**A MONUMENT**  
 The height of your social position and your self-esteem is in part determined by the way you look after the graves of your dead. You can't afford to lose your self-respect and the esteem of your acquaintances by caring for that little mound in "God's Acre" in a shabby and careless way. For a little cost, on easy payments, we can help you to beautify your relative's grave.  
 Call or write for details and prices.

**MACARONI A TEMPTING SUBSTITUTE FOR MEAT.**  
 That is, if it's Prepared According to Mrs. Scott's Fine Recipe—Made Into Croquettes.  
 By Leigh Mitchell Hodges.  
 Hot weather minimizes man's craving for meat, and this is well, for we eat too much meat the year round.  
 When the thin Miss Mercury gets to flirting with the humid old Mr. Ninety, beef, pork, and mutton lose much of their charm, and the fact that they are still unreasonably high in price doesn't bother the thrifty housewife so much as it did a month ago.  
 Yet fresh vegetables, however good and plenty, do not completely satisfy the habitual meat-eater, hence the necessity for some sort of a substitute for the roast, fry or stew.  
 And in macaroni we have one of the best, according to Mrs. Anna B. Scott, who has made a study of such things.  
 Macaroni croquettes as made according to Mrs. Scott's recipe, are an admirable meat substitute. To make enough for four persons—two grown-ups and two children—requires the following materials:  
 One cup elbow macaroni, one cup milk, one tablespoon each of butter, flour, grated cheese and chopped parsley, one teaspoon grated onion, half teaspoon salt, dash of paprika or white pepper, one egg and a small quantity of bread crumbs.  
**CONVICT SAID NOT A WORD FOR SIX YEARS.**  
 Mystery as to Identity of a Tramp Convicted as a Wrecker Unresolved—No Sound or Complaint.  
 Serving the six years of his life sentence for wrecking a train on October 31, 1903, John Devine, convict No. 5954, died in the Colorado penitentiary a few days ago. He was also known as a man of mystery, for from the first minute he entered his cell and heard the door clang behind him and locked, he never gave utterance to an audible word, not even when he was dying.  
 Devine was taken to La Junta, where he was tried. To place the blame for the wreck on the shoulders of Devine would explain away a rotten roadbed and out-of-date rolling stock. So the poor, friendless tramp was sent to Canon City to serve the remaining years of his life as a prisoner at hard labor.  
 It didn't matter that the rotten condition of the roadbed and defective rolling stock of the road was a matter of common knowledge; it didn't weigh an iota in the scale of justice that no wrecker could be so blinded by folly as to choose an open country, where for miles one could scan the prairie to an unbroken horizon, for the schemes of plunder.  
 With the clanking of the prison gate behind him, the fastening of the number "5954" to his striped coat, the shaving of head and beard, Devine, the tramp, entered into a silence with seven years of prison events and human needs were unable to break.  
 As man and prisoner Devine was utterly alone. He wrote no letters nor did any scrap of writing ever come to him from the outside world, who he was or who his friends might be.

**COME ON IN; THE WATER'S FINE!**  
 By Bishop McIntyre  
 O vision of my vanished youth, O placid far-spread pond,  
 Sleeping beneath the summer skies, with sloping hills beyond,  
 High over thee in circles wide, the hovering hawk doth go,  
 And deep within thy mirrored breast its image saileth slow.  
 There, at the boyhood playmates whom my happy fancy sets  
 Into that picture of the past, like nude, slim statuettes,  
 Stands ready for their leader's call, upon the grassy shore,  
 The whispering woods behind them, the elm trees bending o'er,  
 When up the diver dripping comes, beyond the water line,  
 And flings the ancient challenge, "Come on in; the water's fine."  
 Sweet is the song of that swift stream, which pleasantly doth plash  
 Its way toward the mossy mill, and sweet the limpid dash  
 Of that slow-moving day long dole toiled amid the foam,  
 And sweet the food which leaps from out its home  
 In that high dam, and with its welf of soft-descending spray,  
 Shot through the warp of slanting light, waves sunset banners gay.  
 Sweet is the cadence of the birds amid the beechen boughs,  
 And sweet the bells, when lowing herds came to the brink to browse.  
 But sweeter far than stream or wheel, cascade or well or knee,  
 Is that old cry, of days gone by, "Come on in; the water's fine!"  
 Dear leader of our youthful band, since you have gone up higher,  
 Do you think of those who loved you in the land of heart's desire?  
 As I stand again in memory, by our well-known swimming place,  
 You seem to rise before me, brave in all your boyish grace;  
 And I dare to speak unto you, as when first I felt your loss,  
 For I am drawing nearer to the river I must cross.  
 And say that when my feet dip down at last to Death's cold tide,  
 And I stand alone and shrinking up on its earthy side,  
 It would comfort me, my comrade, if you'd cheer me, brother mine  
 To hear you calling me, "Come on in; the water's fine!"

