New Glasgow. 10, Wheatley River. 11, Holmes Corner. 1 P. M. New Haven. 2, Bonshaw. 3, Kelly's Cross. 4, Emerald. 5, Clifton. 5:30, Kensington. Paying \$21.00 a pair for good pigs over 30 lbs. each. Will buy any size. Knud Sorenson.

Flood Conditions In Section Of Iowa

DES MOINES, June 13 — (AP) — Roughly half of Iowa — that part south of a diagonal line from the Southwest corner to the northeast corner — was battling flood waters or preparing to do so tonight.

For some of the sections it was the second time in a week that the rain-swollen interior rivers tore out of their banks.

Already several hundred families in at least a dozen cities or communities had been driven from their homes.

The industrial city of Ottumwa, one-third of which was under water a week ago, braced itself for another disastrous flood expected to attain a peak there Sunday.

Several hundred families were evacuated from lowland sections of Des Moines, where the Raccoon and Des Moines rivers join.

The new floods in Iowa, along with some in Northwest Missouri, resulted from torrential rains. Record crests were predicted in the already ravaged five-state mid-western watersheds of the Missouri and Mississippi Rivers.

Long Service By Ministers Noted

SACKVILLE, N. B., June 13 — (CP) — Completion of 50 years in the ministry by five men, and 60 by another, was recognized today at the Maritime Conference of the United Church.

The veteran ministers were Rev. Fred Frigins (60 years), Rev. D. A. Frame, Rev. A. T. Fraser and Rev. Robert Murray, all of the Halifax Presbytery; Rev. T. H. MacLean and Rev. A. D. Archibald, both of the Truro Presbytery.

SAINT JOHN, N. B., June 13 — (CP) — Six-year-old Samuel Bourgeois was fatally injured today when he dashed in front of a truck on Mill Street after leaving a grocery store with milk for his invalid mother. The boy died in hospital.

Bracken Sees Trend Towards His Party

MONTREAL, June 13 — (CP) — National Progressive Conservative leader John Bracken said in an interview tonight that there is "a definite trend" toward the Party noticeable in Quebec.

"The people of this Province are turning to the party which will safeguard their institutions," he added. "We expect to get 40 seats in Quebec at the next general election."

Speaking earlier at a gathering of Quebec Progressive-Conservative Party supporters, Mr. Bracken urged that Canadians avoid intolerance and "be prepared to examine with sympathy and patience the views of one another."

In a speech prepared for delivery to the Quebec Party rally, he presented that as a requisite if Canadians were to realize "the destiny which seems by providence to be made possible for us."

"We must cut down prejudice," he declared. "We must work together for Canada regardless of what time decrees as to whether it shall be called the Dominion of Canada or just Canada or better still the United Provinces of Canada."

Mr. Bracken spoke at the end of first day's closed meetings in the convention, which ends tomorrow with meetings of young Progressive Conservatives.

He said the party favored "a selective immigration policy based on the needs of Canada," warning that Canada must avoid a haphazard immigrant plan.

"We favor allowing only such people to come here as are healthy and have a right attitude to democracy. We favor admitting such as will meet the needs of our industries and our farms, but we think that our Canadian economy comes first. The needs of Canada must be the determining factor."

Mrs. A. C. McMillan Heads Federated W. I. Of Canada

HALIFAX, June 13 — (CP) — Passing resolutions concerning citizenship and immigration, delegates to the convention of the Federated Women's Institutes of Canada concluded their session tonight after five busy days.

Delegates representing 3,000 institutes and 70,000 Canadian rural women elected as their president for the next term Mrs. A. C. McMillan of Fairview, P.E.I. She succeeded Mrs. Cameron E. Dew of Port Daniel West, Que.

Named first vice-president was Mrs. E. E. Morton of Vegreville, Alta. Mrs. E. M. Crowe of Stewiacke, N.S., was elected second vice-president and Mrs. W. B. Lester of Coldwater, Ont., secretary-treasurer.

