Vast New Market Is Forecast In Electrical Heating Field

TRURO (CP) — Mines Minister Donald M. Smith told a one-day conference on voluntary planning in the power industry here Tuesday that people are "receptive and intensive promotion will see a vast new market" in electrical heating."

Mr. Smith told some 250 persons meeting at the Nova Scotia Agriculture College that there was potential in the heating of homes and public buildings by electricity "worthy of your attention."

"This is to the joint benefit of the power industry, the coal mine industry and those sections of the economy which supply these industries," the minister said.

Premier Robert Stanfield told the conference planning should come more naturally to the power industries because planning went hand in hand with their expansion in the last few years.

"I hope the power industry will play an even more important part in the life of Nova Scotia if this is possible," he said.

E.D. Haliburton, acting trade and industry minister, said the province's power rates must be competitive with those in other areas in order to encourage industry to Nova Scotia.

"If the growth of the manufacturing complex of Nova Scotia is to take place, this will mean an increase in industrial lands for the utilities of this province., to, this we need planning," he said.

The bidding:

East	South	West	North
Pass	1 NT	Pass	3 NT

Opening lead — five of hearts.

Assume you are declarer and West leads a heart which you win with the queen. You don't see the East - West hands, of course, and the problem is how to play the hand so as to give yourself the best chance of making the contract.

Actually, there is a way of playing the hand to practically insure the contract against any distribution of the East-West cards, but yet it would be easy to make a mistake and go down.

A fairly normal reaction would be to lead the jack of diamonds and finesse. This would work out badly in the actual deal, because East would take the king and return a heart. West's hearts would thus become established, and when you later took a club finesse, you'd go down one.

A different way of playing the hand would be to enter dummy at trick two with a spade and take a club finesse. There is a good chance of being defeated on this line of play also, because West could take the king and return the ten of spades, permitting East to overtake with the jack and thus establish his long spades. East would later get in with the king of diamonds and run his spades to defeat the contract a trick.

The best way of playing the hand is to lead the jack of clubs at trick two. If the jack is refused, you then play the jack of diamonds and finesse. This guarantees at least nine tricks.

If the jack of clubs is won by the king, you are still on safe ground. Take the actual case, West wins with the king and returns a heart, which you duck. You win the next heart and now take the diamond finesse.

East wins, but since he has no heart to return, you make four notrump. Note that if East had a heart to lead, which would mean he started with four of them, you would still make three notrump, losing only two hearts, a club and a diamond.

DAILY CRYPTOQUOTE — Here's how to work it:

A X Y D L B A A X E
is L O N G F E L L O W

One letter simply stands for another. In this sample A is used for the three L's, X for the two O's, etc. Single letters, apostrophes, the length and formation of the words are all hints. Each day the code letters are different.
