COPPER PAINT, copper oleate, pitch, rosin, tar, cutch, in stock at Brace's. L-1598-4-26-21.

FOR TORONTO—Mr. Wm. Denby who has been spending the winter months in Summerside left for Toronto on Saturday.—S

SERIOUSLY ILL—His many friends in Summerside will learn with regret of the serious illness of Mr. Elmer Harris, who underwent a very critical operation in the Prince Edward Island Hospital last week. He is the son of Mr. Clarence Harris of Summerside.—S

"DOC" MACPHERSON SAYS: I have received a beautiful line of Spring suits and top coats selling at \$14.50 up cut by my made to measure firm the kind that fit right, quick sales and small profits is my motto. Also suits cut to your own individual measure, measured, fitted by an expert in one line only. L-1923-4-24-21.

LEAVE FOR MONTREAL—Senator MacArthur and Mrs. MacArthur leave this morning for Montreal and Ottawa. They sail on Friday on the S. S. Lancaster for England to attend the Coronation. Miss Marion MacArthur accompanied them to Montreal.—S

SUNDAY SCHOOL ASSOCIATION MEETING—Sunday School workers of the Anglican parishes of Prince Edward Island will meet at a meeting of the Sunday School Association in St. Mary's Hall on Friday 11th. Ven. Archbishop White announced on Sunday evening. A penny tea will be served followed by addresses and discussions on Sunday School work.—S

HARBOUR IMPROVEMENTS—Among the improvements to be made at Summerside this year will be the facilities at Marine Wharf for the proper and safe landing of cargoes. Mayor Robinson has secured word from Ottawa that this will be included in the work to be done on the wharf. Mr. John E. Campbell is having some necessary repairs done to the right shed at Marine Wharf in readiness for the fertilizer boats that are expected early in May from Baltimore.—S

MAGISTRATE'S COURT—Magistrate Darby held court on Monday morning when a Summerside party appeared before him for an offence against the Highway Traffic Act. The man was found guilty of driving to the common danger and fined five dollars and costs. A party from St. Eleanor's was fined ten dollars and costs under the Prohibition Act for the illegal consumption of liquor.—S

SERVICE OF SONG—The singing service of song under the auspices of the Young People of Trinity United Church was held on Sunday evening in Epworth Hall. A congregation were invited to attend. Streams replenished are the theme of a vocal solo by Mr. George Bowness; piano solo by Miss Sue Meadows; and a vocal quartette by the Misses Helen and Edith Nicholson, Peggy MacCallum and Margaret Davies.—S

PRINCE COUNTY TROUT STREAMS REPLENISHED—Princed county in coming years as the Fishery Department has placed fry in large quantities in the various streams. Streams replenished are: Brown's Pond, 7,000; Dunk River, 700; Sheep River, 11,300; Tupper's Pond, 12,000; Tyne Valley, 10,000; York River, 6,000; Wright's Pond, 200. Regulations regarding trout fishing are that it is illegal to fish more than 20 trout in one day and more than ten pounds in weight regardless of the number. Anglers should bear this in mind when they have a good catch.—S

TOWN COUNCIL MEETING—An adjourned meeting of the Summerside Town Council held last night James Evans, of Irishtown was appointed police officer for the month on trial. Councillor McCay, chairman of the Parks Committee, was authorized to remove old trees from the square and plant some new ones. He was also authorized to decorate the monument for Coronation Day. In connection with the celebration of Coronation Day Mayor Robinson informed the council that the provincial government had given a grant to the town for advertising the local papers. Councillor McCay spoke very highly of the work of Councillor Harold Schurman in modelling the Capitol Theatre and also complimented Mr. Ralph Williams on the lighting of the Centre. Council adjourned.—S

LED 1937 CLASS—Mr. Lloyd Lockerby, son of Mr. and Mrs. J. R. Lockerby, of Hamilton, P. E. Island, led the 1937 class in Agriculture at MacDonald's College, winning the Bronze Medal offered by the Quebec Minister of Agriculture and high honour diploma; also a certificate of expert mark, testing from the Dairy School of the province of Quebec. In 1935 Mr. Lockerby took the diploma course at the College and led his class receiving the Lieut. Governor's Medal. Through illness in the family he was prevented from completing the course with the graduating class of 1934 but returned in 1937 to carry off the high honours quoted above. Mr. Lockerby is receiving the congratulations of Island friends on his success.—S

