

AURAL COMMENT

By Theresa McKenna

On Thursday, October 29th, Summit University of California sponsored a free lecture on campus entitled: "The Control of the HUMAN Aura through the science of the spoken word". I initially had no intention of going, but my homework got me aggravated, so I decided to give it a try. I am usually skeptical of things advertised as "free." (There's gotta be a catch). Moreso, the fact that it was only two days before Halloween should have made me more doubtful, but I made my way to Steel Recital Hall. When I entered, I was taken aback. Our beloved cafeteria entrance had been turned into a bookstore: "Cosmic Consciousness", "Keep off the Grass" and "The Creation of the Cloud". I couldn't find "The Late, Great, Planet Earth," so I went up to the lecture.

The speaker was Paula Zarzycki, faculty member of Summit University. She was to present amazing scientific research and the latest discoveries about a phenoma known as the aura. She was to raise our consciousness and

explain that if you can control your aura, you can control the circumstances of your life. Terrific! I had an exam tomorrow and there was this guy I had my eye on. This stuff could come in handy. My attention was held..... for about 15 minutes.

Ms. Zarzycki was a good speaker; but the topic and the presentation left much to be desired. The situation reminded me of a professional form of the Hare Krishna propogandists I used to avoid in New York City. When I heard that we all have a bank account in heaven and saw slides of the thumbprints of a couple kissing, I decided there was a movie downtown that I wanted to see.

Yes, I left, even before it was over. I even missed the "inspiring message" of Elizabeth Clare Prophet. It didn't ruin my day.

They were present in Robertson Library when I got out of class on Monday night, I didn't think they were following me, but all the same, I was kind of glad that I lied on the information card I filled out when I first went in.
