JAPAN NOTES.—Rev. B. Chappelle writes from Tokyo over date Sept. 2:— Because of the wide-spread ravages of cholera, school will not open until 16th. Cholera is dying out at Nagasaki, but is increasing rapidly in Osaka—the last day's reports gave one hundred and eleven deaths. It is also gradually increasing in Tokyo. Last day's report of number of cases is six persons. One of our leading Christians of Yokohama, a Mr. Houda, was taken with cholera in church on Sunday morning, and died that evening. His last words were: "I desire that Christianity may spread rapidly all over Japan." The weather in Tokyo is still close, muggy and oppressive.

HOW THE SCOTT ACT IS ENFORCED AND RESPECTED IN THE COUNTRY.—A Crapaud correspondent of the Guardian, in its issue of the 12th inst., says: "A so-called hop beer shebang has been started this summer at Kelly's Cross and has been running full blast night and day, Sunday and Monday. Ever since then men, boys and even females frequent this shebang, before and after mass on Sundays; and that it is not an unusual sight to see half a dozen young men staggering along the roads of a Sunday evening in a semi-state of intoxication." This is certainly very creditable, and we hope for the sake of the good name and welfare of Kelly's Cross that such scandalous proceedings will be speedily stopped.

A Successful Inventor.

We are pleased to learn that our enterprising citizen, Mr. G. A. W. Robinson, whose invention for vehicle gears on which he has secured letters patent in Great Britain, United States and the Dominion of Canada, a notice of which has already appeared in THE EXAMINER, copied from the Official Patent Review, Ottawa, has made arrangements with the Miner Carriage Works, Granby, P. Q., one of the most responsible firms in Canada to manufacture his patent gear under royalty and to be sold through the dealers throughout Canada the coming season. They will be on sale in Charlottetown early in 1891. We have seen testimonials from doctors and others who are continually on the road, and they speak in the highest terms of its use on both driver and horse, on all kinds of roads.

Mr. Robertson has been attending the Toronto Exhibition, with a village cart, having his patent gear to show the manufacturers and the public the merits of his invention, and intended bringing it back with him to exhibit at our provincial Exhibition; but he sold it at Toronto, and could have taken orders for a number. It is gratifying to see that his invention is meeting with so much success.

The Burchall Trial.

SOME DAMAGING EVIDENCE

WOODSTOCK, Ont., Sept. 25.

This has been a hard day for Burchall, yet the prisoner holds up wonderfully well and his nerve is simply phenomenal, considering the character of the evidence now being adduced against him. One feature of the day's proceeding was the reading of a letter from the accused to Benwell's father in England, written three days after the murder took place, in which Burchall said the son was well satisfied with the farm, and was then engaged in writing to that effect. At the top of it appeared the firm name of Burchall and Benwell. Miss Lockhart's dress maker gave very important evidence. She swore that on the morning of February the 17th, she went by the Grand Trunk from Paris to Woodstock and among the passengers were two young Englishmen who got off at Eastwood. Is the prisoner one of them, asked Mr. Osler? "Yes," replied the witness. The witness had seen the body of Benwell when exhumed. "Was he the other one?" asked Osler, "Yes," she answered. She was subjected to a remarkably severe ordeal. Her voice broke once, but she recovered and the main points of her evidence remained unshaken. The Crown has over 70 witnesses to examine.
