One morning last week a number of laborers were about to begin discharging the schooner B. S. Kaefer, loaded with limestone, after having brought the necessary gear to the Railway wharf some delay was caused by a very mean and contemptible act of cowardly scoundrel, who, when the men were away, cut the fall used in discharging the vessel. And only by chance was it observed by one of the men engaged in the work, a dreadful fatality might have been recorded. Such an act is unworthy of civilization, and deserves a well merited reprimand of every man in the community. A reward is being offered to the person who will give such information as will lead to the conviction of the parties who committed this foul deed.

Rumors were current in Halifax last night that H. M. S. Cornwall, which went to Clark's Harbor to assist in towing H. M. C. S. Niobe to Halifax, had touched a rock, but had got off again without much damage. Investigation showed this rumor to be baseless. The marine department officials had heard nothing about it. The Cornwall passed Halifax harbor at 6 o'clock Saturday morning on her way west, and with clear weather should have reached there at three or four o'clock in the afternoon. Her instructions were to proceed cautiously and there is no doubt that the warship would take no chances whatever. It was very thick all of yesterday, and the fog to Halifax certainly did not start. It would only be attempted in clear weather. Yesterday it was the very opposite to this, a heavy bank of fog enveloping the whole coast. So far as known the marine department had no dispatches from Clark's Harbor yesterday.

A grocer, one of the meanest of men, was one day serving a customer with a pound of butter when, just as he was about to pull it off the scales, the customer said: "Excuse me, but that is not correct weight."

"Well," replied the grocer, "I am allowing for that fly that sat on the weight."—Tit Bits.

A REVIVAL.

William A. Sunday, quondam professional revivalist, closed the evangelistic season of 1910-11 the other day with \$70,507.77 to the good as a result of his year's work "winning souls to Christ."

United States has drawn for the same time, is evidence that from a monetary standpoint evangelistic work is more profitable than playing professional baseball. The Rev. Mr. Sunday recently refused an offer to go back to the "major" once more. The inducement was but \$500 a month. Seven thousand a month looks better to Billy. Besides he thinks he can do more good in the world preaching than playing ball.

FOREST WEALTH OF CANADA

The central line of the forest belt of the Dominion may be described as starting from the vicinity of the Straits of Belle Isle and following a west-southwesterly course till it passes to the south of James Bay; then

turning northwest it follows this course all the way to the border of Alaska, opposite the mouth of the Mackenzie River, the total distance being 3,700 miles. The average breadth of this belt on the basis of measurements at ten almost equal intervals, is 700 miles, giving an approximate area of the northern forests, in which the black and white spruces are the prevailing trees, of 2,500,000 square miles. Bearing in mind that the great bulk of the paper consumed in the world is made from spruce wood, Canada has in the area mentioned the raw material to enable her to become the centre of the world's supply of paper. This subject will be reverted to later. For the moment some figures relative to the present values of Canada's forest crop are worthy of notice.
