## TROUSERS

Are the part of the suit most subjected to wear. The attire like the deacon's one horse shay, should have each and every portion as presentable as every other. The strength of trousers is their number. Every well dressed man should supplement his suit with extra trousers of the right material to sustain the general appearance of the suit.

No part of the attire possesses more importance. Nothing can be more incongruous than ill fitting and unfashionable trousers and certainly no trousers in town look or fit as well as those made by us at such low figures as \$3.00 and \$3.50 for good quality and fashionable stripes.
