Science Now Shrinks Piles Without Pain Or Discomfort

Finds Healing Substance That Relieves Pain And Itching As It Shrinks Hemorrhoids

Toronto, Ont. (Special)—For the first time science has found a new healing substance with the ability to shrink hemorrhoids and to relieve pain and itching. Thousands have been relieved with this inexpensive substance right in the privacy of their own home without any discomfort or inconvenience.

In one hemorrhoid case after another, "very striking improvement" was reported and verified by doctors' observations. Pain was promptly relieved. And while gently relieving pain, actual reduction or retraction (shrinking) took place.

And most amazing of all—this improvement was maintained in cases where doctors' observations were continued over a period of many months!

In fact, results were so thorough

that sufferers were able to make such statements as "Piles have ceased to be a problem!" And among these sufferers were a very wide variety of hemorrhoid conditions, some of even 10 to 20 years' standing.

All this, without the use of narcotics, anesthetics or astringents of any kind. The secret is a new healing substance (Bio-Dyne) — the discovery of a famous scientific institute. Already, Bio-Dyne is in wide use for healing injured tissue on all parts of the body.

This new healing substance is offered in suppository or ointment form called Preparation H. Ask for individually sealed convenient Preparation H Suppositories or Preparation H ointment with special applicator. Preparation H is sold at all drug stores. Satisfaction guaranteed or money refunded.