**COMMONWEALTH HOTEL**  
 Opposite State House, Boston, Mass.  
 Offers rooms with hot and cold water or bath, and includes free use of public shower bath. Nothing to equal this in New England. Rooms with private baths for \$1.50 per day and up. Suites of two rooms and bath for \$1.00 per day and up. Dining rooms and cafe first-class. European plan.  
**ABSOLUTELY FIREPROOF**

**Oakley Baron**  
 REGISTERED NO. 42948.  
 RECORD 2:23 (4)  
 AN IDEAL SPECIMAN OF THE AMERICAN TROTTER.  
 Handsome, Richly Bred and a Game Race Horse.  
 All agree that the Wilkes is the leading speed producing family in America. The number of performers in standard time sired by George Wilkes (2:22) and his sons, and produced by his daughters, is 3381. The nearest competitor Electioneer has only 2040. The fastest in the Wilkes family are inbred, Oakley Baron (2:23) is an inbred Wilkes. He is a direct descendant on the male and female line of George Wilkes through three of his best sons, Baron Wilkes (2:18), Onward (2:25) and Bourbon Wilkes. He is a magnificent individual, has all the qualities required in a sire, soundness, size, speed and beauty. His progeny sell for highest prices. Almost impossible to buy one. Oakley Baron is without doubt the best bred and handsomest stallion on the Island. He early speed points to the fact that it is born with him. He will transmit it. At the Amherst Horse Show this spring, colts by Oakley Baron won first prizes in the two and three year old classes. His oldest colts are three this spring, of 1910 at the owner's stable, 254 Kent St., opposite King Square. Service fee \$15.00 cash or note payable Nov. 1st. Usual return privileges.  
 W. S. McKie,  
 Owner.

**Monumental Work**

**CONTRASTS IN CANADA.**  
 (By Benjamin Karr.)  
 Compared with the United States, the Dominion is a country of very moderate admixtures of races and nationalities. The French element in Quebec is not much fused with the British stock. It simply fills and dominates wide districts.  
 There has been no such heaping together of immigrants from all parts of Europe and several countries of Asia. The immigration from the European continent has been much smaller, not only in actual bulk, but relatively to the population of the country to which it comes.  
 Yet there are truly astonishing contrasts in Canada. The new and the old are farther apart there than they are in the United States. Nothing in this country matches the antiquated ideas and conditions found in some parts of the Dominion. Nothing in American life is more up-to-date than some of the Canadian industries and ways of living in the young Northwest.  
 Think of Prince Edward Island, little but old as a province, and long established, in its own belief, as a well-matured seat of New World civilization.  
 There is no street car line on that island. There are no automobiles. There is only one narrow gauge steam railroad. And the law absolutely prohibits the use there of any motor vehicle. All this not very far from Boston, not to speak of smaller cities which keep well up with the times.  
 On the other hand, consider the use made of automobiles in the Canadian Northwest. In proportion to the population and taking account of the dominating position held there by agriculture, the number of automobiles is astonishing. Farmers own them in great numbers. They skim over the level prairie roads in all directions.  
 In Prince Edward Island the provincial legislature has unanimously voted against the repeal of the law which makes it a criminal offense, punishable with a heavy fine, to operate an automobile or any other motor vehicle upon any public highway. In Manitoba there will be a great display of automobiles at the annual industrial exhibition to be held next month in Winnipeg.  
 It is striking to note the contrasting between the United States and these extreme contrasts in Canada.  
 In the maritime provinces of the Atlantic coast and in certain parts of Ontario some of the quietest old communities have a strong element of American origin. There are towns where it is not uncommon to observe to be of the "U. S. E. L." stock; that is, of the United Empire Loyalists, more often known to Americans as "Tories," of Revolutionary days.  
 On the other hand, in the Canadian Northwest, it is claimed by high authorities that Americans, mostly quite fresh from this country, number more than a half a million. They are very up-to-date. They did not leave their own country for political reasons but strictly for business. They stand in the front ranks of progress and their influence is doing much to make the newer Canada one of the most advanced regions in the world.  
 In the older provinces of the Dominion there are many communities

