Mrs. J. Alva Green, with Mr. Green and little daughter Dorothy Ann, who have been visiting in Alberton, have returned to the City to spend the next two weeks with Mrs. Green's father, Mr. Alfred Duchemin and Mrs. Duchemin, before returning to their home in Trinidad.

When a mother detects the writhing and fretting of a child that worms are troubling it, she can procure no better remedy than Miller's Worm Powders, which are guaranteed to totally expel worms from the system. They may cause vomiting, but this need cause no anxiety, because it is but a manifestation of their thorough work. No worms can long exist where these Powders are used.

IN MEMORIAM

MR. JAMES DALTON

The death occurred at his home in Charlottetown on August 13 of Mr. James Dalton at the age of 69 years.

The late Mr. Dalton was born at St. Marks, Lot 7. After having spent the earlier part of his manhood days as a farmer in his native district, he removed to Bloomfield, where he married Miss Mary A. Barry of Egmont Bay. Of this union there were six children, viz. Oswald, Henry, Vincent and Viola, who survive. Two children died in infancy.

After suffering the loss of his first wife, Mr. Dalton removed to Charlottetown twenty-three years ago. In 1918 he married Miss Sara Edmonds, daughter of the late Henry Edmonds. He entered the employ of the P. E. I. Hay and Produce Company, and remained with this firm until his retirement several years ago.

The late Mr. Dalton was in every respect a loving kind, and sympathetic husband and father. He was honest and upright in all his dealings with mankind. He possessed a genial and obliging personality which made for him numerous friends and acquaintances. A valiant and true member of the Roman Catholic Church, he was a member of the Holy Name Society of Holy Redeemer Parish and lived up to the high ideals of this Society with a consistency that marked him as one of its most valued members. He was always ready and willing to participate in the many activities carried on in the parish.

During his illness of about four months, he was frequently visited by the Rev. Father, and was administered the last consolatory rites of Holy Mother Church by Rev. C. O'Hara, C.S.S.R.

He leaves to mourn, besides a sorrowing widow, four sons, viz. Oswald and Vincent, Boston, Mass.; Henry, this City, and Vincent, Burton, Lot 7; also two sisters, Miss Catherine Dalton and Mrs. Ernest MacGregor, both of Burton, Lot 7; and three brothers, Michael and John, Edmonton, Alta., and Ambrose, Glenora, Lot 7.

His funeral, which was very largely attended, was held from his late residence, 18 Chestnut St., to Holy Redeemer Church. High Mass Requiem was sung by Rev. C. O'Hara, C.S.S.R., and his plans well under way. A total of 4,800 applications for assistance in connection with the construction of wells, dugouts, small dams and other means of conserving water, both for domestic and general use in the farm, have been received from farmers.

The Committee intends to do all that is possible to encourage farmers to adopt the best means of holding and conserving water. A staff of engineers is now engaged in surveying farms where water is urgently needed and preparing plans for the construction of dugouts and other media.

The work of tree planting for farmstead shelters, and the study of what influence trees have in connection with wind velocity, soil drifting and other factors, is in charge of Norman M. Ross, chief of the Division of Tree Planting whose headquarters are at the Dominion Forestry Station, Indian Head, Sask., a unit of the Dominion Experimental Farms. He has been engaged in forestry work on the prairies for 25 years. Millions of trees are being supplied free to farmers from the forestry station at Indian Head and Saskatoon, as they have been for many years.

A programme of research work, having to do with the moisture content of soils in different areas is being carried out at the Laboratory of the Dominion Experimental Station, Swift Current. Another important phase of the

Subject to revision, the estimated production of maple syrup in Canada in the season of 1935 was 6,538,960 pounds, valued at \$740,145 as compared with 4,492,690 pounds, valued at \$576,450 in 1934. The production of maple syrup is estimated at 2,250,799 gallons, valued at \$2,782,275, compared with 1,328,400 gallons, valued at \$2,464,150, in 1934. The combined total value of the industry is thus \$3,522,420, as compared with \$3,040,600 in 1934, an increase of \$481,820, or 15.8 per cent.

HOW TO "BE PREPARED" - THERE IS MORE ENERGY AND BETTER BALANCED NOURISHMENT IN FOUR HEAPING TEASPOONS OF GRAPE-NUTS WITH MILK THAN THERE IS IN A SERVING OF LIVER AND BACON!

And that's not half the story. For Grape-Nuts is one of the most delicious of foods, too—delicately nut-like in taste. Crisp so that it tempts healthful chewing. Specially prepared for easy digestion. Economical because it costs only about one cent per serving. . . . Get a package from your grocer to-day.

Grape-Nuts

MADE IN CANADA

A Great National Undertaking

Work being done by the Prairie Farm Rehabilitation Advisory Committee.

Encouraging progress is already reported by the Prairie Farm Rehabilitation Advisory Committee, of which Dr. E. S. Archibald, Director, Dominion Experimental Farms, is Chairman. The work of the Committee in the Provinces of Manitoba, Saskatchewan and Alberta is designed to deal with the problems arising from drought in recent years and its twin brother, soil drifting, that have so seriously affected western agriculture and the industries and commerce generally throughout the Dominion.