DEATH OF MRS. JOHN L. TUCKER—There passed away at her home at Ross' Corner on Friday afternoon, Mrs. John L. Tucker at the advanced age of 87 years. Her maiden name was Christina Munroe. Mrs. Tucker was of a quiet retiring disposition, but kind and hospitable, and will be most kindly remembered by friends and neighbors. She leaves to mourn her sorrowing husband and two sons, Mr. Sterling Tucker of Central Bedouque and Mr. Percy N. Tucker, merchant at Ross' Corner. Also one brother, Mr. John Munroe of Summerside, to whom sympathy is extended. The funeral was held on Sunday and was largely attended. There was a short service at the house, followed by a service at North Bedouque United Church, of which she was a member. Mr. D. M. Fraser conducted the service, assisted by Rev. J. W. A. Nicholson. The hymns sung were "Rock of Ages," "Lead Kindly Light," and "Abide with Me." The remains were laid to rest in the cemetery near the church, the pall bearers being Messrs. Albert Wright, A. G. MacCaul, Cement Carriers, Clayton Blackmore, Wiltier Reeves and Norman MacMurdo.—S

GLASS SLIPPERS—Paris announces glass slippers trimmed in gold kid for Christmas. The modern Cinderella, however, will wear cotswold hose and bright nail lacquer gleaming through in the hope that her fairy slippers will be too up-to-date to disappear at midnight.

THREE TYPES OF WOMEN MEETING AGE—There are three types of women, writes Maud Dawson in Reynolds News. The first kind goes half-way to meet old age, dreads it, perhaps, and because of that fear, accents it before she needs. Sometimes she even makes a self-conscious parade of it, turning her back on the ruddy and budie, her thrills and exertions of a full existence with the excuse, "A woman of my age..." The second type dreads it, too; but lights it with a desperation whichever way you happen to view her struggles. She does battle with lipstick and slimming remedies, spends more than she can afford on clothes, takes refuge in a coy manner and kittenish pursuits, trying frantically to cheat time, her friends and herself—and falling in each. The third kind of women does not occupy herself to any extent with the question of age. Her

Friends will be pleased to learn that Mrs. Basil Haslam, who underwent a series of operations in the Prince County Hospital has sufficiently recovered to be able to return to her home in Springfield East.—S

Mrs. Manson MacNeill who has been the guest of Mr. and Mrs. E. W. Manson for several weeks, returned on Sunday to her home in Tryon.—S

SUNLIGHT

Sunlight is an essential factor in promoting health. The particular rays which have this health promoting effect are the ultraviolet rays. These are chemically active and produce vitamin D right in the body, and thus prevent the development of rickets. These rays also produce tanning of the skin, and the degree of tanning produced in this way is a good indication of the amount of beneficial effect which has been derived from the sunshine.

In temperate zones many factors tend to reduce the amount of these ultraviolet rays which reach us from the sun. Smoke and dust in the atmosphere cut off a large number of them. On this account they are greatly reduced in the winter-time and in the early morning and late afternoon when the sun is low in the sky and the rays consequently have to pass through a great distance of our atmosphere. With these things in mind, it is of the greatest importance to take full advantage of the sunshine during the comparatively short summer season when the ultraviolet rays are at their strongest.

Babies in particular receive benefit from the health-giving rays of sunshine, and sun treatments should be given according to a definite plan. In the early spring there are many mild days when the baby's face and hands may be exposed to the direct rays of the sun between the hours of 11 a. m. and 2:00 p. m. Later on, as the days get warmer, the arms, legs and finally the body may be exposed. The time of exposure should be gradually increased from ten minutes to at least one hour twice a day. The duration of each sunbath should be carefully watched by the clock and increased by 3 to 5 minutes each time, so that the baby's skin does not get burned.

Babies as well as older children should have a good coat of tan by the time the days get cooler in the fall and this probably as much as any other factor will help them to withstand the colds, influenza and pneumonia which occur in the fall and winter months. Be sure your children get a healthy coat of tan during the summer and they will have fewer infections during the winter.

Questions concerning health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

FOUR DUCHESSES, ALL DRESSED ALIKE WILL ASSIST WHEN QUEEN ANOINTED

Four duchesses who will hold the canopy of cloth-of-gold over the head of Queen Elizabeth while she is being anointed during the coronation ceremony here May 12 have been chosen by the queen.

In accordance with tradition, they all are young, are of ancient family and good-looking.

The duchesses are the Duchess of Norfolk, the Duchess of Buccleuch, the Duchess of Rutland, and the Duchess of Roxburghe.

The husbands of two of the canopy-bearers will also take part in the ceremonies—the Duke of Norfolk, as Earl Marshal, and the Duke of Buccleuch, as Lord Steward of the Household.

All four duchesses will be dressed alike. Over her dress each will wear her peeress' robe.

Her Majesty also has chosen six ladies who will carry her train at the coronation.

They include Lady Iris Mountbatten, 17-year-old daughter of the Marquis of Carlisle; Lady Ursula Manners, elder daughter of the Duke and Duchess of Rutland, and Lady Elizabeth Paet, 20-year-old daughter of the Marquess and Marchioness of Anglesey.

