SPECULATION IN WALL STREET.

Is always hazardous, and should never be entered upon by anyone who cannot afford a loss in event of one being sustained. On the other hand, the profits of speculation, when successful, are usually very great. Success or failure is largely a question of good judgement, guided by experience and proper information.

"THIS IS CANADA YEAR"

WHY RIDE A CLEVELAND?

Because it is the highest type in the art of bicycle construction to-day—its popularity is world-wide.

It is beyond competition and courted criticism in a constituency that has been well grounded in the appreciation of all the fine points in construction, development and improvement.

It is a Canadian wheel, made by Canadian mechanics and in a Canadian factory—by Canadian machinery and employing Canadian capital.

The ideas embodied in its construction are acknowledged the best by leading cycle manufacturers, and some of its newest and most important features and improvements for 1900 are:

Hardened block and pin which prevents the chain from wearing—combined ball and roller bearings—automatic oiling hubs—dust proof skeleton gear case—improved ball head spokes—dust proof pedals—improved sprockets—improved handle bar and seat post adjustment—chainless models, combined coaster and brake, and it's one of the handsomest and most perfectly equipped machines on the market—ladies and gents.
