Burns Anniversary Concert Big Success

A smash hit was scored at the Burns Anniversary Concert last night at the Prince of Wales College Auditorium, holding the entire audience spellbound throughout the program.

Under the able direction of Mrs. Barbara M. Roper, and sponsored by the Men's Brotherhood of the Zion Presbyterian Church, the entertainment proved to be one of the most enjoyable in recent years.

An original skit by Flora S. Rogers, with the scene laid in a typical "Island Home" entitled, "Jock Turns the Tables on Maggie with Surprising Results" was cleverly done and was enthusiastically applauded.

Highlight of the evening was the Lad and Lassie Pipe Band who completely captivated the hearts of the audience by playing the bagpipes dressed in bright Tartan kilts, and going through the intricacies of the Highland Fling and the quick stepping Scottish Sword Dance.

All the performers were called back by the audience for at least one encore. Miss Betty Beers gave an enchanting rendition of "Will Ye No Come Back Again" and later in the program joined in a duet with Mr. Ivan Robinson singing "When Ye Gang Awa' Jamie".

RECEIVES CONGRATULATIONS - Congratulatory telegrams on the formation of the Prince Edward Island Division of the Community Planning Association, read at the organizational meeting held at the Vocational School on Thursday evening.

MEDICAL ASS'N MEETING - Due to bad road conditions, only a small number of members were in attendance at a business meeting of the P.E.I. Medical Association at the Charlottetown last night when discussion took place on changes in The Medical Act.

SCOUT COUNCIL MEETING - The Boy Scout annual Financial Campaign, January 28th to February 2nd, was discussed at the regular monthly meeting of the Provincial Association yesterday.

Measels May Be Serious Warns Health Officer

"Measles may be serious because of the complications following" warns Dr. O. H. Curtis, Chief Health Officer and Deputy Minister of Health.

"Mothers should keep children with measles in bed and warm for about nine days and during this time they should be isolated to prevent spread to other members of the family."

"It is considered important where measles is prevalent in a district, that any school child developing symptoms of measles should be kept home from school on the presumption that he is developing measles."

Dr. Curtis particularly warns parents to keep babies and young children away from anyone having acute nose and throat irritation.

Stresses Need Of Improvement In Street Lights

"The estimate for street lighting for the year was \$13,150.00," stated Coun. W. H. Beaton, chairman of the Light Committee.

"The amount actually spent on street lighting was \$13,361.93. In other words, we exceeded our estimates by \$201.93."

"I am not satisfied with the lighting of the streets of Charlottetown," Coun. Beaton reported.

"The type of incandescent fixtures supplied seem rather poor, particularly the globes. While I have checked with Maritime Electric as to their cleanliness, and they have assured me they are clean, they still have the appearance of being very dirty."

"The following comparative statement shows an increase of additional street lights: Dec. 31, 1950: 231-100 candlepower illuminants; 127-250 candlepower illuminants; 81-400 candlepower illuminants. Total, 439."

"Dec. 31, 1951: 238-100 candlepower illuminants; 136-250 candlepower illuminants; 94-400 candlepower illuminants. Total, 468."

"Despite our untiring efforts, we have not as yet been able to receive from the Maritime Electric a satisfactory proposition for the lighting of the Boulevard around our Victoria Park. I need not impress upon this Council the great attraction Victoria Park has for our tourists and visitors."

"I feel that we should make this Park available in the evenings to our people who do not enjoy the luxury of a motor car. And this can only be done by the installation of light. I sincerely hope the Chairman of Light in the income."

BLAST TEN Continued from page 1

anjū. Within a few minutes five Migs were downed and a sixth damaged.

Two Planes Explode Two of the Migs exploded so close to the American fighters they blew out the jet engines of the Sabres. The U. S. pilots went into screaming dives to restore their engines to power.

A fifth Mig went down in long loops, with its pilot still trying to regain control when he hit the ground and exploded.

At about the same time, 18 Sabres of the Fourth Fighter-Interceptor Wing tangled with 25 Migs at 26,000 feet over Sinanju. Three Red jets were destroyed before the Migs turned tail for their Manchurian sanctuary.

Two Migs were destroyed earlier in the afternoon when 15 Sabres jumped 16 Migs near the Yalu River boundary between Manchuria and North Korea.