Regional directors named were: British Columbia, Mrs. R. W. Chalmers, Thrums; Alberta, Mrs. Morton; Saskatchewan, Mrs. S. J. Hill, Badworthy; Manitoba, Mrs. Robert Palmer, Waskada; Ontario, Mrs. Hugh Summers, Fonthill; Quebec, Mrs. A. B. Abercrombie, Lennoxville; New Brunswick, Mrs. Robert Thompson, Chance Harbor; Nova Scotia, Mrs. Elton Smith, Caledonia; and Prince Edward Island, Mrs. George Martin, New Perth.

Mrs. A. S. Dennis of Vancouver and Mrs. T. L. Townsend of Port Garry, Man., were re-elected to their respective posts as convenors of the citizenship and home economics committees.

Transit Strike Causes Tie-up In St. Louis

ST. LOUIS, June 13 — (AP) — Public transportation in the metropolitan St. Louis area of more than 1,000,000 persons was tied up today by a strike of the city's 3,500 streetcar and bus operators, and thousands had difficulty and delay in getting to and from work.

Main thoroughfares were jammed during the rush hours with private automobiles and traffic snarls developed at intersections, despite special police measures to regulate the flow of traffic. Motorists joined in a spirit of community co-operation and shared their cars.

The strike was called after the Public Service Company rejected a demand by the Amalgamated Association of Street, Electric Railway and Motor Car Employees (A.F.L.) for reconsideration of a disputed arbitration award of a 17 1/2-cent-an-hour pay boost, bringing the employees' basic wage to \$1.22 1/2 an hour. The union had asked a 35-cent pay boost.

Notre Dame Academy Graduation Exercises

Yesterday evening the graduation exercises of Notre Dame Academy took place in the Academy Auditorium. His Excellency Bishop Boyd presided. From the opening chords of the processional, "Pomp and Circumstance," to the final notes of the National Anthem, the graduation was an impressive event.

Nineteen young ladies were graduated. The Intermediate High School students in uniform formed a foreground which accentuated the importance of the lovely young graduates in white cap and gown as one by one they took their places on the stage.

The program was a beautiful shrine of flags and spring flowers added a note of piety and patriotism to the graduation exercises.

The choral numbers included Schubert's "Ave Maria," "Dar Land of Home" by Sibellus and the graduation hymn "Queen of the Skies." The sweet young voices of the Notre Dame Choir, so excellent in harmony and shading, once more delighted the audience.

The various young ladies who throughout the program offered messages of gratitude and loyalty to parents and to school, to God and to country, spoke with simplicity and sincerity. All showed that the training they received at Notre Dame during the past years has been both practical and efficient.

Very Rev. R. V. MacKenzie, Litt. D., Rector of St. Dunstan's University, addressed to the graduates a message of warm congratulations and sincere good wishes for the future. He stressed the fact that a complete development of the faculties is only accomplished when one is trained in goodness, discipline and knowledge. This, Dr. MacKenzie said, condemns the modern idea of utilitarianism which would develop only these talents which

Level Criticism At Two Union Leaders

SYDNEY MINES, N.S., June 13 — (CP) — Criticism was levelled at United Mine Workers district 26 executive officers at a meeting of Princess local here tonight when speakers charged Union president Freeman Jenkins and secretary-treasurer Adam Scott with "poor leadership" during the 110-day strike.

CHURCHILL RECOVERS

LONDON, June 13 — (AP) — Winston Churchill's physicians decided today to discontinue daily reports on the former Prime Minister's recovery from a hernia operation. Friends said Churchill's recovery was satisfactory.

Atomic Cloud May Be Rival Of A-Bomb

LONDON, June 13 — (Reuters) — Well-informed sources today said that researches into two new forms of warfare probably more deadly than the atomic bomb now are taking place in Britain.

They are the radioactive "cloud" and the bacteriological bomb. The bacteriological research is taking place at a special station in Southern England where nearly 2,000 technicians are employed.

These sources say the United States now has a small number of bacteriological bombs ready and are in addition to the new types of atomic bomb in store — believed to be more than 100.

