

"MUST" SKEE-DOO

1 If rats or mice are invading your house, there's no time to lose. Get "MUST" SKEE-DOO No. 1—the killer of vermin. Get your neighbors to use it too!

"MUST" SKEE-DOO

2 Zzzzzz... around your head... Zzzzzz!!! No, that's one mosquito that won't bite you, if you are using "MUST" SKEE-DOO No. 2, a favorite of all fishermen and campers. Completely safe for the most tender skin.

"MUST" SKEE-DOO

3 Want to be really repulsive to mosquitoes and black flies this summer? Just read a little of that nice smelling "MUST" SKEE-DOO No. 3 Lotion on your skin. WOW!!!

"MUST" SKEE-DOO

4 Nothing destroys flies, mosquitos, ants and bugs faster than "MUST" SKEE-DOO No. 4. Spray it around your house and you won't see an insect for days and days.

"MUST" SKEE-DOO

5 One treatment of "MUST" SKEE-DOO No. 5 Lotion is usually enough to rid one completely of head lice and nits. You may never have to use it yourself, but remember the name just in case.

"MUST" SKEE-DOO

6 The modern farmer protects his cattle, poultry and other animals from insect annoyances with "MUST" SKEE-DOO No. 6 because it is 3 to 5 times more powerful than D.D.T. Try it, you'll find it more effective.

"MUST" SKEE-DOO

7 FARMERS! "MUST" SKEE-DOO No. 7 does to barns and stables what No. 4 does to your house. It kills flies, mosquitos, wasps and other insects—easily, surely, safely, economically. Use this deadly spray and you won't see an insect for weeks.

"MUST" SKEE-DOO

8 Nobody wants to live with cockroaches. With "MUST" SKEE-DOO No. 8 within reach, you don't have to. Use it and make a clean sweep of roaches and other insects. No problem to it at all!

"MUST" SKEE-DOO

9 Bedbugs? Do something quick or they'll be swarming all over the place in no time. Get "MUST" SKEE-DOO No. 9—use it once and stop worrying. Simple isn't it?

Seven Sailed For Pleasure

By Graham Yorke

"So that is where you are, my dear," he boomed, but Stephen noted that there was little heartiness in his tone. "But, of course, I might have known you would be up here with our romantically minded friend, Mr. Hylton."

Stephen felt the woman beside him tremble and for a moment he was swept with an insane desire to turn upon the millionaire owner of The Lapping and fling him over the rail into the gliding black waters of the Pacific.

"Oh, Timothy, you do say the most foolish things," smiled Lady Kitty. "I was telling Mr. Hylton that I didn't altogether agree with the story he told us earlier in the evening."

Sir Timothy granted. "And I suppose by means of a lot more romantic nonsense he's trying to persuade you otherwise."

On the contrary, sir, I found myself in agreement with a great deal of Lady Kitty's objection to my theories.

"Look here, young man, I shall be obliged if you will refrain from making yourself so free with either my wife or my guests. I shall report this matter once again to Captain Ventris. I suppose you know I have already given instructions on this matter and I'd have you know that so long as I'm owner I'm going to be obeyed."

Sir Timothy had exercised considerable restraint during the speech. He could have said a great deal more.

"I don't see any harm in it, Timothy," protested Lady Kitty. "Mr. Hylton hasn't offended anyone has he?"

"I've met your type before, Hylton," added Pointer, disregarding his wife's intervention. "It's not a type I particularly admire..."

Stephen Hylton's arm shot out, but Sir Timothy apparently divining the young man's intent stepped quickly backwards and the blow hit nothing more vulnerable than the night air.

"Please!" With a shrill cry Lady Kitty had flung herself between the two men. "Not here! For my sake, Mr. Hylton!"

Sir Timothy Pointer laughed. It was an unnatural laugh.

"I am sure Mr. Hylton will heed a woman's appeal for better manners," he sneered.

Stephen Hylton watched them go. Lady Kitty did not so much as glance at him as she accompanied Sir Timothy towards the companionway.

He felt mentally and physically sick. He'd made a fool of himself, but then, he had always been impetuous.

