Why the Columbus Watch is the Best

THE Main Spring barrel is completely covered, making the watch perfectly dust proof.

There can be no interference between the Balance and the Barrel.

The Regulator is nearly double the length of others, rendering accurate regulation a

very simple matter.

To replace a broken Main Spring, the Barrel can be removed without disturbing the

Balance or interfering with the regulation.

The pins of the Regulator are so formed and located that two or more coils of the Hair

Spring cannot catch between the Pins and cause the Watch to stop or gain time at an

unnatural rate.

The Balance comes under the round, or edge, the strongest part of the case, not as with

all others, under the center and weakest part.

The Main Spring Power is the lightest used in American Watches.

The calculation of the Train is such that this Watch runs 8 to 10 hours longer than

others, with one winding, giving more uniform power and rate.

These are improvements that cannot be claimed by any other manufacturers, and once

seen, all must agree with us in saying that this is the strongest and best Watch made; and

with all the above improvements, the Columbus Watches cost no more than others.

Sullivan is going across the water to see

the Kilrain-Smith fight, and will challenge

the winner.

One Blythe, a liquor informer, was

pelleted with rotten eggs at Portage La

The bank cashier of the period does not

seem to think anything less than half a

million worthy of his steel.

A new solution of the time honored con-

undrum: Why do poor people marry? is

that misery loves company.

Hon. Oliver Mowat, Premier of Ontario,

white, and that of a whiskey drinker's

black.

the hair, mum."

gine come to him. He hasn't got any heel

on one foot now.

Boston has 1,400 lawyers, but so far as

income is concerned Gen. Butler heads the

list. His practice nets him considerably
