

The Un-Reality Postulate

The question has arisen that perhaps we exist, and then again, maybe we don't. The basic problem, as I see it, is to prove that we exist, since I feel that we do (with the possible exception of politicians, who are more than likely just figments of our collective imaginations) and would like to know for sure. With this, we state the theorem as follows:

Reality exists, with the understanding that we are seen as being in reality. (This will be left to be proved in a later theorem.)

Now, we go on to the proof. We will use contradiction to try to prove that reality does not exist. We ask the basic question of what reality is. Reality, for all intensive purposes, is at the discretion of each person, who then interprets reality differently. This implies that reality belongs to the set of all people's perceptions. This set is infinite since there is no upper bound to any person's perception (as can be seen by people who jump off buildings believing they can fly) and there is no lower bound to any person's perceptions of reality (as can be seen by pizza delivery people).

We will call the set of all people's perceptions of reality Reality (big R reality), denoted by the symbol R, and reality as seen by one person is reality as denoted by the symbol r (small r reality). Now we must prove that R exists.

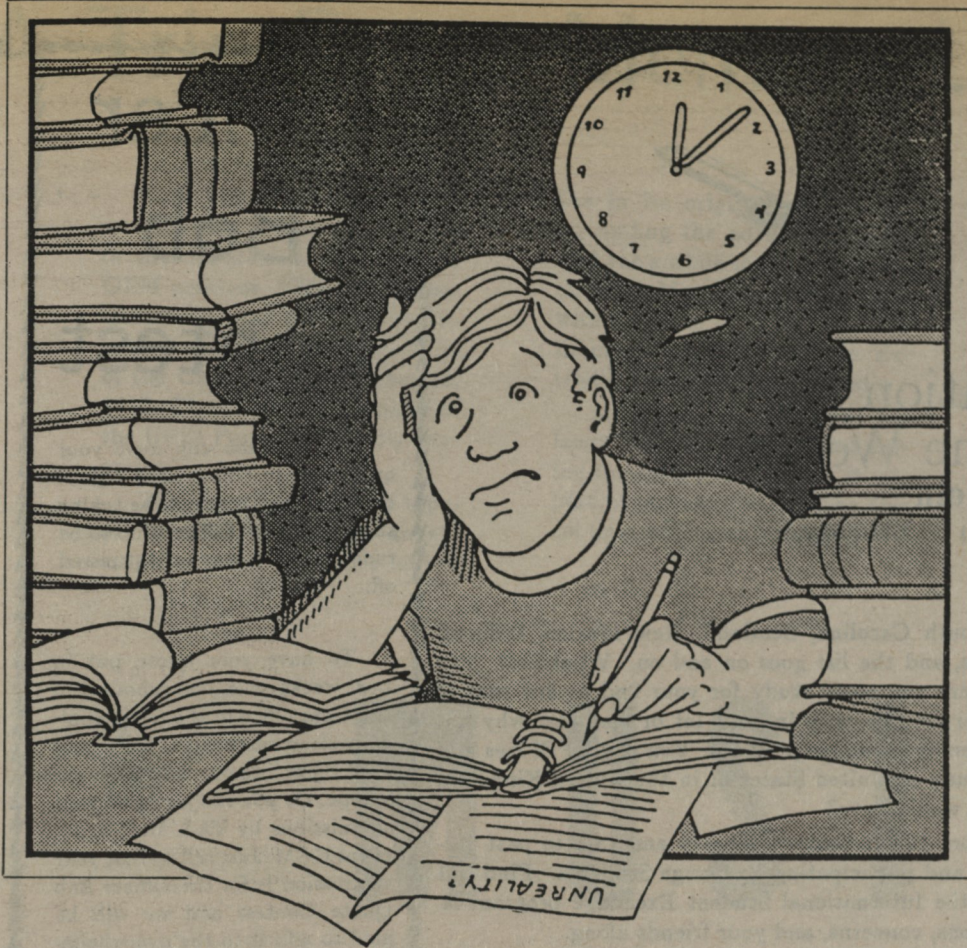

Let us have an element s,

which is a person's sanity. Since each person has a different amount of sanity, then there is a set S, which is a set of all people's sanity, where s is a subset of S. Now S is infinite, because it, too, has no upper bound (at this time there don't seem to be any examples, but according to Len's Theory of Time-Space Sanity, for every sane person, there is a person who is more sane than that person, in other words, for every s sub n, there exists an s sub (n+1). We already know that s sub 1 is true, so by induction, this is true for $n \geq 1$) and it has no lower bound (as can be seen by the large number of keystone kops currently working on campus).