**TEMPERING AND NOURISHING.**  
 First the macaroni is boiled thirty minutes, then blanched, drained and chopped fine or run through a meat grinder. Then put the milk over the butter and flour, add to boiling milk. When this mixture is thick and smooth, add the cheese, onion, parsley salt and pepper, then pour over the macaroni, mix thoroughly and put away to cool.  
 When cool, shape into cones and roll in bread crumbs, then in egg—one egg and one tablespoon milk beaten together—and again in bread crumbs. Fry in deep hot fat until properly browned and serve with tomato or cream sauce.  
 This makes a very tempting and nourishing dish, which will not heat the body like meat and still furnishes sufficient nutriment.  
**BATH TUBES FOR MULES.**  
 (Hillsburg Star.)  
 A huge concrete bath tub, some 40 feet long, and a few inches more than four feet deep, has been installed in the Henry colliery of the Lehigh Valley Coal Company at Plains (Pa.), for the accommodation of the nine mules.  
 This unique mine improvement is built at the entrance of the mule barn. The long-crested beasts are pretty tired when they conclude the day's work, but when they strike the bath all fatigue disappears and they rush in, crowding each other for the deepest place in the tub.  
 The bath is expected to prolong the vitality of the mules. The driver boys are the only workers in the mine who are not absolutely in sympathy with the innovation, the bath keeping them in the mine 10 or 15 minutes longer than before, yet the enjoyment of their dumb charges seems even to offset this inconvenience to a great extent.

**FIG PILLS**  
 Cure Backache, Bladder and Kidney Trouble  
 A few doses of FIG PILLS will convince you that a few more will cure you. Every box of FIG PILLS is guaranteed. If you do not cure all Bladder, Kidney, Rheumatism and Liver Trouble, your money will be refunded.  
 25c a box at all leading drug stores. G. E. Hughes, special agent.

**Gay's Plants**  
 We make a specialty of growing vegetable and flower plants, as well as carrying on the most extensive market business in the Maritime Provinces.  
 This year we have devoted our whole time, personally to the home garden, Mr. Campbell taking charge of the retail market, and we believe we are in a better position than ever before to attend to our large number of customers at home and abroad. Below we give a partial list of our plants—  
 Extra early transplanted cabbage plants 50c per 100, late cabbage 12c per 100, (ready about the 15th June), cauliflower and celery 75c per 100, late tomato plants 20c doz. Extra early tomato 40c per doz. Cucumber 15c per doz pumpkin and squash 20c per doz.  
 Annual bedding flower plants—  
 Aster, Phlox, Verbena, Stocks, Petunia, Marigold, Zinnia, Balsam, Portulaca, (double and single), nasturtium, (tall and dwarf), Mignonette, Calliopis, Chrysanthum, Candytuft, Salpiglossis, Larkspur, Lobelia, Golden Feather, Bachelor's Buttons, Snapdraggon, Seeding pansy, Amaranthus, Ice plant, Dusty miller. All the above annuals 15c per doz.  
 Alyssum, Lobelia, Golden feather, Dusty miller, and Ice plant, fine bedding plants by the 100 75c, per doz. 15c, Salvia deep scarlet, (very fine), 24c per doz. Seeding dahlia, (Double and Single) 20c doz. Cosmos 25c per doz. Heliotropium (for outside ground) 25c doz. Seeding carnations 25c per doz. Montelarias bulbs 4c each, 40c per doz, double dahlia bulbs 8c each 75c per doz. Gladiolus bulbs 5c each 50c doz.  
 Perennials—Wintered clump plants—Fanny, Daisy, Carnations, Dianthus, Sweet William, Forgetmenot 5c each 50c per doz.—Hollyhocks choice double 6c each 60c doz.  
 We mail annuals postage free, but Perennials add one cent extra for postage—Late cabbage a 5c extra—Transplanted Early cabbage and cauliflower 8c extra—Celery do. Late Tomato 3c extra, and extra early tomat, 6c extra for postage must be added.  
 It would be advisable for large orders to have plants go by express or freight. A number of plants together would find it to their advantage and a liberal discount will be made.  
 As our market business is open every day it will be to the interest of customers to call there when at all convenient and personally select their plants. Flowers, have been so much improved of late years that the old time stock would not be recognized.  
 Flowers should to children see that they have a little garden (all their own) They will appreciate it—Please remember to send cash with orders, and write plainly sign name and address—Orders will receive a number of every without a signature.