Observers here are beginning to see in these developments what might be a new conception of British global strategy. The vulnerability of Britain in the event of another war and the need for the dispersal of major productive industries is the key to it.

Each Dominion Included

Each Dominion is to be encouraged to develop one sphere of activity to fit into any strategic scheme. Canada is believed to be the proposed base for the atomic section of the British Commonwealth atomic plan. The setting up of an atomic range in the frozen wastes — where experiments with radioactive "clouds" could be carried out in safety — on the lines of the Australian rocket range in the bush — is forecast within the near future.

The Canadian atomic energy plant at Chalk River, Ont., could, it is assumed, provide the deadly radioactive substances needed for "atomic cloud" warfare. These are available in the discharges from the atomic piles — which produce the "ingredients" for atomic energy — already working there.

Another source of these radioactive "germs" is the British atomic energy establishment at Harwell, Berkshire.

Rockets in Australia

Australia already has the rocket range and is earmarked for full-scale researches in guided projectiles. Work also is going on in Britain on the development of guided missiles, with effort directed mainly towards improving the propulsive force of the rocket.

New Zealand's role is seen as supplementary to that of Australia. South Africa, which already has begun to field its own aircraft, also has a possibly vital part to play in the air. Informed observers here say that South Africa would play a role in any coming war similar to that played in the last war by Britain and Malta — that of an unsinkable aircraft carrier.

The role of India in the Commonwealth strategic plan will remain obscure until the political situation there is resolved after the transference of power to Indians.

VETERAN BANDSMEN

VANCOUVER — (CP) — Twenty-five war veteran bandmen, all over 60 years of age, assemble for weekly practice here, determined to keep their organization alive. The band stages concerts when not playing for the reserve unit.

Urges Compensation For Silver Foxes

OTTAWA, June 13 — (CP) — W. Chester S. McLure (P. C. — Queens) urged tonight in the Commons that the Government pay some compensation for purebred silver foxes which had to be killed because of some disease.

Agriculture Minister Gardiner said the Government mainly confined such compensation to cattle which had been killed to prevent the spread of tuberculosis among human beings. Compensation also applied in cases of hog cholera but in very few other cases.

The discussion occurred during passage of estimates of the Agriculture Department.

House, Five Barns Destroyed By Fire

WOODSTOCK, N. B., June 13 — (CP) — A chimney fire today in the home of Hedley Grant at Dowville, near Meductic, destroyed the building and also resulted in destruction of five barns — one owned by Mr. Grant, two by Charles Price and the others by Redford Grant and Mrs. George Moir.

The fire threatened the community for several hours. Equipment arrived from Canterbury and Woodstock. Firemen, pumping water from the St. John River, averted a heavier loss.

Suggests Refugee Printers Be Admitted

OTTAWA, June 13 — (CP) — A suggestion that Canada ease immigration laws to admit printers in displaced persons camps to counteract the "current shortage" of printers was voiced today before the annual convention of the Ontario-Quebec Division of the Canadian Weekly Newspapers Association.

The suggestion came from Adam Sellar of Huntingdon, Que., who said language was not a barrier, and that in his experience Polish printers who came to Canada during the war had learned English in a short time.

Labor Unions probably would object to such immigration, he added, but they had done nothing about the shortage of printers in Canada. Because Union laws required six years' apprenticeship, few young Canadians were willing to accept the low salaries paid apprentices.

In another address, Sam Wilson of Weston, Ont., urged the weekly newspapers to use their influence to combat the spread of Communism in Canada and uphold Christian democracy.

Sordid Story Told In Death Of Child

MONTREAL, June 13 — (CP) — A mother, who according to police signed a statement confessing that she drowned her eight-year-old daughter after telling her she was going to get rid of her, was held on a murder charge tonight and will be principal witness tomorrow at the coroner's inquest into the girl's death.

What appeared at first to be an ordinary case of drowning developed into a sordid story of an unhappy home and a mother who allegedly did not want her illegitimate daughter. The woman held by police is Cecile Prud'homme of Montreal; her daughter's name was Angele.

