ST. PAUL'S CHURCH ASSOCIATION.—A lecture will be delivered before the above Association at St. Paul's Schoolroom, on Thursday evening next, 11th inst., at 8 o'clock. Subject: "The Chronological Date of the Nativity." Lecturer, Dr. Leeming; Chairman, C. Palmer, Esq. Admission free. The public are respectfully invited.

MR. F. H. MITCHELL, agent for the direct Steamship line at Annapolis, N. S., Mr. Clarke Tree, agent in the employ of Mr. Rupert, and Albert Lewis, a colored man, of this place, were drowned about half past one, on the 4th inst., by the upsetting of a boat in the French cove, about two miles above Annapolis Royal.

THE passengers who crossed from Southport to-day in a row-boat have just cause for complaint. The landing from the wharf to the boat is most dangerous. We cannot see any reason why the steamboats are not running. If the dock is not fixed, passengers could be landed at the side of the wharf.

JOHN TAYLOR, President of the Mormon Church, is described as of venerable appearance, tall, broad-shouldered, full-chested, with an almost square face, framed by snowy hair and short, white beard, worn under the chin from ear to ear. His sunken, dark eyes are shadowed by bushy, black brows.

A LETTER was received at the St. John Post office from Blackburn, England, bearing the following address:—MISS MARY DEGGAN, by maiden name, St. Johns, Prince Edward Island, New Brunswick, United States of America.

A MAN, named John Charlebois, accompanied by two of his children, attempted to cross a lake in the Gatineau lumber district, Ottawa, on the 3rd inst. The boat being in a bad condition, Charlebois went through. The children, aged seven and eleven years, bravely came to his rescue, and made a desperate effort to save their father from a watery grave. Unfortunately, however, they were unsuccessful, and the ice giving way beneath them, all three perished.

MORE LIGHT!

THE Charlottetown Gas Light Company have imported some of "BRAY'S BURNERS," which they will supply and fit on Gas Brackets, etc., at a moderate cost to consumers. These Burners are reported to be the best Flat Flame Burner yet produced, and will give a far greater amount of light than any other Burner with the same consumption of Gas. Dr. Wallace, F. R. S. E., F. C. S., Gas Examiner to the City of Glasgow, in a lecture delivered by him, calculated that £13,000 (\$650,000) a year are thrown away in Glasgow by the use of imperfect fittings. On the subject of Gas Burners he says: "Another and as I think a better Burner is that called Bray's regulator, and as I consider these the best open Burners attainable at moderate cost, I have selected them for a series of experiments. The report of the Committee of the British Association of Science to enquire as to the best means for the development of light from Coal Gas of different qualities—comprising Dr. William Wallace, Professor Dittmar, and Mr. Thomas Wills, F. C. S., F. I. C. E., showed that Bray's Burner yielded the greatest amount of light of all the two or three score of Burners reported upon which included all the Burners of repute in the market. In a pamphlet upon Light and Heat, published by R. B. Tauber, A. M., he says: "The cost of Gas as compared with other illuminants is much more economical when rightly used, than many suppose. From experiments made for this purpose, the following results have been obtained. They were made by burning samples of Devoo's Brilliant Oil and ordinary Oil, and testing their illuminating power. It was found that Coal Gas costing one cent at \$3 per thousand feet, gave a light equal to 18 candles, while Devoo's Brilliant Oil consuming 27.4 grammes costing half a cent, gave a light equal to 9 candles. A good Argand or Johnson's Burner, the Burner used in the last experiment, will therefore give the light of 2 ordinary Oil Burners in direct comparison, at no greater expense in the case of the finer and sater grades of Oil. Lights, however, on the authority of scientists, are not to be compared in direct proportion, but in proportion to the squares of their powers, and such a comparison with the case of the use of gas, its cleanliness, freedom from odor and danger, renders its use desirable wherever it can be introduced." As the above experiments were made with Gas at \$3 per 1000 feet, and not consumed through Bray's Burners, it will readily be seen how much more economical it is to consume Gas instead of Oil, when its price is only \$2.63 per 10.0 feet as now charged here when consumed, more especially through Bray's Burners. Messrs. Goodwin & Co., of Philadelphia, the well-known manufacturers of Scientific instruments for testing the illuminating power of Coal Gas, etc., say in their Circular to Gas Companies: "In presenting the Bray's Standard Patent Silt Union Burners and Lanterns, for which we are the sole Agents in the United States, to the attention of the public, we are convinced that we are filling a want long felt." They further add: "The yield of light from these Burners is 12 to 20 per cent. greater per cubic foot of Gas consumed than that from any flat flame Burner hitherto introduced. (May 4) 4d
