

# Evidence Heard At Inquiry Into Highway Fatalities

Six witnesses gave evidence before Coroner Dr. L. E. Prowse and a coroner's jury at City Hall yesterday enquiring into the death of Patrick Murray, Sr., and Leo Emmett Murray, two of the five victims of a truck and car collision about half a mile west of Clyde River on the Trans-Canada Highway on the night of August 10th. The inquest opened on August 14 and following the identifying of the victims and viewing the remains, the enquiry was adjourned until yesterday.

Dr. T. A. Laidlaw in summarizing his findings in the autopsy on the body of Patrick Murray Sr. said it was his belief that death had been instantaneous and due to injuries at the base of

the brain.

Following a description of various lacerations on the chest, arms, face and shoulders of Leo Emmett Murray, Dr. Laidlaw said that he was convinced that death was due to two skull fractures causing damage to a major degree.

Evidence was given by Wm. W. Davies, manufacturing chemist of Boston, Mass., who said he was driving from Summerside to Charlottetown and had passed through New Haven and saw no flares or markings on his (driver's) side of the road but saw six or eight piles of gravel. Noticed piles of dirt on his side of the highway when he came to the surfaced part. He described following behind a car

up-grade. As that car approached the hill-top, he saw one coming over the crest of the hill and as the lights of both cars fused there was a tremendous crash.

Mr. Davies stopped his car and rushed to the scene where he found the truck on its side and the car at right angles to it. A young man came from around the truck who said he was alright. Questioned by the Coroner, witness said he was travelling at 40-45 and would judge that the car ahead of him was going at about the same rate as he kept his distance. He said that the lack of markings or flares indicated negligence. The gravel dumped
