

You'll appreciate this new convenience in your home—

Old Dutch Holders, In Colors!

Old Dutch Cleanser has so many uses around the home that it's good practice to keep a can handy in the kitchen, bathroom, laundry and garage. With this idea in mind, we have designed an attractive metal holder which comes in a choice of three colors... green, blue and ivory. Select the color which harmonizes with the room where it is to be used.

There's nothing else like Old Dutch; you don't need several styles and kinds of cleaners. Think of this added convenience in Old Dutch; it's all you need for all your cleaning.

Cleans Quicker—quicker than anything else you can use. Help yourself to more time with Old Dutch.

Cleans Safely... because it contains no harsh, chunky grit and doesn't scratch. Old Dutch protects the surface. Keeps lovely things lovely. And it's kind to the hands.

MADE IN CANADA

It is easy to obtain one of these holders!

Clip out from three Old Dutch Cleanser labels the windmill panel appearing above the directions. Mail these, together with 10c and your name and address. Fill out the coupon today.

New Designs In Building

CHICAGO, Sep. 1. (U.P.)—There will be no end, almost terrifying vistas to dampen the enthusiasm of the visitor to Chicago's Century Progress Exposition in 1933. Both in architectural design and arrangement, the buildings of the exposition mark a radical departure from the traditional method of laying out exposition buildings, streets and exhibits.

Extending for three and one half miles along the lake front, the fair will cover about 700 and 800 acres, including the area of the lagoon between Northern Island and the mainland.

The exposition will not be symmetrical. There will be no regular marking off of squares and blocks. Contrary to the old fashioned plan of one grand central concourse, or "midway" stretching on into eye-balling distance, the fair in 1933 will have no single avenue extending straight through the length of the site.

Flat Appearance

The exposition will present rather a flat appearance. With one exception there are to be no tall towers or buildings. The one notable exception will be the Tower of Water and Light, which will rise above the tallest sky scrapers of Chicago. The Travel and Transport building, 1,000 feet long, with not a window in it, boasts the largest unobstructed space under any dome in the world. The dome, suspended by cables from the huge pylons around its circumference, is 125 feet high and 300 feet in diameter. The Administration building, a silver and black structure, and shaped like a huge letter 'A', now houses the executive offices of the laboratories and work of the experimenters. Its roof is composed of unsmelted corn-cobs and its walls are made of newspapers. Footsteps along its aisles are noiseless. Very little old-fashioned carpentry or masonry

went into its construction. Wrenches and screwdrivers were the chief tools of the workmen who built it.

Many More Buildings

Many buildings remain to be constructed. Besides a complete European village containing examples of European culture and handicraft, a market place and cathedrals, a replica of the Mayan temple known as The Nunnery at Uxmal is to be erected. Plaster casts of its exact dimensions have been secured by expeditions to Central America.

Most of the space in the Travel and Transport building already has been rented to transportation companies. A grandstand will be erected for the Pageant of Travel delineating the history of locomotion.

The Hall of Science, now under construction, was designed by Paul Philippe Cret, of Philadelphia, winner of the 1931 Bok prize for citizenship.

AGED WOMAN TELLS STORY OF INDIAN HEAD ON PENNY

United Press
FALLS CITY, Neb., Sept. 2—Add to your list of famous debunkers, Mrs. Sarah Peck, 91 year old resident of this city.

For those Americans who believe the feather bedecked head, which appears on the Indian penny, is that of some Indian, Mrs. Peck has this information.

The "Chief" was not an Indian at all. The picture is that of a little white girl, Mrs. Sarah Longacre Keen, a distant relative of Mrs. Peck.

As a girl of 12 Mrs. Peck visited her father at the United States mint at Philadelphia, where he was employed as chief engraver. A competition was on for sketches for the design for the new copper cent.

A number of Indians with their chief, visited the mint. The chief let the little girl wear his head gear. The effect was so striking that the father made a sketch, submitted it in the competition and won the award.

CENTRAL GUARDIAN

HARNESS.—A few sets Driving Harness at \$17.50 per set. Get a set while they last. A. Horne & Co. 8437-9-3-11.