The trainbearers with the mistress of the robes, take a prominent part in one of the most impressive moments of the entire coronation.

After the queen has been anointed and crowned she walks slowly from the sacralium towards the King's throne, and makes an obeisance before him.

As she does so the mistress of the robes and the six trainbearers bow with her and then range themselves behind the Queen as she takes her place on her throne.

The girls will all be dressed alike.

SLUGGISH SYSTEM WILL CAUSE BLACKHEADS

Blackheads or whitheads are an indication of sluggishness. Remember that a clogged digestive system is a forerunner of clogged pores, so ask yourself if your diet is sensible, if you take enough exercise, or if elimination is complete and regular.

Railway Man Addresses Saint John Rotary

SAINT JOHN, N.B., April 26—What the railway has accomplished in the last few years of comfort and pleasure to travel and the interest taken by the average railwayman in seeing that the passenger enjoyed his trip, was the theme of an address delivered before the Saint John Rotary Club at their regular noon luncheon today by A. A. Gardiner of Montreal, Que., Asst. General Passenger Traffic Manager of the Canadian National Railways.

One of the greatest returns railwaymen receive for their efforts is the intense interest connected with their work, Mr. Gardiner said. This interest frequently displays itself from the very first contact with the Patron. The experienced ticket clerk at once recognizes in a shy and hesitant enquiry for a trip to Niagara Falls a honeymoon trip. One of the experienced gatemen of the company located at an important terminal knew the names of the travellers on their journey. He had fixed as a formula the fact that whenever a young couple passed out to the train and both were wearing new boots they were off on their honeymoon trip. These and similar phases of recognition is what enables the conductor to make people feel at home. He does not see merely so many passengers but counts them in terms of "guests" and regards it as a duty to make them feel thoroughly at home.

After some years in which they were met with intense unreluctant competition the railways in these latter years have made a very remarkable comeback. Coach excursions, which continue to move on an average of one thousand passengers a day, have not only restored the railway travel habit to many who for years had given it up, but a number of initial railway trips are being made on these excursions by younger people, old enough to vote but who had previously never ridden a train.

To those who have had a trial, air conditioning and the added comfort and attractiveness of the equipment has been an ever increasing delight. Succeeding generations of railway car builders had somehow or other failed to ask themselves the question "why should the interior of a railway coach be dull and dreary? Perhaps it was a carryover from the old stage coach days, where regard was had for the effect of mud splashes from the wheels of mud-carrying coaches through the partly open windows, or perhaps it just happened. Nowadays, however, there is a definite trend to make not only the exterior of the cars effectively attractive and as nearly streamlined as the conditions permit, but the interiors are being "cheered up". The dining car, with every window a constantly changing landscape picture and also responding to this trend towards popularization and substantially reduced charges are greatly increasing the patronage of this necessary means of providing for material refreshment by an unadulterated pleasant means of willing away the time on the journey.

The railways have shown, especially in these last few years, that they are well in step with the aim of modern civilization as described by a noted French writer. He said that the aim was to get a pleasure of each necessity; for example, to travel is a necessity. The railways have made travelling so much of a pleasure that many travel without the necessity for the mere pleasure of doing so. Eating is a necessity. Dining car meals most fully meet the aim by making the act a high and enduring pleasure. And so on.

Mr. Gardiner related several instances of his own experiences with interesting and distinguished ushers of the National system, particularly that of the recent trip with their Imperial Highnesses, Prince and Princess Chichibu of Japan who crossed Canada by the Canadian National on their way to the coronation which he stated would for long stand out as a movement particularly replete with human interest.

With a word for the heroism of the men who labor in all weathers, that the trains may go through on time and the assurance that nothing was in sight that could replace railway as a safe, reliable, everyday, essential servant of the Canadian people, the speaker asked his hearers to continue their sympathetic interest in the railways of the country and to continue to look for the adoption of new and improved methods as experiments proved their worth and economic conditions permitted.

Carleton and Vicinity

Mr. and Mrs. Kenneth Cameron, of Cape Traverse, have removed to their new home in Augustine Cove.

The Borden Young People's Union met Friday evening in the Union Hall. Following the opening hymn prayer was led by Patsy Chappell, and the Scripture was read by John Jay. A reading from the Pathfinder was given by the President. Roll call was answered by the name of a favorite song, with a chorus of members present. The minutes of last meeting were read and adopted, followed by the Singing of hymn 501. Reports from the Sick, Look-out, and Press committees were given. It was moved that a letter of appreciation be sent to each of those outside of the Young People's Union who took part in the three one-act plays put on by the Union. Hymn 349 was sung and all joined in the mazzah benediction, after which a number of games were much enjoyed by all.

The April meeting of the Carleton Women's Institute was held Thursday evening at the home of Mrs. (Dr.) A. M. Bell. The meeting opened with the Institute Ode, followed by the Creed in unison. The minutes of the last meeting were read and approved.