The Committee was established under the Prairie Farm Rehabilitation Act, the Act being sponsored by Hon. Robert Weir, Dominion Minister of Agriculture, and passed in April 1934 by the Dominion Parliament.

The plans of the Committee are for a number of phases of work to be undertaken such as, the establishment of about 50 District Experimental Sub-Stations in farms of 640 acres each in the drought affected areas, and the carrying out of stations the methods which it is considered best to combat drought and soil drifting are being demonstrated by the owner of the farm under the direction of the Supervisor of Illustration Stations of the Dominion Experimental Farms.

The reclaiming of some sections of areas where soil drifting has been exceptionally severe is a major task in itself. This work is being directed by Dr. E. S. Hopkins, Dominion Field Husbandman. Large scale co-operative efforts by groups of farmers will undertake strip farming, the planting of trees for shelter belts around farm homes, buildings and a paddock, are also being launched. It is hoped to have whole townships included in this co-operative scheme.

Another major phase of the Committee's work is water development. The Water Development Committee, a sub-committee of the Prairie Farm Rehabilitation Advisory Committee, has established its headquarters at Swift Current, Sask., and has its plans well under way. A total of 4,800 applications for assistance in connection with the construction of wells, dugouts, small dams and other means of conserving water, both for domestic and general use in the farm, have been received from farmers.

The Committee intends to do all that is possible to encourage farmers to adopt the best means of holding and conserving water. A staff of engineers is now engaged in surveying farms where water is urgently needed and preparing plans for the construction of dugouts and other media.

The work of tree planting for farmstead shelters, and the study of what influence trees have in connection with wind velocity, soil drifting and other factors, is in charge of Norman M. Ross, chief of the Division of Tree Planting whose headquarters are at the Dominion Forestry Station, Indian Head, Sask., a unit of the Dominion Experimental Farms. He has been engaged in forestry work on the prairies for 25 years. Millions of trees are being supplied free to farmers from the forestry station at Indian Head and Saskatoon, as they have been for many years.

University Head Sees Move To High Standards

HALIFAX, Sept. 3.—(CP)—A distinct trend toward higher educational standards and quickened intellectual life among Dalhousie University's students is noted by Dr. Carleton W. Stanley, its university's president, in his 1934-35 report.

There are many indications, the president asserts, of response to "steady efforts" on the part of the professors. Reading is on the increase; students more and more are reading books they are not obliged to read. And their subject matter indicates "keen interest" in contemporary literature, in new scientific thought and in questions of the day.

"W-ful need" of more books for the university's main library is touched upon by President Stanley in his report, and he also names the following other "pressing" needs:

1. Scholarships.
2. Increased salaries in the Arts faculty.
3. Endowment for sabbatical leave in the Arts faculty.
4. Dormitories and dining hall for men's students.
5. A small building as the beginning of a University museum.

An endowment for visiting scholars and scientists. Discussing Dalhousie's charter, modified at the last session of the Nova Scotia Legislature, the president asserts the new provisions give its teachers a voice in its general policy and accords the graduates even wider power than previously enjoyed in the selection of governors.

Number of students enrolled last year was 846, of whom 65 were enrolled in King's College, a decrease of 80 from the previous year. A hundred and eighty degrees and 16 diplomas were conferred.

The university's expenditures during the last year were \$355,667 and receipts \$236,409.85, leaving a deficit of \$119,257.15. This was \$23,000.39 more than the previous year's deficit. Receipts for the year dropped by \$11,528.77.

LONG RIVER WOMEN'S INSTITUTE

The August meeting of Long River W. I. met at the home of Mrs. Wm. Profit with twelve members and six visitors present. Meeting opened by singing the Institute Lads followed by Creed. The minutes of the previous meeting were read and approved. The

Companies of Canada; the Canadian Bankers' Association; the Canadian Pacific Railway, the Canadian National Railways, and one from each of the governments of the Provinces of Manitoba, Saskatchewan and Alberta.

The Act states the Committee is to consider and advise the Dominion Minister of Agriculture as to the best methods to be adopted to secure the rehabilitation of the drought and soil drifting areas in the Prairie Provinces and to develop and promote within those areas systems of farm practice, tree culture and water supply that will afford greater economic security.

The members of the Committee receive no pay, but are allowed reasonable travelling expenses.

One of the most important of all the factors bringing about the alteration of prosperity and depression, says the Dominion Bureau of Statistics, is the output and value of agricultural products. In a country such as Canada, where agriculture occupies a large place among the economic activities of the nation, the crop yields cannot but affect the general trend of business.

Persjan Balm — the delight of dainty femininity. Imparts a fresh charm to the complexion. Tones up the skin and makes it velvety soft in texture. Cooling, refreshing, it is delightful to use. Never leaves a vestige of stickiness. Invaluable for hands, face and as a hair fixative. Wonderfully soothing and protective. Especially recommended in cases of roughness or chafing caused by weather conditions.