CHAPTER IV
What Morning May Bring
When Sir Timothy was in one of his cynical moods—just the sort of moods to which Myra Winstanley had referred in her conversation earlier that night with Hylton—Lady Kitty appreciated from experience the utter futility of stand-up argument.

"I think you are grossly unfair, Timothy," she remonstrated. "You have taken a rather sudden dislike to Stephen Hylton and you are prepared apparently to go to any lengths to blacken him. All I will say—and it is all I think necessary—is that you are wrong."

With that the woman turned on her heels and left Sir Timothy to his fuming.

When she had gone, when he had heard the door of his wife's stateroom close and the spring latch snap into place, the millionaire dropped into a chair and bit a little viciously at the remnant of his cigar.

He was asking himself what she had meant by that last remark. It had been, he considered, a clever remark—clever and evasive.

He didn't like Hylton. He remembered the attempted attack the fellow had made on him up there on deck, and he believed that had he not stepped out of reach the man would have struck him. Now he regretted having done so. If he had permitted Hylton to strike him he would have had an excellent case for stringent disciplinary action by Captain Ventris. Of course, he reminded himself, as he noted himself a stiff bridle, he could still demand that Hylton's services be dispensed with at the next port of call, and what was more he might be able to do that without exciting due comment on the part of the members of his party, for after all Sir Timothy was sensitive to the wrong type of publicity. In the morning he would have a chat about the matter with Captain Ventris, for he felt sure that Ventris would know just the right thing to do.

For the best part of the next hour Sir Timothy drank brandy. And when he reached bed the world became a gyroscope—a great grotesque whirling affair with every now and again the blurred features of Stephen Hylton appearing through the phantasmagoria. Stephen Hylton, holding in his hollow of one hand a strange looking island peopled by pygmies and all of them doing Hylton's bidding.

In his own cabin Stephen Hylton would sleep uncertainly. He could not quite rid his mind of the impression that he had made a fool of himself; that by his unpremeditated action in stepping forward to strike his employer he had made things all the more awkward and disagreeable for Lady Kitty.

Stephen lay on his back in his bunk staring upwards at the narrow white ceiling and wondering what he ought to do for the best. And he thought of this his mind instinctively swung towards Captain Ventris. He felt confident that Ventris would be able to advise him what, in the circumstances, was best to be done.

The story he had told the guests earlier that evening had gone with

Georgetown And Vicinity

Miss Bernice Fraser of Charlottetown spent the weekend in Georgetown, the guest of her grandmother, Mrs. Minnie Rafuse.

Mr. William Hook of Charlottetown was a recent visitor to Georgetown, where she visited his parents, Mr. and Mrs. Herman Lavandier.

Charles Fraser, C. N. R. fireman has been visiting his home here, for the past few days and will return to work on Monday.

Mrs. Raymond Lavandier is spending some time in Charlottetown, where she is the guest of Mr. and Mrs. William Hook.

The crew of the Georgetown-Lower Montague ferry boat commenced putting things in order on Saturday for the trip to Pictou, N. S., early in the week, where the boat will go on the slip for her annual overhauling. While she is absent the ferry service between here and Lower Montague will be carried on by motor boat, operated by Richard DeLory.

The S. S. Ekefors a Swedish ship of four thousands eight hundred tons arrived in port on Sunday morning from Summerside, where she loaded about sixty thousand bags of potatoes. While here she will load between five and six hundred corgs of pit props for the United Kingdom, loaded by the Bergmann Company. The Ekefors is a Swedish ship of late design complete with all modern facilities and accommodation for nine first class passengers. Her construction was commenced five years ago on order for the German Government but delays and missing parts, no doubt intentional, delayed her completion. Her destination in the United Kingdom is Southampton. She was brought into port by our veteran pilot Mr. Temple Gotell, and co-pilot Mr. Victor Rafuse. The pit prop cargo will be placed between decks.