Now then, S is directly proportional to R since a person's perception of reality is directly related to their sanity plus a constant, let us call it C. The graph of (s,r) for all s as a subset of S and all r as a subset of R is a linearly increasing graph.

By taking the log of this graph, we have a flat line, which means death, which is equivalent to the absolute value of c, which is light speed. Since nothing can attain light speed, the log of the graph previously mentioned, whose value is death, cannot exist. Therefore, the above relationship (S,R) does not exist, which means that we have proved the contradiction, (ie. Reality does not exist) is tr...

Canadian "Youth Education Excellence" Prize

The Canadian "Youth Education Excellence" Prize is a conference involving Canadian youth chosen from all over Canada where a one province's candidate is named the Educator of the Year. Ten new people are chosen each year from each province to present their candidate. If you are a student (full or part time) attending UPEI, Holland College or High School, you have the opportunity to be one of these delegates. All you have to do is contact me, Carol Ann Clements, and I will submit your name along with all the others entered. If selected:

- You will be asked to raise \$500.00 dollars.

- You will be involved in the researching of prominent profes-

sors and teacher from all over Prince Edward Island that you think would be good candidates for the educator of the Year (only one will be selected).

- You will be able to attend the 3rd annual Canadian "Youth Education Excellence" Prize in Quebec City on Marh 22-29, 1990.

I can be reached at:
Carol Ann Clements
222 Fitzroy Street
Charlottetown, PEI
C1A 1S7
or 892-2485

Apply in writing or by phone.

Applicants will be chosen by October 31, so apply immediately!

Role-player List to be Formed

Due to the large number of role-players, we would like to compile a listing of all players and gamemasters. We are asking all role-players to send their name, number, whether or not you will run a game, and games they enjoy playing/mastering to the GEM account via VaxMail or to the office. When this list has been compiled, we would like to make available a copy to each member of the listing. This should make

things easier for all gamemasters as they will now have a listing of all the players available on campus for the game they wish to run.

UPEI Gaming Society.

Chaplaincy Center

Pray: A introduction to the Spiritual Life for busy people - (1 hr a wk.)

Time: Monday - 7:15 - 8:15 pm (Starting Oct. 16)

The Fully Alive Experience: A group experience in fully human and Christian Living (1 hr a wk.)—

Time: Wednesday - 7:15 - 8:15 pm (Starting Oct 16)

Daily Mass: 11:50am (Fr. Charlie Cheverie)

Sunday Mass: 6:30 pm

Protestant Worship Service: Sunday - 8:00 pm (Rev. Leslie Jay)

The Atlantic Catholic Student Conference: will be help Nov. 10-12

at UNB interested????

Call Bruce Ansems 892-9976 or Sister Alma 566-0345. Soon!

RCIA - Rite of Christian Initiation of Adults. Anyone interested in becoming a mem-

ber of the Roman Catholic Church and/or any member who wishes to be deepend and expand his/her faith is welcome - Please contact Sr. Alma - Chaplaincy Center - 566-0345 before Oct 20th.

We're Not Just Another Pretty Face!..

and we're not just comics either!
NOW IN STOCK—HALLOWEEN MASKS!

A Wide Variety of Full Head Rubber Masks & Accessories.

Outlands
 Comics & Hobbies

51 University Avenue, Charlottetown 894-3290
 Mon. to Wed. - 11am-6pm, Thurs. & Fri - 11am-9pm, Sat. - 9am-6pm