Police arrested Miss Prud'homme yesterday and today made public the confession she allegedly signed.

In it the woman was quoted as saying that she had worried for some time about where to place the girl who had been living in a room with Miss Prud'homme and her common law husband.

Last Tuesday, the alleged statement said, the woman first thought about having Angele "disappear."

Ministerial Control Over Fisheries Insisted Upon By Mr. McLure In Commons

OTTAWA, June 13 — (Special) — Continuing the debate on the bill before the House of Commons to amend the Fisheries Research Board Act, W. Chester S. McLure, Progressive Conservative member for Queen's today opposed an amendment to one of the clauses of the bill which would give powers hitherto held by the Minister to the Fisheries Research Board.

"This amendment to section 8 of the bill," he said, "is in my opinion to take control away from the Minister of Fisheries. Personally, I do not agree with that. I believe that if more control were given to the minister who himself is responsible to parliament, that it would be better."

"I should like to see the minister retain control so that he could urge his colleagues of the cabinet to provide adequate appropriations for the further development of Canada's fishing industry."

Soaring Prices

Mr. McLure forcibly brought the attention of the House to the fact that at a time when prices for their produce are dwindling, prices of supplies and equipment required by fishermen are soaring sharply. He instanced the increase of 150 percent over pre-war prices of rope and twine; 150 percent in the case of certain sizes of box shooks, and 200 percent in the cost to the fish processor of small boxes.

The same situation prevailed as to the cost of repairs to dories and fishing-smacks and cost of materials for the construction of boats of all types. He estimated that the cost to the fishermen of repairs had jumped 60 to 75 percent, and that on top of this, wages of ship repair men had undergone sharp upward revision.

The Queen's member suggested as a partial remedy to the plight of the Maritime fishermen, inauguration of a campaign to stimulate the use in Canada of fish and sea-foods. Not only has fish high nutritional qualities, containing the proteins, essential minerals and other excellent dietary elements, he said, but it is a tasty and delicious food when properly processed and cooked.

An educational program, Mr. McLure felt, would do much to stimulate the consumption of fish in all parts of Canada and particularly the central provinces, thus increasing the domestic market for fish products from the Maritimes.

Experimental Farm Appointment

In the closing hour of the debate on agricultural estimates, Mr. McLure charged that in the appointment of a superintendent of the experimental farm at Charlottetown, the Civil Service Commission was influenced by men in the Department.

He stated that the man who had been acting superintendent of the farm after the retirement of Dr. Clark and who was highly recommended by Dr. Clark failed to secure the promotion as head of the Experimental Farm.

In reply, Agriculture Minister Gardiner said that the superintendent

Local Man Is Admitted To Bar In Nova Scotia

HALIFAX, June 13 — (CP) — Joseph Roland MacMillan of Charlottetown, an ex-Canadian Infantry soldier, was admitted to the Bar of Nova Scotia today before Justice J. B. Archibald.

Mr. MacMillan, a graduate of St. Francis Xavier University Antigonish, N.S., and Dalhousie University, Halifax, received his Law Degree in 1943.

A son of Dr. W. J. P. MacMillan, leader of the Prince Edward Island Opposition Party and ex-Island premier, Mr. MacMillan will practice in Charlottetown after articling with a law firm in Halifax.

U. S. Lets Contracts For Super-fast Plane

WASHINGTON, June 13 — (AP) — The United States Army Air Forces today announced the award of a contract for design of a airplane capable of flying faster than 2,200 miles an hour at reaching heights of 35 to 50 miles. The contract went to the Douglas Aircraft Company of Santa Monica, Calif.

NOTED ENGINEER DIES

PHILADELPHIA, June 13 — (AP) — Solomon M. Swaab, noted engineer and designer of much of Philadelphia's subway system, died today at his home. He also helped design buildings, the 1906 Sesqui-centennial exposition and the Philadelphia-Carleton bridge.

BIG FOOD IMPORTS

England did not produce more than 46 per cent of her foodstuffs before the war.
