JOHN JOY.

Reforms We Also Need.

UNHEALTHY CHILDREN MAKE UNHEALTHY MEN AND WOMEN.

Lord Brabazon draws attention to the fact that unless some speedy change is made in the social condition of some of our women and children the nation must inevitably deteriorate in the next generation.

The utter absence in many large towns of adequate playgrounds is a serious evil, as it is impossible for children to develop into healthy men and women without sufficient air and exercise.

A public playground has been opened in Horsemaner lane, and some also in Manchester and Salford. It has been found by the Metropolitan Garden Association that a playground can be daily provided for 5,000 children at a cost of £100 a year.

Horsemaner lane playground contains a gymnasium, swings, running ground, giant stride, five court and many other advantages. After 6.30 p. m. the young men of the neighborhood are allowed to enter the boys' enclosure, and the young women of the girls. There can be no question of the inestimable boon thus conferred on thousands of our poorer fellow-creatures, and the advantage to the national welfare will be great in its influence on the health of the people.

Many efforts have been made of late years to shorten the hours of labor for various classes, but there still remains a class for whom legislation is necessary. Lord Brabazon states that girls in shops and refreshment rooms are kept standing for an unparadonable length of time. In places of public refreshment, girls work alternate days fifteen and eighteen hours, with but very short intervals for food. Many of the shop-girls also work for fourteen hours. The effects of these long hours are most injurious in every way. That it is physically injurious it seems scarcely necessary to remark, and it appears also to be so morally. Many return home broken in health, and there are numberless sad tales of insanity, pythisis, bronchial affections, chronic dyspepsia and other maladies. It must be said that many of the shop keepers would willingly abridge the hours could it be made incumbent on all shops to close earlier.—London Lancet.

CAPE BRETON RAILWAY.

SECTION—GRAND NARROWS TO SYDNEY.

Tender for the Works of Construction

SEALED TENDERS, addressed to the undersigned and endorsed "Tenders for Cape Breton Railway" will be received at this office up to noon on WEDNESDAY, the 12th day of January, 1887, for certain works of construction.

Plans and profiles will be open for inspection at the office of the Chief Engineer and General Manager of Government Railways at Ottawa, and also at the Office of the Cape Breton Railway at Port Hawkesbury, C. B., on and after the 27th day of December, 1886, when the general specifications and form of tender may be obtained upon application.

No tender will be entertained unless on one of the printed forms and all the conditions are complied with.

By order,
A. P. BRADLEY, Secretary.

Department of Railways and Canals,
Ottawa, 15th December, 1886.

Notes from Lot 64.

This section of the country is seldom represented in your columns, so you may find room for a few lines at this time.

Mr. J. McKay got up a shooting match on New Year's Day, but the heavy rain in the afternoon put a stop to the shooting.

The Strait is quite clear of ice from Little Sands to Cape George, and our winter boats need have no trouble in crossing yet.

Eel fishing is a new industry that is pursued with vigor by every one who can handle an eel-spear. The eels are frozen and shipped to Boston. For some days the ice on Murray River presented a lively appearance, and such a squirming, wriggling tangle of eels as never was seen. There is money in eels.

Fishing seems an out of place sport at this season, but two days before Christmas Capt. McRae and two others landed quite a lot of very nice herring caught along shore. Cod-fishing, too, had been very good as long as any were bold enough to venture out. The oldest inhabitant has no recollection of these fish being taken on this shore so late in the season.

The High Bank boys are emulous of excelling as marksmen, stimulated thereby by the exertions of a young gentleman recently returned from California, bringing with him all a Westerner's love of hunting. He is a regular Nimrod, and through his example many of our gentlemen of leisure are becoming very expert in bagging what small game our woods and swamps contain.

According to reports, this County does the principal part of the liquor drinking for the Island. For some years previous to the adoption of the Scott Act in this County, no liquor could be had south of Montague, and Murray River kept the banner of temperance waving when temperance societies had almost died through the Island. Murray River has now the unenviable reputation of possessing the only grocery south of Montague. This "shebang" was started this fall by an enterprising couple from Summerside, but it is not doing much business, as temperance principles are too strong in these parts.

