HEATING BY ELECTRICITY.

For the purpose of determining the desirability of heating office buildings by means of surplus electricity, the Washington Water Power Company of Spokane, has been experimenting for the past three years, and has just announced that the plan is practical.

standard coal-fired boilers. In the "electric-steam" boiler the electricity is introduced into the boiler in so-called "cartridge units." The chimney or flue is closed and a fan used to circulate the hot air through the tubes of the boiler.

IN REFUTATION OF AN INCORRECT STATEMENT

It has been brought to our attention that a report is being circulated to the effect that we have very much curtailed the manufacture of our products at our Halifax factory—in fact, we are told, it is being said that we are only maintaining warehouses at Halifax and St. John, at the present time, and that the manufacture of our goods for the supply of the provinces is being entirely handled by our Montreal works.

Being satisfied that this canvas (for we feel it to be such) is not calculated to assist the development of our very extensive trade in the provinces, we wish to emphatically state that the situation is exactly the reverse of the one described. WE HAVE NOT CURTAILED AT HALIFAX, as a matter of fact the output at our Halifax plant has shown an increase every month this year as compared with the same months in any previous year.

With regard to business in other sections of Canada, we would say that our sales to date show very large increases over any previous year.

Do You Want a GOOD Organ? Then, Here is One for Only \$95.

Here, today, at a comparatively insignificant price, you can buy the Famous VOCALLION Church Organ and this is undoubtedly one of the very best organs that brains can devise or hands can build.

The Vocallion has an improved device in a knee swell that opens to the whole top of the organ, giving a greater volume of tone than is possible with other organs.

With its 9 sets of reeds it gives the full complement of octaves—and hundreds of other features are incorporated in its construction that mark it as an organ far above the ordinary.

This Vocallion, in its beautiful oak case, is a real work of art, in every sense. Though somewhat used, it does not bear a mar or scratch and is practically as good as when it left the makers hands.

The Vocallion Church Organ offered here today is worth \$150 of any person's money—now \$95. Call in and see it today—tomorrow it may be sold.

ADDRESS AND PRESENTATION

The semi-annual examination of Warren Grove School was held on Thursday the 29th inst.. There was quite a gathering of parents and visitors present. The teacher was assisted in the examination by Mrs. Frank McLean, Miss Evelyn Younker, Miss Grace Vickerson, Mr. H. F. Saunders and Mr. Earnest Warren, who expressed themselves as highly pleased with the progress made in the different branches which reflects credit of the highest order on the teacher, Miss Hazel White who has proved herself most painstaking and efficient.

Dear Teacher:—We wish to tell you how very sorry we all are to hear that you are about to leave us. We have spent three very happy years together and in all that time we have ever found you the same faithful loving teacher. We know that you have worked very hard to help us in our studies and to advance our school in every way; and although you may have kept us all hard at work, never allowed us to forget our duties still you were always kind loving and gentle with us. We all felt you were our friend as well as our teacher, and now dear teacher will you kindly accept this little present from us with our love and sincere wishes for your happiness and success wherever you may be.