Other, Fifth Air Force warplanes—Thunderjets and F-80 Shooting Stars—kept up their incessant pounding of Communist supply lines. Pilots reported cutting North Korean rail lines in 56 places. The Fifth flew 503 sorties by 6 p.m. Friday.

This is followed in 2-4 days by a blotchy, patchy dusky red rash which is first seen on the face and behind the ears and then spreads over the body."

Dr. Curtis particularly warns parents to keep babies and young children away from anyone having acute nose and throat irritation.

Submits Health Report For 1951

Dr. Wendall MacDonald, Chief Health Officer, last night told the annual meeting of the City Council that in the year 1951 the City had experienced no severe epidemics.

There had been only two reported cases of diphtheria, traceable to a carrier who had been discovered, and no fatalities had resulted.

There were no cases of typhoid fever at all and only one case of para-typhoid and one case of poliomyelitis. There were 31 cases of venereal diseases. The Health Officer also noted that the City had recently been experiencing a large number of measles, German measles and mumps, but said that there were no severe complications following them.

Dr. MacDonald also read the annual report of the Sanitation Officer which told of the number of inspections made of the various public premises, including restaurants, yards and other similar places.

ing Council will leave no stone unturned to see to it that this project is carried to a successful conclusion.

"The heavy foliage of our shade trees does much to deaden our street lights, which as I have said before, do not shed too much illumination even when the deciduous foliage has vanished. If the lighting is poor in the late Fall, Winter, and early Spring, it is much poorer in the Summer. As a matter of fact, it is at its best in the Winter, when there is a blanket of snow, augmented by a full moon."

"There were no serious interruptions during the year from wind storms, etc., to disturb the continuity of the output of electrical energy, but we have had complaints from sections of the City to the effect that even with the slightest, smallest breeze, there is an interruption in the service, causing the inconvenience of having electrical equipment not supplied with electricity."

Increased Collections The sum of \$89,116.25 was collected in water rates, showing an increase over 1950 of \$2,929.34. The net amount paid over to the City was \$26,241.58.

The usual repairs were carried out during the year. The disbursement increased \$5,870.26 over 1950. This was caused to a great extent by the increase in the electric power rates. For the last quarter of

Increase In Water Rates Forecast By Commission

Revision of the existing civic water rates to secure additional revenue required to finance the department was forecast in the report of the Commissioners of the Water Supply submitted at last night's annual meeting of the City Council.

The report stressed in this connection the increased rate in electric power, also the increased cost of material over the past ten years.

Considerable extension work was done by the Department last year. These covered Belmont Street, McGill Avenue, Beach Street, Longworth Avenue and Williams' Land. A number of main gates were installed, also one new hydrant and several replacements.

The amount of water pumped during the year was 594,005,628 gallons, with an average daily consumption of 1,627,412 gallons.

The amount of 172,214,910 gallons was supplied through meters to take care of all commercial users, etc. The balance of 421,790,718 gallons represents the amount used for domestic purposes, small commercial accounts, fire fighting, street flushing purposes and other public uses.

New Sewage Pump The Department finds that it will be necessary to purchase a new sewage pump for the Eastern Station to replace the now existing pump which has been in operation over thirty years.

April 5th, 1951, the Department called for tenders at per the authorization received from the Provincial Government through the Council of the City of Charlottetown for \$5,000.00 Water Debentures and \$17,000.00 Sewer Debentures for a term of twenty years, bearing interest at three and one-half per cent per annum. The tender of the Eastern Securities Company, Limited, of ninety-eight decimal twenty-six was accepted.

It will be necessary to issue further debentures for 1952 to take care of the overdraft in the Sewer Construction Account and contemplated extensions.

TO THE ELECTORS OF THE CITY OF CHARLOTTETOWN

I have been your Councillor in Ward Five for the past six years, your Chairman of Streets for the past four years and your Mayor for the last three months. Since becoming a member of the Council I have helped institute a great number of civic reforms in municipal affairs.

I am again offering my name as a candidate for the office of Mayor. If honoured with re-election, I will continue to work in the best interests of the City in a continual endeavour to make Charlottetown a better place in which to live.
