Can Europe Be Defended? was the title of an article by the secretary of the World Council of Churches, Dr. W. A. Visser 't Hooft, in a new bulletin—Euro-Hoof, in a new bulletin—Euro-Hoof, in a new bulletin—Euro-Hoof...

But the writer continues, "we have not the smallest chance of Europe which is very precious and must be protected at all costs. And in this Europe he finds "the possibility of free discussions (more than in America at the moment) the independence of truth (unhampered as in Russia by political dogma)..."

It's HARD to realize that less than one hundred years ago aluminum was a precious metal, priced at \$17 an ounce. In fact, Queen's University at Kingston, Ont., presented the first graduate from its chemistry course with an aluminum medal in 1858.

Nowadays the price of aluminum is 18c a pound. How is it that a dollar buys as much aluminum today as it did before the war, while it buys so much less of most other things? One big reason is the increasing use of aluminum—ten times that of 15 years ago. Volume production keeps production costs down.
