wounded horses back of the front line. The lives of thousands of valuable animals have been saved by the ministrations of these men, and returned to the service after a few weeks or months of recuperation. The horse shown in this scene is just recovering from the effects of a bullet wound.

Divide Cost of Spraying. It may be claimed by some that spraying a few trees is an expensive matter not commensurate with the returns, be the crop ever so good. After all there is the satisfaction of having your own home-grown fruit. Much, however, can be done through co-operation of the horticultural societies to reduce the cost of spraying the trees in the home fruit garden, by purchasing larger quantities of materials than one person would need and distributing it at cost among the members of the societies. It is nothing more than a co-operative scheme that is carried on among fruitgrowers who depend on this vocation for a living, only on a smaller scale.

Cats Killed by Wholesale. Speaking at the meeting of the Royal Society for the Prevention of Cruelty to Animals in London, Mr. H. Greenwood, M.P., said that in 1915 17,000 cats were destroyed at the headquarters of the Animal Rescue League. He thought cats should have a collar with the address of the owner.

Scored Half a Run. Pitcher "Rube" Marshall, who recruited with the Tigers, revived the yarn concerning the ball that was bused by a bat—and the unique ruling made by an umpire. It happened in a game in Kentucky. The score was tied at 2 to 2 in the ninth. The home team was at bat. The clutter hit the ball a mighty belt and the ball split into two parts. One part went over the fence—the other fell inside the field. The umpire deliberated for a long time on what ruling to make. Then he decided that the home team had scored one-half of a run—and the game went to the home team—2½ to 2.

VAIN TURKISH ALIBI

Blame for Massacres Hypocritically Laid Upon Armenians

A correspondent of the London Chronicle describes the Turkish massacres in Armenia as follows: The Armenian massacres, in which 800,000 victims have perished, or are destined to perish, in exile, represent the wholesale extermination of a race. That perhaps a quarter of a million escaped to Transcaucasia does not alter the fact that the Young Turks intended to make away with them en bloc with the exception of the Armenian colonies of Constantinople, Smyrna, and one or two other ports. The reasons, alleged by their executors, were that the Armenians had been incited to revolt by the Entente Powers, in co-operation with the Russian offensive movement; that their wholesale deportation was a measure dictated by imperative military necessity, and that repressive measures were not undertaken against the Armenians until June, when they rose in Van and other places in the war zone and joined hands with the enemy.

As a matter of fact, the deportation of Armenians from places widely removed from the theatre of war commenced as early as April, and synchronized with the systematic massacre of most of the able-bodied males, so that at one blow the remainder of the population were deprived of their natural defenders. The residue, consisting for the most part of old men, women and children, were uprooted from their homes and sent across Asia Minor, the great majority on foot, until such as survived reached their destinations in the deserts of Syria. The tortured progress was unfortunate, at the mercy of their brutal gendarme escorts or of the savage Kurdish tribes who attacked them on the road, affords one of the most poignant pages in history.

The present writer, who spent two years in Armenia, in an official position, can safely say that, even in normal times, their condition was altogether deplorable. They were treated as a subject and inferior race and could get neither justice nor protection. Their only hope lay in internal reform, a vain hope, never realized in the face of determined Turkish opposition. Nor could they look for external help, as could the Greeks and Bulgars, to rescue them from Turkish tyranny.

The Blue Cross at Work

British veterinary surgeons operating upon wounded horses back of the front line. The horse shown in this scene is just recovering from the effects of a bullet wound.

WHY A DOG'S TAIL WAGS

When a dog's tail whips to and fro, it is not carrying on an aimless muscular exercise. He is signalling the thoughts and feelings which he cannot put into words. It is his own code, and varies according to the message he wishes to flash on his rearward semaphore. He has a short twitching motion that expresses anxiety and interest, a violent lashing that makes known his enthusiasm and affection, a steady whipping from side to side that spells hunger, and a motionless droop that signals defeat and discouragement. Canine experts have always been able to read these wiggles, but it took science to explain why the dog used them.

This is the explanation. When a dog is pleased and delighted he must have some outlet for his feelings. Just as a bashful boy in the presence of ladies twirls his cap or twists about his head, or as a person tickled beyond measure by some humorous ally rolls on the floor and holds his sides, the dog wags his tail. The human beings in the situations described above are, arriving through physical action to relieve the strain on their nerves. Embarrassment must be relieved through some outlet, and consultation of muscles in this case is allied with joy, and his tail, like a safety valve, takes the pressure off his nervous system. His emotions must be translated into some physical manifestation.

ALFALFA IN EAST

How to Sow and Care For With or Without "Nurse Crop"

Dr. Malte of the Dominion Experimental Farm deals as follows with alfalfa growing in Eastern Canada: When sown with a nurse crop seed is sown from the grass seed attachment of the grain drill. When sown without a nurse crop, the seed can be sown broadcast either by hand or from the grass seed attachment to the grain drill. It can also be sown in drills from the grain attachment of the grain drill. The latter case should be mixed with some coarse material to prevent too thick seeding. For this purpose ground wheat crushed as coarsely as possible is generally used. The alfalfa seed is mixed with the crushed wheat and the drill set to put on the amount wanted. For instance, 20 pounds of alfalfa mixed with 40 pounds of crushed wheat, and the drill sowing one bushel per acre will mean 20 pounds of alfalfa sown to the acre.