Many of the young men who were away in the States returned this fall.

MAJOR.

New York's Brides and Grooms.

12,216 PAIRS OF THEM IN NEW YORK—ONLY ONE BRIDE OWNS UP TO 70 YEARS.

In 1886, 12,216 marriages were registered in New York city, against 11,716 in 1885. Two grooms and six brides were born at sea; 7,425 grooms and only 6,660 brides were foreign born. The American girls got the old 765 foreign husbands. Of brides 2000. Nine negroes married white women. Eight Chinamen and one Japanese also took Caucasian brides.

Widowers had better luck than widows. Of widowers, 1,590, and of widows, 1,245 remarried. The men were ahead on third marriages by a score of 92 grooms to 38 brides, and one man was married for the fourth time, and one for the fifth time, with no woman to dispute the record. As to the ages of matrimony, these are the figures:

Under 20 to 30 to 40 to 50 to 55 to 60 to 65

Brides. 2,954 7,499 1,235 361 51 14

Grooms. 215 8,555 2,610 782 190 101

The brides now almost disappear from the record. While there were 42 grooms between 60 and 65; there were about 6 brides, and but half that number between 67 and 70, although there were 24 grooms. Only one bride owned up to being over 70. There were 8 grooms between 70 and 80; and two grooms confessed to being between 80 and 90.

There were 37,330 deaths and 31,319 births, against 36,682 deaths and 30,030 births in 1885. Under 5 years of age 16,151 children died. There were 1,466 violent deaths, of which 207 were from drowning and 222 by suicide. Fifty of the suicides were stabbing and cutting; 25; hanging 38; shooting, 63; jumping from heights, 15; drowning, 16; suffocation by gas, 14; poisoning with Paris green, 11; with arsenic in other forms, 6; opium, 14; other poisons, 17.

What True Merit Will Do.

The unprecedented sale of *Bosche's German Syrup* within a few years has astonished the world. It is without doubt the safest and best remedy ever discovered for the speedy and effectual cure of Coughs, Colds and the severest Lung troubles. It acts on an entirely different principle from the usual prescriptions given by physicians, as it does not dry up a Cough and leave the disease still in the system, but on the contrary removes the cause of the trouble, heals the parts affected, and leaves them in a purely healthy condition. A bottle kept in the house for use when these diseases make their appearance, will save doctor's bills and a long spell of serious illness. A trial will convince you of these facts. It is positively sold by all druggists and general dealers in the land. Price 75 cents, large bottles.

Special Notices.

A new permutation safe lock has just been patented, which differs materially from all others in the fact that there is no orifice to speak of in the door of the safe. The dial, which is such a conspicuous feature in ordinary safes, has no connection in this invention, except by electric wires, with the body of the safe, and may lie on the cashier's desk or repose securely in his home, free from any possible violence of the burglar's hammer. There is, in fact, no limit to the distance that may intervene between the dial and the safe lock, granted that the connection is satisfactory and the battery sufficiently strong. A safe might perfectly well rest in a Chicago office and only be opened by means of a dial in New York.

The company of Canadian and English capitalists lately formed for the purpose of constructing a line of cable between Vancouver, B. C., and Australia, are vigorously pushing on the work. Mr. Sanford Fleming, the original promoter of the scheme, stated that the company has been thoroughly organized. Application has been made to the Imperial Government for vessels to conduct the soundings and other work from the coast of Australia to the coast of British Columbia, and the matter is now under consideration. Mr. Fleming thinks that there will be no difficulty in getting the Imperial Government to either conduct the preliminary sounding or supply the vessels necessary for the work.

The *Canadian Gazette* says: "The Imperial Government has, according to the *Times*, issued orders for the purchase of a large number of horses in Canada of the stamp regulated for cavalry and artillery, at the regulated price. This is, it need hardly be pointed out, a most significant announcement. Should it prove correct, it may perhaps be looked upon as the inauguration of what bids fair to become a trade hardly second in importance to the Canadian cattle trade."

The Prince of Wales will preside, on the 12th instant, at a meeting of Lord Lieutenants, Mayors and other public officials from all parts of the Kingdom, to discuss a proposal to establish an Imperial Institute.