**Helriegel's Discovery.**  
 For this valuable discovery we are indebted to the famous German Agricultural Chemist, Helriegel, of Germany, and his assistant and successor, the late Prof. Dr. Wilfarth.  
 Briefly stated, the discovery was in this wise: Plants of various kinds were grown in pots filled with pure sand, the sand being, of course, free from all traces of plant food. The plant nutrients were applied to the pots in solutions containing different quantities and proportions of the same, in order to ascertain the actual plant-food requirements of the plants. It was observed that legumes grown in pots which had received applications of phosphate and potash, but no nitrogen, continued to thrive, and ultimately yielded as well as the legumes in pots which had received an application of nitrogen in the solution.  
 Furthermore, it was found that the soil in which the legumes had grown was finally far richer in nitrogen than at the commencement of the experiment.  
 Helriegel naturally argued from this, that the legumes have some means of obtaining their nitrogen supply not possessed by other orders of plants. It had already been noted that the roots of clovers and other legumes were unusually covered with small tubercular growths or nodules, and to these Helriegel directed his attention. He found that these nodules contained myriads of bacteria, and were exceedingly rich in nitrogen, and succeeded in establishing the fact beyond a doubt that these bacteria were busy at work in obtaining for the plant its supply of nitrogen.  
 It is very obvious, then, that the introduction of a leguminous crop as frequently as possible in rotation is an admirable policy.

**BATH TUBES FOR MULES.**  
 (Hillsburg Star.)  
 A huge concrete bath tub, some 40 feet long, and a few inches more than four feet deep, has been installed in the Henry colliery of the Lehigh Valley Coal Company at Plains (Pa.), for the accommodation of the nine mules.  
 This unique mine improvement is built at the entrance of the mule barn. The long-crested beasts are pretty tired when they conclude the day's work, but when they strike the bath all fatigue disappears and they rush in, crowding each other for the deepest place in the tub.  
 The bath is expected to prolong the vitality of the mules. The driver boys are the only workers in the mine who are not absolutely in sympathy with the innovation, the bath keeping them in the mine 10 or 15 minutes longer than before, yet the enjoyment of their dumb charges seems even to offset this inconvenience to a great extent.

**Does Your Land Produce All the Profits You Want**  
 If you are satisfied with your crop or if you are a man who would not care for more crops than the land is at present yielding this will not at all interest you. But if you are a man that has his eyes open for advanced ideas and modern methods this is of importance to you.  
 These unmixed fertilizers have been used and endorsed by agricultural experts and successful farmers everywhere, and indeed for their great productive and superior qualities. Don't let the matter of prejudice stand between you and profitable farming. This is a matter of vital importance to you, and to the farmers individually deserves the credit for progressiveness and industry.  
 Better mail us a card for descriptive printed matter describing the effects of fertilizer on the soil and make the whole matter so simple and plain that you'll readily see how profitable it really is. Write us—ask us any questions you care to.