Whatever method used, the ground should be harrowed, and rolled immediately after sowing and the surface of the rolling lightly broken with a brush harrow, a weeder or a tilting harrow. If the land is deficient in plant food, alfalfa may be sown in rows about eighteen inches apart. By this method, however, a crop is obtained which, though it may be satisfactory as to quantity, is somewhat inferior in quality to the crop obtained when the seed is sown broadcast or in drills from the seeder.

Divide Cost of Spraying. It may be claimed by some that spraying a few trees is an expensive matter not commensurate with the returns, be the crop ever so good. After all there is the satisfaction of having your own home-grown fruit. Much, however, can be done through co-operation of the horticultural societies to reduce the cost of spraying the trees in the home fruit garden, by purchasing larger quantities of materials than one person would need and distributing it at cost among the members of the societies. It is nothing more than a co-operative scheme that is carried on among fruitgrowers who depend on this vocation for a living, only on a smaller scale.

The Central Guardian

IT PAYS to buy in this Province.

JOHNSON & JOHNSON'S will be the only Drug Store open all day Monday, Sept. 11, 1916.

MORE MEN WANTED.—No 5 Siege Battery wants three more men. 1916-9-11M31.

POLICE COURT.—A prohibition case at the Police Court Saturday against Fred Moore, resulted in a fine of \$100, and costs.

ALL ABOUT MILITARY HOSPITAL LIFE and the experiences of an army medical officer will be told by Dr. Alexander Ross, R. A. M. C., in St. James' Hall, Tuesday night at eight o'clock. Admission, 25c.

BROUGHT TO HOSPITAL.—Mr. Cephas Tweedie, Vernon River, was brought to the Prince Edward Island Hospital yesterday by Mr. G. D. Wright's ambulance for an operation for intestinal obstruction. The Canadian regrets to learn that his condition is serious.

LETTERS' PATENT.—Letters patent have been granted to John R. Memorial Stone, City, for the purpose of manufacturing, selling, and dealing in cement; Daniel R. McNeill, Summerside; Cecil Gallant, Wellington; Mrs. Ethel May Yeo, and Mrs. Winifred B. Sharp, Wellington. The capital stock is \$10,000.

ONE A P. E. F. MAN.—President Wilson has appointed Dr. John R. Mott, as a member of the Mexican commission to consider the better relations between the United States and Mexico. Mott was offered the post of minister to China by Mr. Wilson early in the latter administration, but refused it. He is prepared as few men are by experience, training, and sympathy for the delicate task which he will now undertake. The other members of the commission are: Hon. Franklin K. Lane, secretary of the interior, and Judge George Gray, circuit judge and former United States senator. Mr. Lane is a Prince Edward Island man who has made success in the United States.

JOHNSON & JOHNSON'S will be the only Drug Store open all day Monday, Sept. 11, 1916.

THE S. S. STANLEY.—The S. S. Stanley will make an extra trip from Charlottetown to Picton, leaving at 8:30 this evening, with stock for the Halifax Exhibition. She will return during the night and will leave here Tuesday morning at 9:30. 1916-9-11M11.

COAL FOR C. LYONS & CO.—The four-masted schooner, "Bertha," of Towns has arrived in Charlottetown from New York with 1100 tons of hard coal for C. Lyons & Co. This vessel will be discharging for six or seven days. Customers will kindly place their orders and take delivery of coal while discharging. 1916-9-11M21.

GAZETTED.—Notice of application for letters patent is published in the last issue of the Royal Gazette for the Island Silver Boxes. The objects for which incorporation is sought are for the purposes of engaging in the purchasing, acquiring, breeding, and selling or otherwise disposing of foxes and other fur-bearing animals of every sort and description and in the business of fur.

Circulation Prestidigitators

The sole object of the "A. B. C."—Audit Bureau of Circulations—is to protect honest advertisers and honest publishers, by doing away with circulation errors and the mis-statements of CIRCULATION PRESTIDIGITATORS.

Those publishers of newspapers, magazines, farm journals and trade publications all over America who form the great bulk of the membership of the "A. B. C.", believe that the man who buys advertising space is entitled to AN HONEST AND UNBIASED CIRCULATION COUNT—a count as dependable as a CERTIFIED CHECK.

These publishers, together with advertisers and advertising agencies, are spending their money to support the "A. B. C." to pay for the services of TRAINED AUDITORS, and they ask the support and patronage of EVERY MAN WHO BUYS ADVERTISING SPACE AND WANTS TO BUY IT WISELY.

When you place your advertising with a publisher who is a member of the "A. B. C." you are protecting YOUR OWN INTERESTS and helping to place the entire business of advertising on a cleaner, sounder, and MORE EFFICIENT BASIS.
