

Less Cows Give More Milk, Dairy Council Is Informed

MONTREAL (CP) — The National Dairy Council of Canada reported at its annual meeting Tuesday that milk production is running six per cent ahead of last year, pointing toward a record 18,000,000 pounds.

Cows were scarcer but more productive. All areas except the Maritimes show gains in milk output despite declines in cow numbers. Price supports assure producers of a minimum \$3.00 per hundredweight.

Butter output has increased by 27,000,000 pounds from last year, the council said. Butter stocks have increased because of the production gain and a consumption fall-off of 2,000,000 pounds since the beginning of the year.

This was blamed on butter's high price compared with margarine. Butter had a government support price of 64 cents a pound, while in chain stores' promotions margarine sold for as little as

three pounds for 53 cents. CHEDDAR OUTPUT DOWN

Cheddar cheese production in Canada has declined by 11 per cent of 7,000,000 pounds so far this year. However stocks were at their highest level in years because exports were at their lowest. Less than 1,000,000 pounds had been exported so far this year.

Recent announcements that 1957 and 1958 cheddar is available for export at 29 to 30 cents a pound was expected to improve the situation. The support price is 34 cents a pound.

However 1957 Canadian white cheese is selling in the United Kingdom for about 35 cents a pound, the council said, and reports from there "indicate little market interest arising out of the recent statement in Montreal by the U.K. board of trade officials that restrictions on dollar imports may be relaxed."

BURTON

Canada Going After 12-Mile Fishing Limit

SEATTLE (CP) — Canada's declared intention to press for 12 mile control of its coastal fisheries was known to be a chief topic for discussion at a closed-door session Tuesday on international fisheries questions.

William G. Herrington, special assistant to the United States undersecretary of state, arrived Monday night for the conference with the department's industry advisers. More than 25 industry leaders from Pacific, Gulf and Atlantic areas were in attendance.

Herrington called the session when Iceland announced its intention to extend its territorial limits to 12 miles. Canada and Mexico opposed efforts by the U.S. and the United Kingdom to maintain the long-standing three-mile limit during a conference at Geneva last spring.

Unresolved at Geneva were the extent of territorial waters and the depth of a zone beyond territorial waters for fisheries jurisdiction. The questions were referred back to the general assembly of the United Nations with a recommendation that a second conference be held to settle the matter.

Herrington indicated Tuesday's session will help determine the U.S. position before the General Assembly.

Talks Continue With Auto Firms

DETROIT (AP) — United Auto Workers President Walter Reuther arrived Tuesday at what he called "a meeting of the minds" with Chrysler Corporation in an all-night bargaining session. But later Chrysler officials said they felt he was too optimistic.

Reuther left the Chrysler talks and turned to the union's negotiations with General Motors. GM faces a strike of its 250,000 UAW members at 11 a.m. EDT Thursday if there is no settlement.

Chrysler Vice-President John D. Leary came out of the bargaining session after Reuther's exit and said:
