The two constables are out for the winter, for next spring, next summer, and—in fact their commission is to get Gun-a-noot no matter how long they are about it, and those who know the calibre of the two men realize that Gun-a-noot will come down and quit before he suffers the hardships of winter dogging around the frozen country dead of the plover. They will certainly keep Gun-a-noot on the move, for the latest advice from the North is that they are now only a few days behind him.