PERSONALS

Mr. F. T. Morrow, Dairy Produce Grader, left Saturday morning to judge the cheese and butter at the Halifax Exhibition.

Mrs. R. Y. Russell and her family, of Montreal, who have spent the summer at Holland Cove, P. E. I., are returning home to Montreal.

Miss Claire Harrington of Montreal, has returned from Holland Cove, where she spent several weeks.

Control Disease In Vegetables

(Experimental Farms Note)

Storage losses of vegetables are usually occasioned by the activity of various fungi or bacteria, or by improper conditions of temperature, moisture and aeration, which directly cause internal breakdown, or indirectly favor the development of disease producing organisms.

Vegetable storage rots may be due to the continued activity of virulent field parasites, or to the action of a group of weakly parasitic, surface inhabiting forms. The latter group are apparently the more active in causing storage rots in this section of the country. While often found contaminating the vegetable surface in the field, investigation has shown that unsanitary storage cellars are occasionally the source of infection. As a group of these parasites are incapable of causing rot if the skin of the vegetable remains intact, but once the surface skin is broken, they rapidly cause decay. In consequence it becomes apparent that careful consideration should be given to the quality, maturation, harvesting, sorting and packing of the intended storage product. Any carelessness in regard to these factors will result in heavy storage losses.

Commonly, storage diseases are due to unfavorable conditions of temperature, moisture and aeration. Singly, or combined, these environmental factors may be responsible for the development of discolorations, the loss of natural flavors, speckling and internal or external breakdown. The control of these diseases is easily affected by maintaining the proper environmental conditions, suitable for the stored product.

The Division of Botany, through its Provincial Pathological Stations has carried on investigations relative to the control of storage diseases. Farmers desiring further information should consult the Plant Pathologist in their Province.

Campbell's SOUPS PRICE LOWERED

Since Campbell's Soups Are down in price, I'll practise thrift And eat what's nice!

Immediately after the ceremony, Rev. and Mrs. Trueman left for a month's wedding trip to Quebec, the Saguenay River and the Laurentians, after which they will take up their residence at Grace Church rectory, Montreal.

The bride who is a graduate of Mount Allison, Sackville, taught arts at Edgell School, Windsor, for a time and for the last two years has been Y. W. C. A. secretary in Montreal.

The groom is a graduate of the Saint John High School and King's College, Windsor, N. S. He has served in various parishes of New Brunswick including Sackville and

Emile Penny, daughter of Judge William F. Penny and Mrs. Penny of Carbonar, Nfld., and Rev. George Edgar Trueman, rector of Grace church, Montreal, and son of Mrs. Trueman and the late E. F. Trueman, of 70 Dufferin Row, West Saint John.

Prof. J. F. Browne, organist of the church, rendered appropriate nuptial music during the ceremony. The bride who was given in marriage by the groom's brother-in-law, Gerhard DeGeer, was becomingly attired in beige crepe and lace with black and white figured chiffon trimmings of rust. She wore hat,

shoes and stockings to match and carried a bouquet of Tailsman roses and autumn flowers in shades of rust and gold. The bride was attended by her sister, Mrs. J. R. Saint, of Montague, P. E. I., who was wearing figured chiffon with black hat and accessories to match. Leonard C. Rudolf, of this city, attended as groomsman.

Mrs. Trueman, mother of the groom, was wearing black lace with hat to match; Miss Edith Trueman, of Montreal, sister of the groom, wore a black velvet costume, while Miss Freda Lee, of Montreal, wore black and white figured chiffon with hat to match.

Prince William. He also supplied at St Paul's (Valley) Church, Saint John, for three months following the departure of the then rector, Ven. Archdeacon Crowfoot. He has been rector of Grace Church, Montreal, for the last three years.

A large array of handsome wedding gifts testified to the esteem in which both bride and bridegroom are held by their many friends.

He—I spotted you bathing this morning with your rubber hippopotamus.

She—Pardon me, but that was my mother.
