

## BUOTE'S PROOF PRESS

PATENT NO 63767

This invention provides a long felt want for the printing craft. Various methods have been in vogue in the art of printing, for the taking of galley proofs, ranging from the use of mallet and planer to that of a proof press having a stationary bed and a heavy roller covered with felt or cloth. In all these constructions, however, it is necessary that the paper used should be dampened prior to use in order that a clean proof may result, the attempt to take it dry producing an imperfect result. To obviate these disadvantages Buote's Proof Press is constructed with a movable bed, the impression rollers being stationary, allowing of the use of a pressure regulating mechanism; it also provides paper rolls at opposite ends by means of which the proofs can be taken rapidly. The Press is neat and attractive in appearance, durable in construction, simple and efficient in operation and can be made at a moderate cost. Not only can Buote's Proof Press be used for proofs but it can also be used for posters and hundreds of jobs which comes within the range of country offices.

Vis bien et ne t'inquiète pas des paroles des méchants, car on ne peut championnat.

Tel fait métier de conseiller autrui qui ne voit goutte en ses propres affaires

Ne te promets pas une longue vie car à chaque pas que tu fais, la mort suit l'ombre de ton corps.

Dans le besoin aie recours à tes proches, car il n'est pas de meilleur médecin qu'un véritable ami.

## Comment Labourer sous le Gazon

Un constructeur ingénieur s'est dit qu'il serait intéressant de labourer sous le gazon, afin d'améliorer le sol où il prend sa nourriture, et cependant, comme do juste sans arracher le dit gazon. Il a donc imaginé une charrette qu'il appelle du nom suggestif de "régénérateur des prairies," et grâce à laquelle le gazon est découpé en une bande par des couteaux verticaux, puis soulevé par une lame d'acier qui glisse en dessous. Sous cette lame sont d'autres couteaux verticaux qui ameublissent et la brouent réellement l'emplacement où se trouvait la bande de gazon. La lame continue son mouvement en avant, et le gazon retombe en place sur un terrain fraîchement labouré.

Un remède simple et pouvant se trouver facilement sous la main pour arrêter les saignements de nez et aussi le sang répandu trop abondamment par les coupures :

Un accident vient il à se produire, coupures ou hémorragies nasales, vous prenez un peu d'alun et vous en saupoudrez la plaie c'est une blessure, ou vous priez la poudre d'alun pour un saignement de nez.

C'est un remède qu'il est facile d'avoir toujours chez soi ; il n'est pas dangereux, il est prompt à préparer, et ses résultats sont rapides.

Les fourmis et les souris, même les monstiques, ont horreur de la menthe.

Mettez de la menthe fraîche dans les armoires où on redoute ces ennemis et on est sûr qu'ils ne viendront jamais. Avoir soin de renouveler les branches de menthe de temps en temps. En mettre dans sa chambre, sur son lit, éloigne les monstiques ; se laver avec quelques gouttes d'alcool de menthe dans son eau de toilette, éloigne également ces ennuyeux parasites.

Nous devons travailler à augmenter la qualité et la quantité des fourrages de façon à nourrir mieux un plus grand nombre d'animaux.
