The London Exhibition.

It is pleasing to learn that the Local Government have appointed an Advisory Board to obtain information respecting the great Colonial Exhibition to be held in London next spring...

Treatment of the Northwest Indians.

We have frequently heard it said by persons quite well informed on other subjects, that the Indians of the Northwest have grievances that ought to be redressed...

As original owners of the country, they have, however, certain rights, and these rights the white man is bound to respect. The rights of Canadian Indians at any rate have been fully recognised in a Treaty that has been deliberately entered into between the two contracting parties...

Let us look for a moment at some of the conditions of this Treaty. On their part, the Indians of the Northwest agree to give up a certain portion of their hunting grounds to the Government—the greater portion, it is true; but then they retain a large quantity, more, we fear, than ever they will make use of for agricultural or industrial purposes...

Those who are inclined to think that our Indians in the Northwest Territories are unjustly treated, will see by this that they have been liberally dealt with, and that the part they have taken in the late insurrection, is as ungrateful as it is treacherous and cruel.

In this connection we are reminded of all that has been done for them by faithful Christian missionaries. Taking, as it were, their lives in their hands, these missionaries went among them to teach them, and to lead them to a knowledge of Christianity. How have their philanthropic and self-sacrificing efforts been requited? The massacres at Frog Lake and other places is the reply.

Still, even in the face of exhibitions of base ingratitude and cruelty, one feels inclined to extend to the poor benighted Indians of the Northwest pity and forgiveness. The demands of justice loudly call for the punishment of the leaders in the late rebellion; but, if justice must have its way, let it be largely tempered with mercy in the case of even the most guilty Indians, most of whom were induced to join the insurrection through the wicked counsels of bloodthirsty and designing men like Riel and his associates.

We believe the present Dominion Government, notwithstanding the recent conduct of the Indians, will continue to faithfully carry out their part of the treaty agreement; and if so, the latter will have no reasonable cause for complaint. Feeding the Indians is expensive, no doubt, but it is cheaper to feed than to fight them. And now that the Indian rising is ended, we hope to see the white settlers in the Northwest act, not in a spirit of revenge, but leniently

and forgivingly towards their neighbors, the red man. If they do, we may expect to see peace return again to that country. The Indians before long will all become civilized and christianized; and the time is not far distant when what was known as the great Lone Land, over which roamed the bear and the buffalo and the equally wild savage, will be converted into happy home-steads, where the comforts and blessings of Christianity will be fully enjoyed, making it one of the most prosperous, as well as one of the most desirable places to live in in all our broad Dominion.

The reporter of the Patriot now attending General Assembly of the Presbyterian Church, must have been effected by the late hour of the session, or strange glasses must be in use in the editorial sanctum. In yesterday's issue our contemporary, in reference to the temperance report, states that Principal Grant moved an amendment to the report. This is true, and it is not. The objection taken by Principal Grant was not to the report, but to one of the recommendations that read as follows:

"That the Assembly censure the Senate, for the amendments made by them to the Scott Act."

It was to this recommendation exception was taken, not to the report.

The success of the experiment of cleansing a few streets and yards in the New York tenement quarter by flushing with salt water, warrants the adoption of this plan on a large scale in other cities. The antiseptic power of salt water is not very great, but it will be helpful in arresting the processes of decay and decomposition. The idea that the saline ingredients of sea water may affect the atmosphere in some mysterious way to develop diphtheria is absurd, as analysis of sea water show that the average amount of all saline matter which it holds in solution is less than 3.5 per cent. If the tooth of slow running water is so sharp as to cut its way through stone and rock, we can never hope for a more effective and cheaper means of cleansing polluted courts and alleys than the stream of salt water driven by the steam fire engine.

Supreme Court, Summerside.

SUMMERSIDE, June 18, 1885. The case of William Bowness against Patrick Brown, tried to-day, is one of some interest to employers of labor.

The evidence showed that the plaintiff and his minor son on the 4th of April, 1881, entered into a verbal contract with the defendant that the plaintiff's son was to serve the defendant in his business of a tinmith for five years, and that the defendant was to instruct the son in that business, and allow him the wages paid to tinmiths' apprentices. A quarrel took place between the plaintiff and the defendant, and on the 18th of January, 1884, the son being still a minor, the defendant was served with a notice from the plaintiff, that in future he was either to pay the son's wages to him (the plaintiff) or to dismiss the boy from his service. The defendant did not heed the notice, but paid the wages to the boy as usual until October, 1884, when, with the consent of the defendant, the boy left his service. The plaintiff sued for the wages earned by his son from the date of the notice until October. The jury returned a verdict for the defendant.

Mr. Morsen for the plaintiff. Mr. Hodgson, Q. C., for the defendant.

LETTERS TO THE EDITOR.

Volunteers Wanted.

SIR,—Your issue of yesterday contained the intelligence that Volunteers are wanted to go to the Northwest for a short time, to take the place of the brave men who stood the brunt of the fight, and many of whom now desire, very reasonably, to return home.

To-night is one of the nights at the Drill Shed. Would it not be well for the "gallant Major" and the officers to find out how many of the men of the companies here are ready and willing for duty?

Yours, SAMMY.

"An ounce of prevention worth a pound of cure" is an old adage but true. In view of predictions that this country is liable to be visited by more than an ordinary amount of contagious disease this year, it behooves all to inquire about and practice every sanitary measure, especially cleanliness, which as a preventive, offers some one means of escape at least; and in this how important the article of Soap as to quality fit for use; certainly all inferior grades made so by foreign substances and adulterations of a questionable character, should be rejected, that there may be no taint left on the person or clothes which might in any way invite the germs of these various diseases. A first class article, made by known reliable manufacturers, is the only kind that can be safely used or recommended. In the use of a standard soap, like the "Welcome," made by Curtis, Davis & Co., there can be no risk, being the goods of a firm whose name on soap is a sufficient guarantee of its purity.