Roll call was responded to by "Random" fifteen members and one visitor being present. Two new members, Mrs. M. Wadman and Miss Hattie Ross, were welcomed.

The Sick Committee; Mrs. Nathan Bell and Mrs. R. A. Hardy reported fruit sent to sick in the district. The School Committee; Mrs. Harry Doull and Mrs. Kenneth Muttart visited the School and it was decided that the Institute provide something as a dust preventive. A grab bag sale was held and the sum of \$1.50 realized. Collection and membership fees amounted to \$1.45. Next meeting is to be held at the home of Mrs. W. E. Bell. The roll call to be answered with a "Fact about Coronation." The new lunch committee is: Mrs. (Dr.) Bell, Mrs. Harry Muttart and Mrs. Kenneth Muttart. Dr. A. M. Bell then delivered a continuation of his address on "Nutrition." He spoke about vitamins, proteins, and stressed the importance of prevention of too great an amount of acid in the human system, death resulting from an excess. Therefore we should eat alkaline forming foods, as the potato Miss Margaret Woolner, seconded by Mrs. R. A. Hardy moved a vote of thanks to Dr. Bell. A humorous reading "An Old Maid" was very ably given by Miss Margaret Woolner and was very much enjoyed by all. A dainty lunch, was served by the Lunch Committee assisted by the hostess brought a pleasant evening to a close. D.

"SPRING NEVER BRINGS BLEMISHES TO MY COMPLEXION. MY DAILY DASH OF ENO BEFORE BREAKFAST SWEEPS AWAY POISONS—KEEPS ME FIT! YOU TRY ENO!"

ENO'S 'FRUIT SALT' the pleasant alkalinizing corrective

Cockroaches Menace to Public Health

The common cockroach is the potent carrier of numerous disease organisms. s Investigator have shown that the cockroach can pass through the digestive tract of the insect's excreta. Among these, to name only a few, are included the bacterial that cause tuberculosis and typhoid; also pathogenic streptococci, and the protozoa that cause dysentery. As cockroaches will feed on human sputum there is real danger that tuberculosis might be spread in this way, particularly in public eating places. In addition, it is known that cockroaches serve as the secondary or intermediate hosts of parasitic nematodes or round-worms, one species of which causes a form of cancer in rats and mice. In view of their menace as disease carriers, and also because they contaminate human food with a persistent fetid odour which comes from secretions of certain of their glands, the control of cockroaches is of general public interest. These insects have flattened, horny bodies and large spiny legs, which enable them to move quickly and take refuge in cracks and other small crevices in walls, floors, etc., where they usually remain hidden during the day and emerge at night to prow about in search of food. They are practically omnivorous, but particularly favor human foodstuffs, and on this account are usually most numerous about kitchens and pantries and similar situations. Infestations may often be detected by the presence of the cast skins and empty egg capsules, even when the living roaches have escaped notice.

Moncton Juveniles Win Maritime Hoop Title

NEW WATERFORD, N. S., April 25—New Waterford Strands defeated Moncton Vulcans, 46-35 here Saturday night in a Maritime juvenile basketball playoff but failed to overcome all of the 16-point lead run up by the New Brunswick champions in the first game and dropped the series, 77-82.

It was a rough and tumble battle from the start. Strands, aggressive and determined to pull out victors in the series, forged steadily ahead in the first half and took a single point lead on the round before faltering. With the score 24-7 against them, Vulcans staged a comeback and the half ended 32-17.

The Moncton team adopted a five-man defensive system as the game opened but it was riddled by the quick-passing offensive staged by Strands. The Cape Bretoners dug in from the start and were leading 19-7 when the Vulcans called time out. Strands added another three points when play resumed and then tossed a field basket to take the lead in the series.

Vulcans retaliated with a penalty shot that was successful and a field basket and from them on the teams kept pace. At half time the score was 32-17.

Moncton cast aside their defensive tactics as the second half opened and repeatedly went in under Strands basket for lay-up shots. Strands called for time out with the score 39-27 in their favor but Vulcans came back with two field goals and two successful penalty shots and then tossed another field goal.

With two minutes of play left Strands tallied four more points but it was their last effort.

THE KING'S GOLDEN CAPE

When King George VI is invested at his coronation he will wear the golden cape made for King George IV, 116 years ago. It was also used for the coronation of King George V, and is now being reconitoned by the ladies of the Royal School of Needlework in South Kensington, London.

CARNATION PINK

Carnation pink is holding the spotlight these days. It ranges from delicate pink to the deeper shades, and is introduced as the main color as well as an accent. Combine it with black, navy or brown. It also makes a splendid complement for multi-color weeds.

Start planning your seed order. It is none too soon, as stocks of many varieties may not be available when planting season arrives.
