## BFGoodrich 'BIG EDGE' TRAILMAKERS CHEW THROUGH SNOW!

Now BFG Trailmakers have deeper biting edges than any other major-brand snow tire. They'll chew their way confidently through the deepest snow or mud. They'll resist skids more surely than any other snow tire. They'll know you've got them when you're on wet or dry pavement, you'll hardly ever see a skid. Trailmakers are big hefty cleats on the outside of the tire, the most pulling power's needed. They're so much grab-and-go, they give you this kind of action and security after ordinary snow tires have given up. Yet, they're so quiet on wet or dry pavement, you'll hardly know you've got them.

Now all B.F. Goodrich TRAILMAKERS are of highest quality Nylon construction! You can buy these great tires for no more than you'd pay for ordinary winter tires. Ride safely and surely on TRAILMAKERS!