WE learn that Dr. Hobkirk's hand was amputated yesterday. The operation was performed by Dr. Beer, assisted by Dr. Warburton and Jenkins. The aged doctor is as well as can be expected under the circumstances.

CRICKET—The annual cricket meeting, to have been held this evening, is postponed till tomorrow afternoon on the grounds. A scratch match will be played—stumps pitched at 2.30—after which the meeting will be held. A full attendance of the Club is requested.

MR. W. S. HARKINS, wife and family, were passengers by the steamer Miramichi from Montreal to Pictou. Mr. Harkins intends to leave his family in Truro, then proceed to New York and engage a first-class company to play during the summer months in the Maritime Provinces. We wish him success.

A MAP of part of Manitoba and Northwest Territory has been issued under the signature of "Montague Aldous, Dominion Topographical Surveyor." His many friends in this province, will be glad to learn that Mr. Aldous has attained to so high a position.

SOME time ago we received from Mr. James Lewis a sample of the first rhubarb of the season, and now we have to thank him for a sample of the best. It is finer and better than anything of the kind imported, and we have seldom seen any as good produced in the island.

THE adjourned meeting of the officers and N. C. officers of the militia, will be held this (Friday) evening at 8.30 p. m., sharp, at the office of Palmer & Mullally, to receive the reports of Committees, etc. William A. Weeks, Lieut. C. E., Secretary of Committee.

THE proprietors of the Roller Skating Rink intend to close that institution during the hot weather—say from the 1st of July to the 31st of August. This is a step more in the right direction, and in keeping with the good management of the rink since it was opened in May.

THE steamer Miramichi arrived from Boston this morning with a cargo of merchandise and sailed for Pictou this afternoon. She will leave Summerside for Montreal on Tuesday morning at 9 o'clock. Miss Newbery, daughter of F. T. Newbery, Esq., and Rev. C. Campbell were passengers by the Miramichi to this port.

THE steamer Carroll, Capt. Brown, sailed for Boston on yesterday evening with a full cargo of eggs, lobsters, etc. She also had the following passengers: Mrs. W. L. White, Miss Hannah White, Miss Dawson, Mrs. Dr. MeLeod, Mrs. John H. Gates, Miss Lizzie Smith, Miss Jane McDonald, Miss G. McDonald, E. Howatt, Miss Annie Campbell, Mrs. McLean.

AT the Stipendiary Magistrate's Court this forenoon, two boys arrested for being out after hours, were lectured and discharged. Three Scott Act cases were considered. One was dismissed, and the others were adjourned until Monday. Over twenty-five nuisance cases were then disposed of, and the court adjourned.

THE construction of the New Dominion Building in this city is making rapid progress under the personal supervision of Mr. Connor and his efficient foreman, Mr. Read. The foundation wall is nearly four feet wider of solid stone masonry and is the best in the Province. Mr. Connor has forty-five men employed in the work.

WHEN King James the first wrote his counterblast to tobacco the royal penman knew nothing of the "Myrtle Navy." If he had, instead of wasting his brains over his curious production, he would have filled his royal pipe with it, and would have taken a royal smoke, he would then have been prepared to admit that with regard to the injurious effects of tobacco, it all depends on what tobacco you smoke.

New and Original Departure in Coal Cooking Stoves COMBINING DURABILITY, HEAT AND ECONOMY.

This cut represents my Patent Fire King Cooking Stove, with the oven end and lining partially drawn out.

as it appears while being cleaned, or when a new lining is being replaced.

THE above Stove I invented and patented in 1876, and at the present time HUNDREDS ARE IN USE, giving perfect satisfaction. A large number have been in constant use for eight years, and the repairs have been very trifling, in many instances none have been required. This valuable experience should be sufficient evidence of their durability, which is accounted for in the following:—It has, instead of a Lined Fire Box, two heavy Curvated Cylinders, which obviate the expense connected with all Square Cooking Stoves of being compelled to renew Linings and Grates, at least once or twice every year. The heat being radiated to the floor, where most needed, overcomes a serious objection to all kinds of ordinary Coal Cooking Stoves. The Cylinders are situated directly under the cover holes, and a fire may be made in one or both, thus adapting it for use either in winter or summer, with equal satisfaction, besides effecting a great saving in fuel. I have also attached the PATENT TELESCOPE OVEN to all my Elevated Oven Wood Stoves, such as the Waterloo, Niagara, Star, &c., causing the flames using them to exclaim—My Stoves are worth TEN DOLLARS MORE than the same kind made by other foundries. The trade and retail purchasers will please bear in mind the fact that although a great advantage is claimed for my own Oven above all others, they cost no more, and being the sole manufacturer and patentee, no other funder can supply. Enquire for Fawcett's Patent Telescope Oven, and if your dealer has none on hand send direct to the Sackville Foundry.

I am adding several new and handsome Patterns this season, which, with my former large variety of One Hundred Different Patterns and Sizes of Cooking, Parlor, Office and Hall Stoves, also Farmers Boilers, Hollowware, Ploughs, Stove Pipes and Tilers, comprise the most complete assortment offered by any manufacturer in the Lower Provinces. Terms and prices will be found as favorable as can be obtained elsewhere.
