tour, but eventually he and his tribe—as they increase—may perform tasks of millions of factory workers who now do routine tasks.

He operates vacuum sweepers, answers the telephone, turns electric lights, fans, talking machines and radios off and on. He has ambitions to become a traffic policeman.

Willie works by spoken syllables only. Each syllable spoken into his telephone produces a momentary light. The light shines on a vacuum tube, starting an electrical current through his "nerve center"—a series of electrical coils.

The coils are so arranged that Willie completes his tasks one at a time, while he calmly smokes a cigarette. Three syllables starts the robot. Four stop him. Different numbers of syllables are the signal for various tasks, each task having its particular number.

STUDY GROUP—A meeting of the Teacher's Study Group was held in Peakes School on March 26th, with the Supervisor Mr. Hynes and five teachers in attendance. After briefly reviewing the subject of our last meeting, Mr. Hynes gave several demonstrations on the "Teaching of Primary Arithmetic" which were very much appreciated by the teachers. Next meeting will be held in April.

FACTORY MIXED FERTILIZERS

Experience has shown that larger and more uniform yields can be produced by using Factory Mixed Fertilizers, which increased yields pay many times over for the additional cost of the Mixed Fertilizers are compared with the cost of straight Chemicals which are mixed at home.

The percentage of farmers who have gone back to mixing their own Chemicals after having used Mixed Fertilizers is practically negligible, which is surely sufficient proof that there must be something in the argument that Factory Mixed Fertilizers are BETTER and worth the additional cost.

When we advocate the use of Mixed Fertilizers we feel we are working in the interests of the farmers, otherwise we could not recommend them as the success of the farmers on Prince Edward Island means our success.

After making allowance for plant overhead, interest on our investment, and additional labor involved, our net profit on Mixed Fertilizers is practically the same as our net profit on straight Chemicals. You will see, therefore, that it is not with the idea of material gain that we strongly recommend every farmer on Prince Edward Island who is not already using Mixed Fertilizers to try them out this year.

A Morning Smile

Two Negro soldiers were discussing the relative merits of their company buglers. Said one, "Fellah, when dat boy of ouahs plays call, it sound zactly like de Boston Symphony playing de Rosary."

The second soldier snorted. "Brother," he said, "you ain't got no bugler a-tall. When Snowball Jones wraps his lips aroun' dat bugle an' plays mess call, I looks down at mah beans an' I sez, 'Strawberries, be-have! You is kickin' de whipped cream out of de plate.'"

The concert which was held recently in Cascumpec was reported in St. Anthony Hall, Bloomfield, on the evening of March 25th. The program was much appreciated by the audience, who were enthusiastic in their encores and a neat sum was realized.

A very pleasant evening was spent at the home of Mr. and Mrs. Russell Haywood, Mill River, on Thursday, March 26, the occasion being a pre-nuptial shower in honour of Miss Millie Gard, youngest daughter of Mr. and Mrs. Elijah Gard. A very small bride and bride groom carried a large basket of gifts to the bride-to-be, who was seated in a gaily-decorated chair under a large white bell. The numerous parcels were unwrapped by Mr. Robert Hunter, while Miss Ruth Metherall read the verses and greeting cards. The gifts consisted of china, silver, linen, etc., and were much admired by all. Dainty refreshments were served by the hostesses and the happy evening was brought to a close by a sing-song, after which the guests went their way with many good wishes to the winsome young bride-elect.—C