WEST ROYALTY W. I.
The regular monthly meeting of West Royalty Women's Institute was held at the home of Mrs. James McInnis. Thirteen members present. The president presided. The meeting opened with the Creed in unison. Collection amounted to five dollars and eighty cents. It was moved and seconded that five dollars be given Mrs. Frizzle for Musical Festival Fee; also bills presented by Mrs. Trainor and Mrs. Miller respectively. School committee was heard and it was decided that towels and drinking cups be provided for school; also that twenty-eight cents be forwarded to the Million Member Fund; also five dollars be forwarded to the Cancer Fund. Programme committee for next meeting: Mrs. Erwin Miller, Elizabeth Powley and Velma Burke. Lunch committee to be arranged by the president. Sick committee as for previous month. It was unanimously agreed upon to invite the members of North River Institute to be present at the next meeting to be held at the home of Mrs. Russel Bell Meeting closed with the National Anthem. Lunch was served by committee in charge, assisted by the hostess.

POWNAL WOMEN'S INSTITUTE
The Pownal Women's Institute met Tuesday night, May 6th, at the home of the secretary, Mrs. Harold Acorn. The meeting opened with the Ode followed by the Creed in unison. Roll call was answered by "My Favorite Color."

SPRINGFIELD W. I.
On May 7th the regular monthly meeting of the Springfield W. I. was held in the schoolhouse, with the president in the chair. The meeting was opened in the usual order, roll call being answered by naming a perennial flower. The members discussed the sending of rags to be made into blankets, and Mrs. Keith Mayne, Mrs. Crawford Sinclair, and Mrs. Norris Sinclair were appointed committee in charge. The Red Cross secretary reported 10 pair bloomers, 3 sweaters, and a quilt handed in since last meeting. It was decided to hold the June meeting in the school house. The usual June exchange of flower

slips is to take place. Roll call is, "What I Would Like to Learn in Handicraft."
Mrs. Hyatt Haslam and Mrs. Hughes were chosen to take charge of the regular program, and Mrs. Reginald Haslam and Miss Eva Sabine were asked to prepare a Bird Talk.
Mrs. Ernest Haslam, Mrs. Arthur Haslam, and Mrs. William Haslam were appointed a committee to see about getting window boxes for the school.
The treasurer reported the completed Cancer Fund collection as \$32.50. The Institute funds on hand amount to \$81.49. A bill of \$2.40 for quilt materials was presented and paid. Collection of \$1.20 was taken, and meeting closed with the National Anthem.

Radon Gas Effective In Cancer Treatment
HALIFAX, June 2 — (OP) — While Canadians are supporting financially the campaign to curb cancer, a technician trained at Dalhousie University keeps in operation a complex glass apparatus which supplies radon gas, a weapon used in the war against the dread disease.
The radon plant now in use at the Victoria General Hospital here was developed by Dr. G. H. Henderson of the physics department of Dalhousie. His invention reduced to a fraction the expenditure the hospital would have had to make for equipment then available.
Halifax was the second city in Canada to obtain radon facilities for fighting cancer and even today there are only six cities in the Dominion with such equipment.
Radon gas is obtained from radium and provides more flexible methods for treating individual cases of cancer. It can be readily subdivided into various strengths to suit the needs of the individual patient.
Usually radium is used in the form of salt of the element, itself a minute portion of which is sealed in platinum needles. Radon, which produces exactly the same rays as radium is ordinarily used in a small piece of gold tubing called a "seed." Placed in a cancerous tumor the radon-filled seed or seeds, as the case may require, give uniform dosage. Often the seeds are left in place and the patient goes through life without being inconvenienced or even aware that they are there.
The radium is placed in a

flask containing distilled acidified water and locked in a safe. From the flask glass tubing leads to a complex system of glassware which is kept at a high vacuum. The radium steadily forms radon gas which is pumped off at regular intervals by a glass pump.
The actual amount of gas pumped off each day is no larger than the head of a pin but this

is still too great to go into the tiny seeds. The gas contains a relatively high content of impurity from the water and 998 parts out of every 1,000 must be removed.
This is done by chemical means in the glass apparatus and the purified radon is then compressed into the gold tubing to form the seeds.
